Preface

The Free Introductory Grammar of Biblical Hebrew is intended to enable students to read the Hebrew Bible with the help of a lexicon. Verbal morphology is introduced at a very early stage because of its importance in the grammar of Biblical Hebrew and the biblical texts themselves. The vocabulary includes almost all words that occur fifty times or more in the Hebrew Bible and a number of less frequent but important words. All exercises and examples are taken from the Hebrew Bible.

Special thanks go to my students at the Biblical Seminary of the Philippines in Valenzuela City and the Asian Theological Seminary in Quezon City for letting me try this introductory grammar on them in the academic year 2024–25.

With the plethora of Hebrew introductory grammars on the market the natural question is why another one is presented to the public. There are two reasons for this.

First, this grammar was written with the intention of making a Hebrew grammar for beginners available at no costs and without a restrictive license. Therefore, it is licensed under the Creative Commons Attribution-Share Alike 4.0 International License. For more information about the license see the copyright page.

Second, this grammar introduces the most frequent verbal forms including weak forms at a very early stage and uses only authentic Biblical Hebrew for the examples and the exercises. In this respect it follows the model of Ernst Jenni's *Lehrbuch der hebräischen Sprache des Alten Testaments* (4th ed.; Basel: Schwabe, 2009). This approach makes it possible to present authentic Hebrew sentences already in Chapter 3 and to avoid the pitfalls of self-composed Hebrew.

This book was typeset in $\LaTeX$ because of the capabilities of $\LaTeX$ and the fact that it is open source software and platform independent. The use of open source software is a prerequisite for a truly free work. This applies to fonts, as well. As a consequence, only fonts under a free license are used.

Additional Information

The Hebrew term for alphabet is אֲלֶפֶת אֲבֹתֵי *ālāp̄-bēt* (abbreviated א"ב).

The pronunciation of the consonants is indicated by English words beginning with a corresponding consonant except for the letter ת. At times, the English word gives the pronunciation of the Hebrew sound only by approximation.

The second letter after the comma (when read from right to left) in the first column is the shape of the letter when it occurs at the end of a word. These letters with a distinct shape at the end of a word are called final letters or כְּמוֹנֵי *kamnappēš* letters.

The ר is pronounced with the tip of the tongue (as *r* in Tagalog).

The letter ש originally represented two distinct consonants, i.e., /ś/ and /š/. Traditionally, ש representing /ś/ is pronounced as a voiceless sibilant [s]. Its original pronunciation was probably that of a lateral-fricative sibilant [ɬ], i.e., a sibilant [s] combined with an [l]-element. The graphical distinction between /ś/ and /š/ was only introduced by the Masoretes by placing a diacritic point either on the right or the left upper corner of the letter. The result were two distinct letters (or graphemes) with /ś/ being represented by ש and /š/ by שׁ. Before the introduction of the diacritic points only the correct understanding of a text made it possible for the reader to distinguish between the two consonants. The letter שׁ is much more frequent in Hebrew than the letter ש.

It is important to distinguish letters that look alike and consonants that sound alike or identical in the applied reading tradition.

1.2 Bəḡadkəfat Letters

The letters ב, כ and פ have a double pronunciation in the table above. When they are preceded by a consonant or when they are doubled (geminated), they are pronounced as plosives whereas they are pronounced as fricatives when they are preceded by a vocalic element, either vowel or a reduced vowel.

	plosive	fricative
ב	<i>b</i>	<i>b̥/v</i>
כ, כּ	<i>k</i>	<i>k̥</i>
פ, פּ	<i>p</i>	<i>p̥/f</i>

Final פּ is always pronounced as a fricative. Final כּ is mostly pronounced as a fricative but it can represent a plosive sound, too.

In Masoretic Hebrew three more consonants had a double pronunciation, i.e., as plosives after a consonant or when doubled or as fricatives after a vowel.

	plosive	fricative
ג	<i>g</i>	<i>g̥</i> like γ in Mod. Gr. γάλα
ד	<i>d</i>	<i>d̥</i> like <i>th</i> in Engl. <i>this</i>
ת	<i>t</i>	<i>t̥</i> like <i>th</i> in Engl. <i>thing</i>

As a group, these six letters are called **בְּגִיד כּפֹת** *bəḡadkəfat* letters (אותיות בג"ד (כפ"ת)).

In Modern Hebrew, only the letters ב, כ and פ have a double pronunciation. This distinction is followed for the pronunciation of these letters in Biblical Hebrew. The double pronunciation of ג, ד and ת in Masoretic Hebrew is usually ignored.

In pointed (or vocalized) Hebrew (see the next chapter), a dot called *dageš* is added to *bəḡadkəfat* letters to distinguish the plosive pronunciation (with *dageš*) from the fricative pronunciation (without *dageš*).

1.3 Gutturals

The four consonants א, ח, ע and ע represent guttural sounds which means that they are articulated in the throat. (The term *guttural* is derived from Latin *guttur* *throat*.)

The letter א stands for the glottal stop. In English the glottal stop is found in the negative *uh-uh* and in Tagalog between the two vowels of the word *daan*. At the end of syllables it became silent (quiescent) in most cases, e.g., אבא *šāḇā(ʔ)* *army*. In this grammar, the quiescent א is transcribed (ʔ) to indicate the presence of the letter א and the fact that it is no longer a consonant.

The ח /ħ/ is a fricative sound that corresponds to /ħ/ in Arabic, e.g., *Muham-mad*. As in Modern Hebrew, the /ħ/ is usually pronounced like the fricative כ *k* as the final *-ch* in the name of the German composer Bach or the Scottish-Gaelic word *loch* (as in Loch Ness, the name of a lake on Scotland).

The ע is the voiced counterpart to the ח /ħ/. It is the same sound as the initial sound of the Arabic word *ʿayn* “eye”. As in Modern Hebrew, the ע usually pronounced as the א. For a clearer distinction of the two consonants it is recommended to pronounce the ע with more force than the א.

1.4 Emphatic Consonants

The three consonants ט, צ and פ are called emphatic because they are “articulated farther back in the mouth in the region called the soft palate, and with greater tension of the articulatory organs than is the case for the non-emphatics” (JM § 5i).

	emphatic	non-emphatic
Dental	ט <i>t</i>	ת <i>t</i>
Palatal-velar	צ <i>q</i>	כ <i>k</i>
Sibilant	פ <i>š</i>	ס <i>s</i>

The emphatics ט and פ should be pronounced with more force or emphasis than their non-emphatic counterparts ת and כ to avoid confusion. The traditional pronunciation of צ as *ts* makes confusion with ס *s* impossible.

1.5 Semivowels

The letters ו and י represent so-called semivowels (also called glides or semi-consonants). Technically, the semivowels are considered consonants. Originally, ו was pronounced as a bilabial sound *w* as in Engl. *well*. In Modern Hebrew it is pronounced as /v/ as in Engl. *vase*. Its transliteration, however, is *w*.

Semivowels often interact with vowels by merging with them to form long vowels. This process is called contraction.

1.6 Vowel Letters

Originally, the letters of the Hebrew alphabet only indicated consonants. As a consequence, readers of Hebrew texts had to supply all vowels by using their knowledge of the language. Before 700 BCE, however, scribes introduced the use of three consonants for indicating vowels.

The letters ו and י are used to indicate long vowels in the middle of words and at the end of words. The letter ה only indicates vowels at the end of words. Originally, vowel letters were only used to indicate long vowels. The following vowels are indicated by these three vowel letters:

- ו *ō, ū*, e.g., יום *yōm* day, סוס *sūs* horse
- י *ī, ē, ā*, e.g., איש *ʾiš* man, בין *bēn* between, בָּנִיךָ *bānāʿēkā* your sons
- ה *ā, ē, ī, ō* (only at the end of words), e.g., אשה *ʾiššā* woman, זה *zē* this, הנה *hinnē* look!, כה *kō* thus,

When vowels are written with a vowel letter, it is called *plene* spelling (Latin *scriptio plena* from Hebrew מלא כתיב *kətib mālēʿ* full spelling). When vowels that could be spelled *plene*, are spelled without vowel letter it is called defective spelling (Latin *scriptio defectiva* from Hebrew מלא כתיב *kətib ḥāsēr* defective spelling).

Sometimes, vowel letters are used for short vowels, e.g., כולם *kullām* all of them (Jer 31:34; the form is normally spelled כלם).

Traditional terms for vowel letters are the Latin *mater lectionis* (singular) and *matres lectionis* (plural) which are calques of the Hebrew terms אם קריאה *ʾēm qərīʾā* mother of reading (singular) and אמות קריאה *ʾimmōt qərīʾā* mothers of reading (plural), respectively. In English, these terms are often shortened to *mater* or *matres*.

The letter **ס** is not a vowel letter in the same sense as **ו**, **י** and **ה**. At the end of syllables /ʔ/ often became silent – this happened always at the end of words – but was retained in writing so that vowels appear to be written with **ס**. The most common vowels preceding silent **ס** are *ō*, *ē* and *ā*, e.g., **רֹשׁ** *rō(ʔ)š head*, **לִמְוֹר** *lē(ʔ)mōr* (introduction of direct speech), **יִמְמָה** *yīmā(ʔ)*.¹

Unlike **ו** and **י** which can be used as vowel letters even in positions where there was no semivowel /w/ or /y/ before, silent **ס** only occurs where there was once a consonantal /ʔ/ (exceptions are possible).

1.7 Position of the Stress

In Masoretic Hebrew, most words are stressed on the last (or ultimate) syllable. Exceptions to this are nouns with originally two final consonants (see Chapter 2) and a number of verbal forms.

In this grammar, the position of stress of a Hebrew word is indicated by the sign ˈ on the stressed syllable when it is useful, e.g., **בְּאֶרֶץ** *bāʾāræʃ in the land*. Penultimate stress of pausal forms is marked with the accent *atnaḥ* even when the form has a different accent in the Masoretic text, e.g., **וְהָיָה**.²

1.8 Numerical Values of Letters

The numerical value for Hebrew letters is a feature of postbiblical times. In Hebrew inscriptions from the First Temple period, hieratic number signs were used. In extant biblical manuscripts, number words are used instead of number signs. In English, this corresponds to using the word *seventy* for the number 70.

1.9 Exercises

1.9.1 Proper Nouns without Vowel Letters

Identify the following proper nouns from the Hebrew Bible. The names do not contain vowel letters; every Hebrew character indicates a consonant. Use the vowels a, e, i, o, u (as they sound in Tagalog). Syllables in Hebrew always begin with a consonant; only one vowel may follow. Reminder: The letter **שׁ** may represent either the sound /š/ or the sound /ś/.

¹ In this grammar, silent **ס** is indicated in transcription by (ʔ).

² Pausal forms are special forms in certain positions of a verse (→ 2.12).

1.9.2 Proper Nouns with Vowel Letters

Identify the following proper nouns with vowel letters from the Hebrew Bible. Use the vowels a, e, i, o, u (as they sound in Tagalog). Syllables in Hebrew always begin with a consonant; only one vowel may follow. The ending יהו- is to be pronounced -yáhu with the stress on the penultimate syllable. It is a short form of the name of God יהוה that is used as final element in proper nouns.

Reminder: The letter ש may represent either the sound /š/ or the sound /ś/.

Chapter 2

2.1 The Vocalization of the Hebrew Bible

The Masoretes, the Jewish scholars who worked on the transmission of the Hebrew Bible between 700 and 1000 CE, added an elaborate system of vowel signs and other signs to the biblical text to ensure its correct pronunciation. Each vowel was now indicated by a sign. As a result, some vowels are indicated twice – once with a vowel letter and once with the vowel sign that was added by the Masoretes.

During the period from 700–1000 CE three different vocalization systems were developed, the Tiberian, the Babylonian and the Palestinian system. In the history of the transmission of the Hebrew Bible, the Tiberian system became the standard vocalization system. It consists of sublinear and supralinear vowel signs and additional signs to indicate the absence of a vowel, the plosive pronunciation of *bəḡadkəfat* letters and the doubling of consonants and other phonetic features. The Hebrew term for the vocalization system is נִקּוּד (vocalized נִקּוּד) *niqqūd*.

The existing biblical text to which the Masoretes added the pointing is often called the consonantal text. This term is not accurate because the biblical text contained vowel letters, i.e., letters that indicated vowels and not consonants. In this work, the term “unpointed text” is used instead of “consonantal text.”

2.2 Full Vowels

Biblical Hebrew according to the Tiberian vocalization system has seven distinct vowels. Originally, the vowel signs only indicated vowel quality but not vowel quantity (length). The Tiberian system was later reinterpreted according to another reading tradition. This reinterpretation is presented here.

Notes

For grammatical explanations a simplified transliteration of the names of vowels and other signs will be used (*hireq, sere, segol, pataḥ, qameṣ, holem, qibbuṣ, šureq*).

Vowels are pronounced after the consonant they are placed with. The combination מַ, for example, stands thus for /ma/.

The approximate pronunciation does not distinguish vowel length. Vowel quality is indicated only by approximation.

The *qameṣ* indicating ā is called *qāmæṣ gādōl* (simplified *qameṣ gadol*). The *qameṣ* indicating ɔ is called *qāmæṣ qāṭān* or *qāmæṣ ḥātūf* (simplified *qameṣ qatan* and *qameṣ ḥatuf*, respectively).

For the vowel /ū/ the sign *qibbuṣ* is used when there is no vowel letter whereas *šureq* is used when there is a vowel וְ in the unpointed text, e.g., פְּקוּדֵיךָ and פְּקֻדָּיֶיךָ *your precepts* (Ps 119:15, 27).

The vowel *holem* is the only vowel sign that is placed on the top left corner of the letter (except with לְ, e.g., חֶלֶם *dream*). If combined with the vowel letter וְ the *holem* is placed on the וְ, e.g., לוֹט *Lot*. If combined with a silent א the *holem* is placed on the top right corner of the א, e.g., רֶאשׁ *head*. In some printed works the *holem* merges with the diacritic point of a following שׁ or a preceding שׁ. Examples: מִשְׁחָה instead of מִשְׁחָה; שִׁנְאָה instead of שִׁנְאָה *one who hates you*.

2.3 The Distinction between *qameš gadol* and *qameš qatan*

In the Tiberian vocalization system as it was intended, the *qameš* only represented the vowel *ɔ*. The distinction between *qameš gadol* and *qameš qatan* is the result of a later reinterpretation of the Tiberian vocalization system which is linguistically justified. As this distinction is widely used in Jewish communities and is also applied in Modern Hebrew it is followed here as well. A *qameš* is a *qameš qatan* (or *qameš ḥaṭuf*) in the following cases:

1. In closed, unstressed syllables, i.e., before silent *šwa*, before *maqṣef* (see below) and before *dageš forte* (infrequent), אָזְנִי *ʾəznī my ear* (from sg. אֶזֶן), שָׁמֹר-לָךְ *šəmōr lākā keep* (cf. שָׁמֹר without *maqṣef*), כָּסוּ *kəssū they were covered*.
2. In the first syllable of the plural noun קִדְּשִׁים *qəḏāšīm* (usually spelled with *meteg*) because of the vowel *ō* (< **u*) in the first syllable of the singular form קִדְּשׁ.

The vowel *qameš qatan* *ɔ* always originates from a short /u/, whereas *qameš gadol* goes back to an original /a/ or – less frequently – /ā/. If a word has the vowel *qameš qatan* in a certain form, the vowel may appear either as *holem* or *qibbuš* in other forms of the word, e.g., חֹק *hōq statue*, חֻקִּים *ḥuqqīm statues* (pl.), חֻקֵּי *ḥuqqī statue of* (construct state).

Note

The plural of the noun בַּיִת *báyit house* is spelled בָּתִּים but pronounced *bātīm* with *qameš gadol* and a single plosive /t/.

2.4 The *šwa*

The sign *šəwā* (simplified *šwa*) consists of two dots under the letter that are arranged vertically: ׀ . Phonetically, the *šwa* indicates the lack of a vowel. For the morphological analysis of words three different types of *šwa* can be distinguished, the silent *šwa*, the vocal *šwa* and the medial *šwa*.

2.4.1 Silent *šwa*

The silent *šwa* is used to mark vowelless consonants at the end of closed syllables except at the end of words, e.g., אַבְרָהָם *ʾabrāhām*, מִדְבָּר *midbār desert*.

In three cases silent *šwa* is found at the end of words:

Chapter 2

1. Words ending with the consonant /k/, e.g., מַלְאֲכִי *mal'āk messenger, angel*, אֲבִיךָ *'ābīk your (fem.) father* (but אֲבִיכָא *'ābīkā your (masc.) father* with ך followed by a vowel)
2. Words with two consonants at the end, e.g., שְׁאַלְתָּ *šā'alt you have asked*, וַיִּשְׁתָּ *wayyēšt and he drank*
3. The independent personal pronoun אַתָּ *'at you (fem. sg.)*

The only words with silent *šwa* at the beginning of the word are שְׁתַּיִם *štayim* and שְׁנַיִם *šnayim* two.

2.4.2 Vocal *šwa*

The vocal *šwa* is used with the initial consonant of an originally open syllable in which the original short vowel was reduced, e.g., דְּבָרִים *words* (< **dabarīm* with a reduced vowel in the first syllable; pl. of דָּבָר *word* with two full vowels).

If possible, a consonant with vocal *šwa* should be pronounced vowelless. For the sake of convenience, the vocal *šwa* may be pronounced as a hurried *e* as in the first syllable of Engl. *atone* [ə'toun], e.g., בְּגָדִים *bəgādīm clothes* (with two plosives) as opposed to סְפָרִים, transliterated *safārīm*, pronounced [sfari:m] *books*. Vocal *šwa* is always transliterated *a* despite its vowelless pronunciation.

The following three criteria help to distinguish a vocal *šwa* from a silent *šwa*. A *šwa* is a vocal *šwa* in the following cases:

1. *šwa* at the beginning of the word, e.g., פְּרִי *pəri* [pri:] *fruit*
2. *šwa* following *šwa*, e.g., מִשְׁפָּטֵי *mišpātē precepts of*
3. *šwa* following a long vowel, e.g., שׁוֹפְטִים *šōpəṭīm judges*, אָמְרָה *'āmərā she said*
4. *šwa* with a consonant with *dageš forte* (see below), e.g., דַּבְּרִי *dabbərū speak! (impv. masc. pl.)*

2.4.3 Medial *šwa*

When two open syllables with reduced vowels would have to follow each other immediately, the first consonant gets a full short vowel (often /i/) and the second consonant gets a silent *šwa*. This particular *šwa*, however, does not cause the following *bagadkəfat* letter to become plosive, e.g., קִזְבִּי *kizbē* < **kazabē* *lies of somebody* (from קָזַב *lie*). In this respect this *šwa* is different from the regular silent *šwa* (cf. מִדְּבָר *midbār* above) and therefore it is called medial *šwa* or *šwa medium*.

2.4.4 *Ḥatef šwa* with Gutturals

Gutturals do not take simple vocal *šwa*. Instead they take *ḥatef šwa* (also called composite *šwa*). When a guttural would have to take silent *šwa*, it is frequently replaced by *ḥatef šwa* of the same vowel quality as the preceding full vowel.

Vowel Sign	Transl.	Hebrew Name	
ְ	ă	<i>ḥatef pataḥ</i>	חֹטֵף פָּתַח
ֱ	æ	<i>ḥatef səgol</i>	חֹטֵף סֶגוֹל
ִ	ǝ	<i>ḥatef qamæṣ</i>	חֹטֵף קָמֶץ

Ḥatef šwa for vocal *šwa* is found in the following words: חֲצִי *ḥāṣī half* (cf. פָּרִי *pārī fruit*), אֶמֶת *ʾēmet truth*, עֲנִי *ʿnī misery*.

Ḥatef šwa for silent *šwa* is found in the following words: יַעֲמֹד *yaʿāmōd* < **yaʿmōd* he will stand, יֶאֱהַב *yəʿāḥab* < **yəʿḥab* he will love, יִצְמַד *yīʿmad* < **yīmad* he shall be placed.

At times, even non-gutturals may have *ḥatef šwa* instead vocal *šwa*, e.g., סֹרְרִים *sōrārīm stubborn ones* (Ps 68:7).

2.5 The dageš

The *dāgēš* (simplified *dageš*) is a point in the middle of the letter: ׀. It has two functions. The *dageš* either indicates the doubling of a consonant or the plosive pronunciation of *bəgadkəfat* letters.

2.5.1 *dageš forte*

The *dageš* in a consonant with a preceding full short vowel indicates *doubling* (or *gemination*) of the consonant, i.e., its long pronunciation, e.g., רַכָּב *rakkāb charioteer*, עַמִּים *ʿammīm nations*. When used in this way, the *dageš* is called *dageš forte* or דָּגֵשׁ חֶזֶק. A *dageš forte* in *bəgadkəfat* letters causes them to be pronounced as plosives, e.g., לִבּוֹ *libbō his heart*.

In the course of the history of Hebrew, gutturals and ׀ lost the ability to be doubled (with few exceptional cases of doubled ׀). As a result, the letters א, ה, ך, ם and ן do not take *dageš forte*. In Biblical Hebrew, the vowels preceding ה and ך that stand in a position where other consonants would be doubled, are normally preserved unchanged despite the fact that they now are in an open syllable (see Syllable Structure below). Vowels preceding א and ם are usually

Chapter 2

lengthened (/a/ > /ā/, /i/ > /ē/, /u/ > /ō/) although preservation of the short vowel may also occur. Before ך the vowels are always lengthened (/a/ > /ā/, /i/ > /ē/, /u/ > /ō/). Examples:

רחום	raḥūm	< *raḥhūm	compassionate
רעים	rā'īm	< *ra''īm	bad, evil (pl.)
חרשׁ	ḥārāš	< *ḥarrāš	craftsman

2.5.2 *dageš lene*

In *bəgadkəfat* letters, the *dageš lene* indicates the plosive pronunciation as /b/, /g/, /d/, /k/, /p/ and /t/, respectively. These letters are pronounced as plosives and are therefore marked with a *dageš lene* when they are

1. At the beginning of a sentence, e.g., כָּרַם הָיָה לְיָדֵי, My friend had a vineyard (Isa 5:1b)
2. At the beginning of a word following a word ending with a consonant, e.g., בָּנִים נִדְּלִיתִי, I raised sons (Isa 1:2a)
3. In the middle of a word immediately after a consonant, e.g., מִדְּבָר, midbār desert, מִשְׁכָּב, miškāb place of lying, מִשְׁפָּט, mišpāt judgment

A *dageš* in a *bəgadkəfat* letter can be either be a *dageš forte* or a *dageš lene*. If a full short vowel precedes the *bəgadkəfat* letter, it is a *dageš forte*. In all other cases it is a *dageš lene*. The Hebrew term for *dageš lene* is דָּגֵשׁ קָל.

2.6 *Mappiq*

If the ך at the end of a word is not a vowel letter but indicates a consonant, it is marked by a point in the middle of the ך called *mappiq* (simplified *mappiq*). Examples: שְׁמָהּ שְׁמָהּ, šəmāh her name, מַלְכָּהּ מַלְכָּהּ, malkāh her king (as opposed to מַלְכָּהּ מַלְכָּהּ, malkā queen with the feminine ending -ā), אֱלֹהִים, 'ēlōah God (with *furtive pataḥ*).

2.7 *Furtive pataḥ*

Words ending with the gutturals ה, ח and ע preceded by a long vowel other than /ā/ require the insertion of a short vowel /a/ before the guttural. This /a/ is called *furtive pataḥ*. It is placed under the guttural but pronounced before it. The *furtive pataḥ* is not stressed. Examples: מָשִׁיחַ, māšīaḥ anointed one, רֵעַ, rēa' friend, גָּבֹהַּ, gābōah high, tall, רוּחַ, rūaḥ wind, spirit.

2.8 Meteg

The *méteg* is a short vertical stroke to the left of the vowel sign. It indicates that the pronunciation of the syllable should not be hasty (*meteg* means *bridle*). It often marks the secondary stress of a word or expression. In some cases, it helps distinguish forms that look identical but are to be pronounced differently and have a different meaning. In biblical manuscripts the *meteg* is not used consistently. Examples: וַיִּירָאוּ *wayyirə'ū* and *they were afraid* (1 Sam 7:7; often the form is spelled plene וַיִּירָאוּ) as opposed to וַיִּירֶאוּ *wayyir'ū* and *they saw* (never with *meteg*).

2.9 Maqqef

The *maqqēf* line (simplified *maqqef*) or *linea maqqef* connects two or more words so that they form a stress unit with only one main stressed syllable in the last word of the unit, e.g., בֵּית־אֱבִיךָ (Gen 24:23). In many cases the last vowel of the word before the *maqqēf* line is changed, e.g., כָּתֹב *kətoḥ* write (impv.) and כָּתֹב־לְךָ *kətoḥ ləkā* write (impv.) (לְךָ is < difficult to translate into English; Exod 34:27).

2.10 Syllable Structure

Biblical Hebrew has a relatively simple syllable structure. Most syllables are either open syllables that end in a vowel (or vocal *šwa* or *hatef šwa*) (CV) or closed syllables that end in a consonant (CVC). Doubly closed syllables ending in two consonants (a so-called consonant cluster) (CVCC) are infrequent; they only occur at the end of words. The following table gives an overview of possible syllable structures:

Open syllable	CV
Closed syllable	CVC
Doubly closed syllable	CVCC

For a proper understanding of syllable structure, the following notes are important:

1. Every syllable must begin with a consonant.

2. Open syllables (CV) include syllables with vocal *šwa* or *ḥatef šwa* for historical reasons. The vocal *šwa* or *ḥatef šwa* are the result of the reduction of short vowels.
3. In unstressed closed syllables only short vowels are possible.
4. In unstressed open syllables short vowels are not possible, only long vowels or reduced vowels are possible. An exception to this rule are cases of the loss of gemination in gutturals with preservation of the short vowel, e.g., **רחום** *raḥūm* < **raḥḥūm* *compassionate*.
5. Syllables with the structure CVCC only occur at the end of words and almost exclusively as the final syllable of verbal forms.
6. Exceptions to these syllabification rules are the words for *two* **שְׁנַיִם** *šnayim* (masc.) and **שְׁנַיִם** *štayim* (fem.) with two initial consonants.

2.11 Segolate Nouns

Biblical Hebrew words are usually stressed on the final syllable. A relatively high number of words, however, are stressed on the penultimate syllable. To this group belong a number of verbal forms and the so-called segolate nouns. As they are relatively frequent it is important to know the patterns of segolate nouns so that their correct pronunciation is ensured.

Originally, Hebrew had only three short vowels (/a/, /i/, /u/) and three long vowels (/ā/, /ī/, /ū/). The three originally short vowels /a/, /i/ and /u/ were subject to change over time. Segolate nouns give evidence to this.

Segolate nouns are originally monosyllabic nouns with a CVCC syllable structure. After the loss of the final short vowel indicating case (e.g., **malku* > **malk*) in an early phase of Hebrew, the resulting final consonant cluster -CC was broken up by insertion of a helping vowel (also called epenthetic or anaptyctic vowel). In most cases the helping vowel is *segol* (therefore the term *segolate nouns*). Three basic patterns (**qat̪l*, **qit̪l*, **quṭl*) can be distinguished.

<i>*qat̪l</i>	מֶלֶךְ	<i>king</i>
<i>*qit̪l</i>	סֵפֶר	<i>book</i>
<i>*quṭl</i>	קֹדֶשׁ	<i>holiness</i>

If the second or/and the third root consonants are gutturals or semi-vowels, segolate nouns have different vowel patterns than the basic patterns. Except for roots with the semivowel *y* in third position the stress is on the original vowel and thus on the penultimate syllable.

<i>*qaṭl</i>	מֶלֶךְ <i>king</i>
II gutt.	נֶעַר <i>boy</i>
III gutt.	זֶרַע <i>seed</i>
II w	מָוֶת <i>death</i>
III w	שָׁחוּ <i>swimming</i>
II y	זֵית <i>olive</i>
III y	גִּדִּי <i>kid</i>
<i>*qiṭl</i>	סֵפֶר <i>book</i>
II gutt.	נֶצַח <i>everlastingness</i>
III y	פְּרִי <i>fruit</i>
<i>*quṭl</i>	קֹדֶשׁ <i>holiness</i>
II gutt.	פֶּעַל <i>deed, work</i>
III gutt.	רֶמַח <i>spear</i>
III w	תְּהוֹ <i>wilderness</i>
III y	חֲלִי <i>sickness</i>

It is important to be familiar with these patterns. When one encounters them in the biblical text with different consonants, one should be able to recognize the pattern as a segolate formation.

Notes

In segolate nouns of the *qaṭl* type the original vowel /a/ has been assimilated to the anaptyctic vowel /æ/, e.g., דֹּלֶת *door*. In roots with a guttural the helping vowel is usually /a/ because of the preference of gutturals for /a/.

Some nouns in the II gutt. category have the helping vowel /æ/ instead of /a/, e.g., לֶחֶם *bread*, רֶחֶם *womb*, אֶהָל *tent*, בֶּהֶן *thumb*.

The first vowel of pausal forms of *qaṭl* segolate nouns is usually changed to /ā/, e.g., דֶּרֶךְ *way* (context form דֶּרֶךְ; but מֶלֶךְ *king*).

In segolate nouns with the semivowels /y/ or /w/ as third root consonant, contraction of the helping vowel and the semivowel happens, e.g., *śaḥw > śāḥū שָׁחוּ. When the semivowel is /y/, the stress is on the contracted vowel,

e.g., **piry* > *pəri* פָּרִי. In pausal forms (→ 2.12), stress is on the syllable where the vowel originally was, e.g., חָלִי, פָּרִי.

In some nouns the vowel may shift from the position following the first root consonant to the position between the second and third radical, e.g., דְּבַשׁ *honey*, שֵׁכֶם *shoulder*, בְּאֵר *well*.

Segolate endings also appear in polysyllabic nouns, dual endings of nouns, and verbal forms with an original final syllable with the structure CVCC, e.g., תְּכַלֶּת *purple wool*, נְחֹשֶׁת *bronze*, יָדַיִם *hands* (dual), בָּנָה *he built*, וַיִּשְׁתָּחוּ *he prostrated*, יְהִי *may it be* (< **yihy*).

Proper nouns can be segolate nouns or contain a segolate ending, e.g., יָרֵד *Jared*, קַיִן *Cain*, אֵלִיָּהוּ *Elijah*.

2.12 Pausal Forms

When the reader or speaker is supposed to slow down at the end of a sentence and pause briefly before continuing with the next sentence, the form of the word may slightly change at times. The meaning of the form is not affected by this. This happens frequently at the end of a verse or the middle of verse, but it may happen also in other places in a verse. These forms are called *pausal forms* as opposed to the more frequent *context forms*. The following changes may be observed:

- Lengthening of the stressed vowel, e.g., pausal form אֶרֶץ vs. the context form אֶרֶץ *to the ground*
- Change of vowel quality, e.g., pausal form אֶרֶץ vs. the context form אֶרֶץ *land*
- Stress moves to a different syllable, e.g., pausal form אֲנִכִּי vs. the context form אֲנִכִּי *I*
- Restoration of a reduced vowel which takes the stress, e.g., pausal form וַיֵּשְׁבוּ vs. the context form וַיֵּשְׁבוּ *and they sat down, settled*

In this grammar, both context forms and pausal forms are included in the explanation of forms. In the grammatical explanations, pausal forms are indicated by the accent *atnah* אַ, e.g., אֲנִכִּי. In quotations from the Hebrew Bible, the original accent is used.

2.13.1 Proper Nouns with Vowel Pointing

Names of People

- Read the following proper nouns of people and give the English translation if possible (cf. the Alphabetical List of Proper Nouns).
- Identify the syllable structure of the names 1–20.

These proper nouns occur frequently in the Hebrew Bible (more than fifty times; except the last five names from Genesis שָׂרִי, שָׂרָה, רָחֵל, לֵאָה, and רַב־קָה). They will not be referenced again in later chapters.

1 יִשְׂרָאֵל 2 דָּוִד 3 יְהוֹנָדָה 4 מֹשֶׁה 5 שָׂאוּל 6 לֵוִי 7 יַעֲקֹב 8 אֶהְרֹן
9 שְׁלֹמֹה 10 יְהוֹשֻׁעַ 11 יוֹסֵף 12 אַפְרַיִם 13 אַבְרָהָם 14 בְּנִימִין
15 מְנַשֶּׁה 16 יוֹאָב 17 שְׁמוּאֵל 18 יִרְמְיָהוּ 19 אַבְשָׁלוֹם 20 יִצְחָק
21 יְרֵבְעָם¹ 22 עִשָּׂו 23 אַחָאב 24 יְהוֹשָׁפָט 25 יְהוֹנָתָן 26 חִזְקְיָהוּ
27 רְאוּבֵן 28 נָדָב 29 אֶלְעָזָר 30 דָּן 31 אַבְימֶלֶךְ 32 אֶלְיָהוּ 33 אַבְנֵר
34 בִּלְעָם 35 אַבְרָם 36 אֱלִישָׁע 37 יְהוּא 38 אָסָא 39 אִיזַבְדָּבָר 40 צִדְקְיָהוּ
41 אֶסְתֵּר 42 יֵאֲשִׁיָּהוּ 43 שָׂרִי 44 שָׂרָה 45 רַב־קָה 46 לֵאָה 47 רָחֵל

Geographical Terms

Read the following geographical terms and give the English translation if possible (cf. the Alphabetical List of Proper Nouns).

These geographical terms occur frequently in the Hebrew Bible (more than fifty times). They will not be referenced again in later chapters.

1 בָּבֶל 2 יֶרֶד 3 מוֹאָב 4 צִיּוֹן 5 אַשּׁוּר 6 שְׁמֶרֶן 7 אֲרָם 8 עַמּוֹן
9 גִּלְעָד 10 אֲדָוִם 11 כְּנָעַן 12 שָׁכֶם 13 בֵּית-אֵל 14 לָבָנוֹן 15 חֶבְרוֹן

כְּ	<i>like, as, according to</i>

3.1.3 Nouns

אָב	<i>father</i>
אִישׁ	<i>man</i>
אֱלֹהִים	<i>God, god, gods</i>

Chapter 3

אֱלֹהִים	god, God (sg. of אֱלֹהִים; much less frequent)
אֶרֶץ	earth, land, ground (fem.) (pl. אֶרֶצִּים; with the article הָאֶרֶץ, pausal form אֶרֶץ)
בֵּן	son
בָּקָר	cattle, herd (coll.)
דָּבָר	word, matter, thing
דָּם	blood
זָהָב	gold
חֶרֶב	sword (fem., pl. חֶרֶבוֹת)
יָד	hand (fem.; dual יָדַי hands, pl. יָדוֹת only with figurative meanings)
יוֹם	day (הַיּוֹם as an adverb today)
יֶלֶד	boy
כֶּסֶף	silver
מִזְבֵּחַ	altar (masc., pl. מִזְבְּחוֹת)
מֶלֶךְ	king
מִצְרַיִם	Egypt
מָקוֹם	place (masc., pl. מְקוֹמוֹת)
מִשְׁתֶּה	feast, banquet
עֶבֶד	slave, servant
עַיִן	eye, spring (fem.)
עִיר	city, town (fem.)
עַם	people, nation (also עַמִּים)
פַּרְעֹה	Pharaoh
צֹאן	small cattle, sheep and goats, flock, flocks (coll., fem.)
שָׂדֶה	field (masc., pl. שָׂדוֹת)

3.1.4 Other Parts of Speech

את	object marker indicating the direct object
זֶה, זֹאת	<i>this</i> (masc., fem.)
אֵלֶּה	<i>these</i> (com.)
הִנֵּה	<i>look, behold</i>
יוֹמָם	<i>by day</i> (adv.)
כֵּן	<i>so, thus</i> (Modern Hebrew: <i>yes</i>)
שָׁם	<i>there</i> (adv.)

3.2 Frequent Verbal Forms

Verbs are the most important part of speech in Biblical Hebrew. Among the verbal forms, weak forms are very frequent, i.e., verbal forms that have only two root consonants or sometimes only one instead of the three root consonants of the strong verb. In order to make it easier to become familiar with verbal forms, the most frequent verbal forms are introduced as vocabulary in chapters 3 and 4.

The first set of ten forms of five verbs is in the section Vocabulary above; the second set is in the vocabulary of chapter 4. At this stage, it is sufficient to memorize the forms and their meanings without understanding how the forms are actually formed.

The twenty verbal forms in the vocabulary of chapters 3 and 4 are about 10 % of all verbal forms in the Hebrew Bible. All forms of these ten verbs make up about 30 % of the total number of verbal forms in the Hebrew Bible. These numbers make it clear that it is essential to be familiar with these twenty verbal forms in particular and the ten verbs in general. Only two of the ten verbs are strong verbs, i.e., verbs that have three root consonants in *all* their forms.

The most frequent forms that are introduced in chapters 3 and 4, are the 3 masc. sg. suffix conjugation (SC) form and the 3 masc. sg. *waw*-prefix conjugation (*waw*-PC) or *wayyiqtol* form. The SC usually has past tense meaning (simple past, present perfect or past perfect depending on the context). The *waw*-PC serves as simple past (preterite). Chains of *waw*-PC forms are the backbone of narratives in the Hebrew Bible. *waw*-PC forms are always placed in first position in the clause. The other forms of the SC and PC will be introduced in later chapters.

3.3 The Verbal Clause

A clause with a finite verbal form (i.e., a form that is marked for person, 1st *I*, *we*, 2nd *you*, or 3rd person *he*, *she*, *it*, *they*) as predicate is called *verbal clause*. Most clauses in biblical literature are verbal clauses. The other type of clause is the verbless or nominal clause.

With a finite verb as predicate there is no need for an explicit (overt) subject because the subject is contained in the verbal form, e.g., **וַיֵּרָא** *and he saw*. With an overt subject the verbal form is to be rendered only as a verbal form, e.g., **וַיֵּרָא יַעֲקֹב** *and Jacob saw*.

If a clause includes an overt subject, the subject and the verbal predicate agree with each other in number, gender and – in the case of 1st or 2nd person verbal forms – in person. This means, for example, that a common noun as subject that is masculine and singular, is combined with a masc. sg. verbal form (in the 3rd person). There are, however, exceptions to this rule (→ 5.6).

The most common constituent order is verb-subject-object (VSO). As a consequence, the function of a constituent is often indicated by its position in the clause. Subjects normally precede direct objects, indirect objects or prepositional objects. Indirect objects usually follow direct objects. Adverbial phrases tend to be put at the end of the clause although temporal adverbial expressions are often placed up front. The length of constituents also plays a role. Short constituents, e.g., pronouns or short adverbs, have the tendency to be placed earlier in the clause. In most cases, the meaning of the verb and context help in identifying the function of clause constituents.

Any constituent maybe be fronted, that is, placed before the verb. The result is marked constituent order. There is usually a specific reason for employing marked constituent order. Usually, it is the activation or reactivation of a topic (also for contrast) or putting a constituent in focus, that is, highlighting it as the most salient constituent of the clause.

3.4 The Definite Article

Different from English but similar to Greek, Biblical Hebrew only has a definite article. Its use is similar to the use of the definite article *the* in English but there are quite many differences in the use of the definite article between the two languages. Most frequently, the definite article is used when an entity can be identified by both the speaker and the addressee in the context of the communication.

The Hebrew definite article is directly prefixed to the noun. Its basic form is

הַ, i.e., *ha-* followed by *dageš forte* in the first consonant of the noun. This is illustrated by the following examples:

מֶלֶךְ	king	הַמֶּלֶךְ	the king
יָד	hand	הַיָּד	the hand
מִזְבֵּחַ	altar	הַמִּזְבֵּחַ	the altar

If the noun begins with *yə-* or *mə-*, the *dageš forte* of the article is usually lost, e.g., הַיְּהוּדִים *the Judeans*, הַמְּרַגְלִים *the spies*.

As the consonants א, ה, ח, ע and ר are not geminated there is no *dageš* in the first consonant of the noun if it begins with a guttural or /r/. The following rules apply with in regard to the vowel of the article:

1. If the noun begins with ה or ח, the *pataḥ* of the article is preserved in the open syllable, e.g., הַהֵיכָל *the temple*, הַחֶרֶב *the sword*. Frequent exceptions to this rule are the noun הַר *mountain*, which is הָהָר with the article, and the independent personal pronoun 3 m./f. pl. with the article as demonstrative pronoun הֵהֶם, הֵהֶמָּה (masc.), הֵהֶנָּה [fem.] (in the singular, however, the *pataḥ* of the article is preserved: הֵהוּא [masc.] and הֵהיא [fem.], see below).
2. If the noun begins with א, ע or ר, the *pataḥ* of the article is changed to *qameṣ*, e.g., הָאֵשׁ *the fire*, הָעִיר *the city*, הָרֹאשׁ *the head*. This change is sometimes not found with ע, e.g., הָעִוְרִים *the blind* (2 Sam 5:6).
3. If the noun begins with ה or ע followed by unstressed *qameṣ*, the *pataḥ* of the article is changed to *segol*, e.g., הַהָרִים *the mountains*, הָעָרִים *the cities*.
4. Likewise, if the noun begins with ח followed by stressed or unstressed *qameṣ gadol* or *ḥatef qameṣ*, the *pataḥ* of the article is changed to *segol*, e.g., הַחֹכָם *the wise one*, הַחֵג *the feast*, הַיָּדָרִשִׁים *the new moons* (i.e., the festivals held at new moon).

Some nouns change their vowels to the vowel of the pausal form of the noun when they are used with the article, e.g., הָאָרֶץ *the land, the earth* (context form אֶרֶץ *land, earth*), הָהָר *the mountain* (context form הַר *mountain*). In a similar way, the noun אָרוֹן *ark, chest* with the article is הָאָרוֹן *the ark*.

Common nouns may be used with the article to indicate the vocative function, e.g., הַמֶּלֶךְ הַזֶּה הוֹשָׁעָה וְהִתְאַמֵּר *And she said, "Help, O king!"* (2 Sam 14:4); בֶּן־מִי אַתָּה הַנֶּעַר *Whose son are you, young man?* (1 Sam 17:58).

As Hebrew does not have an indefinite article, an expression like *a great nation* in English is simply גוֹי גָּדוֹל in Hebrew, i.e., only the noun גוֹי with the attributive adjective גָּדוֹל.

3.5 Demonstrative Pronouns

Unlike English with *this*, *these* and *that*, *those* or Greek with οὗτος etc. *this* and ἐκεῖνος etc. *that*, Biblical Hebrew has only one set of demonstrative pronouns. In the singular there are distinct forms for masc. and fem. while in the plural there is only one form with common gender. The function of the demonstrative pronouns as deictic elements is to point to specific entities in the communicative situation or the immediate context.

sg.	masc.	זֶה	<i>this</i>
	fem.	זֹאת	
pl.	com.	אֵלֶּה	<i>these</i>

Note

The **ס** in the fem. sg. form זֹאת *zō(ʔ)t* is silent.

Demonstrative pronouns can either be used independently as subject or direct object replacing a noun or they can be used as attributes depending on nouns. When they are used as attributes, they follow the noun and both the noun and the demonstrative pronoun have the definite article.¹ The demonstrative pronoun agrees with the noun it modifies in number and – in the singular – in gender. As the plural form is common gender it can be used with both masc. and fem. nouns.

הָאִישׁ הַזֶּה	<i>this man</i> (masc.)
הָאִשָּׁה הַזֹּאת	<i>this woman</i> (fem.)
הַדְּבָרִים הָאֵלֶּה	<i>these words</i> (masc.)
הַבְּרָכוֹת הָאֵלֶּה	<i>these blessings</i> (fem.)

The demonstrative pronoun זֶה can be used as adverb with local or temporal deictic function with the meanings *here*, *there* or *now*.

Rare forms of the demonstrative pronoun are זֹה *this* (fem.), הַזֶּה *this* (masc.) and הַזֶּה *this* (com.).

For far deixis (pointing to something at a distance, e.g., Engl. *that* or Greek ἐκεῖνος, Biblical Hebrew uses the 3rd person personal pronoun following the

¹ The demonstrative pronoun does not get the article when the antecedent is definite by means of an enclitic personal pronoun (→ 8.2), e.g., זֶה הַדְּבָרִי *this word of ours* (Josh 2:20).

modified noun. Both the noun and the personal pronoun have the article. The personal pronoun agrees with the noun in number and gender.

הָאִישׁ הַהוּא	<i>that man</i> (masc.)
הָאִשָּׁה הַהִיא	<i>that woman</i> (fem.)
הָאֲנָשִׁים הַהֵם	<i>those men</i> (masc.)

3.6 The Prepositions לְ, בְּ and כִּי

Prepositions are a small set of expressions that are frequently used and very important. Their function is to denote the relations between elements in the outside world that speech refers to, or between elements of a clause. In this section, the three prepositions לְ, בְּ and כִּי are introduced. They are extremely frequent with about 20,275, 15,570 and 2,895 occurrences in the Hebrew Bible, respectively.

Formally, these three prepositions are characterized by the fact that they are not separate words but are attached directly to the following word. Therefore, they are called *proclitic* prepositions (as opposed to the other prepositions which are separate words).

The prepositions לְ, בְּ and כִּי have a number of different meanings and functions that cannot be exhaustively explained here. The standard lexica contain more detailed information. In this context a short overview of meanings must be sufficient.

לְ	<i>to, for, in regard to</i> , also indicating indirect objects
בְּ	<i>in, at, with</i> (local and temporal)
כִּי	<i>like, as, according to</i>

When prefixed to a word beginning with a syllable with a full vowel (except the definite article) the prepositions לְ, בְּ and כִּי appear in the forms as in the overview above, e.g., לַמֶּלֶךְ, בַּמֶּלֶךְ and כִּי־הָמֶלֶךְ.

The prepositions לְ, בְּ and כִּי have deviating forms in the following circumstances:

1. If the prepositions לְ, בְּ and כִּי are prefixed to a noun with the article, the /h/ of the article is lost but the vowel of the article is preserved, e.g., לַמֶּלֶךְ *to the king*, לָעָם *for the people*, בְּהָרִים *in the mountains*. Sometimes, the /h/ of the definite article may be preserved, e.g., כִּי־הָחֲכָמִים *like the wise* (Qoh 8:1).

2. If prefixed to a word beginning with a consonant with vocal *šwa* (except words beginning with *יַ* *yə-*), the three prepositions have the full vowel /i/ and the vocal *šwa* becomes a medial *šwa*, *לְבְרִית עוֹלָם* *for an everlasting covenant* (לְ with the noun *בְרִית*).
3. If prefixed to a word beginning with *hatef šwa*, the three prepositions take the full vowel that corresponds to the *hatef šwa* and the *hatef šwa* itself remains unchanged, e.g., *לְחֹמְרוֹ* *to his donkey*, *בְּאֵמֶת* *in faithfulness*, *לְחֹלִי* *lḥālī sickness*.
4. If prefixed to a word beginning with *יַ* *yə-*, the preposition is followed by a long vowel /ī/ which is the result of the contraction of the short vowel /i/ and the following semivowel (**bəyə- > *biy- > bī-*), e.g., *בִּיהוּדָה* *in Judah* (basic form *יְהוּדָה*).
5. Before words that are stressed on the first syllable the prepositions sometimes have the vowel *qameṣ*, e.g., *לְרַב* *abundantly*, *בְּזֶה* *here*, *כְּאֵלֶּה* *like them*.
6. If the three preposition are to be prefixed to the noun *אֱלֹהִים* *God* or to a form of the noun *אֲדֹנָי* *lord* other than the citation form, the *א* of these nouns becomes silent although it is retained in writing, and the following *hatef šwa* is changed to a full vowel, e.g., *לְאֱלֹהִים* *lē(ʿ)lōhīm to God* and *לְאֲדֹנָי* *la(ʿ)dōnāi to my lord* (לְ + אֲדֹנָי).

3.7 The Conjunction וְ

The function of the conjunction וְ is to connect words, phrases and clauses. Its most frequent meaning is *and* although in many cases a different rendering like *but* or *or* is more appropriate in English. It is also called a coordinating conjunction.

The most common form of the conjunction is וְ *wə-* which is directly prefixed to the following word, e.g., *וְאַבְרָהָם* *and Abraham*.

The conjunction וְ has deviating forms in the following circumstances:

1. If the following word begins with a consonant with vocal *šwa*, the conjunction is וְ *ū*, e.g., *וְדִבְרֵי-הַמֶּלֶךְ* *and the word of the king* (This is an exception to the rule that every word must begin with a consonant.)
2. If the following word begins with a labial consonant, i.e., *ב*, *מ*, and *פ*, the conjunction is וְ *ū*, e.g., *וּמֹשֶׁה* *and Moses*. (This is another exception to the rule that every word must begin with a consonant.)
3. If the conjunction connects two words and the second one is stressed on the first syllable, especially in the case of common word pairs, the form

of the conjunction is ׀ *wā-*, e.g., לֶחֶם וּמַיִם *bread and water* (despite the labial /m/; 2 Kgs 6:22), קָר וְחֹם וְקִיץ וְחֹרֶף וַיּוֹם וַלַּיְלָה *cold and heat, and summer and winter, and day and night* (Gen 8:22 with three word pairs).

4. With words beginning with a consonant with vocal *šwa* or *hatef šwa*, the vowel of the conjunction ׀ resembles the vowels of the proclitic prepositions לְ, בְּ and כְּ.

- a) Conjunction ׀ + word beginning with *hatef šwa*: וְחֲמֹרִים *and donkeys*, וְאֵמֶת *and truth*, וְחָלִי *and sickness*
- b) Conjunction ׀ + word beginning with ׀ *yə-*: וַיְהוּדָה *and Judah*
- c) Conjunction ׀ + the noun אֲלֹהִים or a form of the noun אֲדֹנָי *lord* other than the citation form: וְאֱלֹהִים *wē(?)lōhīm and God*, וְאֲדֹנִי *wa(?)dōnī and my lord*, both with silent א.

5. In the case of *waw-PC* form (or *wayyiqṭol* form) the form of the conjunction is ׀ (wa- with following *dageš forte*).

The /h/ of the article is preserved after the conjunction ׀, e.g., וְהָאָרֶץ *and the earth*.

3.8 Differential Object Marking

Differential object marking means that only a more or less well defined part of direct objects is explicitly marked as such while the rest of the direct objects is not.

3.8.1 The Use of the Object Marker אֵת

In Biblical Hebrew only definite direct objects are marked with the object marker אֵת (with *maqṣef* אֵת). This word does not have a meaning and, therefore, does not have a translation equivalent. It only has the function of marking the direct object of a clause.

Not all definite direct objects, however, are marked. Proper nouns as direct objects have the highest percentage of marked elements in prose texts (97 %) whereas only 73 % of definite common nouns as direct objects are marked. It should, therefore, not be surprising to find relatively many definite direct objects that are not marked with אֵת. The following nouns are definite:

- 1. Proper nouns, e.g., הַכֹּרֶן, יִצְחָק
- 2. Nouns with the definite article, e.g., הַמֶּלֶךְ *the king*

Chapter 3

3. Nouns with enclitic personal pronouns, e.g., בֵּיתִי *my house* (→ 8.2)
4. Nouns with a definite dependent noun in a construct chain, e.g., בֵּית הַמֶּלֶךְ *the house of the king* (→ 4.6)

The use of the object marker אֶת is illustrated in the exercises.

In the Hebrew Bible, there are only very few indefinite direct objects that are marked with אֶת.

Sometimes, the object marker אֶת is used with nouns as adverbial expressions of time and place.

3.8.2 Ellipsis of Direct Objects

Direct objects do not need to be included in the clause if they can be easily retrieved from the immediate context. As a consequence, Biblical Hebrew does not need to have a direct object where English has a personal pronoun as direct object.

וַיִּקַּח אַבְרָהָם צֹאן וּבָקָר *And Abraham took sheep and oxen and gave*
וַיִּתֵּן לְאַבְיִמֶלֶךְ *[them] to Abimelech. (Gen 21:27a)*

Gen 21:27a consists of two clauses. In the first one, the verbal form וַיִּקַּח has the direct object צֹאן וּבָקָר (two coordinated indefinite nouns). In the second clause with the verbal form וַיִּתֵּן there is only the indirect object לְאַבְיִמֶלֶךְ and no direct object because it can be easily supplied from the immediately preceding clause.

Direct objects may also be omitted when they can be easily supplied from common knowledge.

3.9 Exercises

3.9.1 Frequent Verbal Forms

Translate the following clauses from the Hebrew Bible. In some clauses there is a fronted constituent. The fronting, however, may be ignored in these exercises. Less frequent names of persons and geographical names in these sentences: יוֹאָשׁ, יְהוֹשָׁפָט, יְהוֹרָם, יְהוֹאָחָז, נָעֹל, נָדָב, בְּנֵי־יִשְׂרָאֵל, בָּלָק, בַּלְעָם, אֲחִיזָבָד, אֲבִימֶלֶךְ, שְׁמֹשׁוֹן.

4.1 Vocabulary

4.1.1 Verbs

אָמַר	<i>he said</i>
וַיֹּאמֶר	<i>and he said</i> (pausal form וַיֹּאמֶר)
דִּבֶּר	<i>he spoke, he said</i> (pausal form דִּבֶּר)
וַיְדַבֵּר	<i>and he spoke, and he said</i>
הָלַךְ	<i>he went</i>
וַיֵּלֶךְ	<i>and he went</i> (pausal form וַיֵּלֶךְ)
בָּא	<i>he came, he went inside</i> (bā(ʿ) with silent א)
וַיָּבֹא	<i>and he came, and he went inside</i> (wayyābō(ʿ) with silent א)
הָיָה	<i>he was, he became</i>
וַיְהִי	<i>and he was, and he became</i>

4.1.2 Nouns

אִשָּׁה	<i>woman</i>
בֹּקֶר	<i>morning</i>
גִּבּוֹר	<i>hero</i> (as substantive), <i>strong, mighty</i> (adj.)
דֶּרֶךְ	<i>way, road; distance, journey</i> (sg. mostly fem., pl. masc.)
הָר	<i>mountain, hill, hill-country</i>
חֵיל	<i>strength, wealth, army</i>
חֶלֶם	<i>dream</i> (masc.; pl. חֲלֵמוֹת)
לַיְלָה	<i>night</i>
מִגְדָּל	<i>tower</i>
מִדְבָּר	<i>wilderness, desert</i>
מַחֲנֶה	<i>camp</i>

Chapter 4

עֹז	<i>might, strength</i>
עָנָן	<i>cloud, cloud-mass</i>
עֶרֶב	<i>evening</i>
רָעָב	<i>famine, hunger</i>
שְׁלוֹם	<i>welfare, peace, completeness</i>
שֵׁם	<i>name (masc., pl. שְׁמוֹת)</i>
שֶׁמֶשׁ	<i>sun (fem.)</i>
שָׁנָה	<i>year (pl. שָׁנִים)</i>
תּוֹךְ	<i>midst (cs. st. תוֹךְ)</i>

4.1.3 Prepositions

אֶל	<i>to, towards (spatial), at, by (local), against, according to</i>
עַל	<i>on, upon, above, at, by, against, on account of, because of, about, concerning</i>
מִן	<i>from, away from, out of; in comparisons: (more) than</i>

4.1.4 Other Parts of Speech

כְּאִשֶּׁר	<i>as, according to (modal), when (temporal), because (causal) (conj.)</i>
כֹּה	<i>thus, here (adv.)</i>
כִּי	<i>for, because (causal), if (conditional), when (temporal) that, etc. (conj.)</i>
עוֹד	<i>still, yet, again, besides (adv.)</i>

4.2 The Prepositions אֶל, עַל and מִן

The prepositions אֶל and עַל are always separate words. The Preposition עַל is very often followed by *maqfef*, אֶל almost always.

The preposition מִן is a separate word before nouns with the definite article, e.g., מִן הַמִּזְבֵּחַ *from the altar*, מִן הַשָּׂדֶה *from the field*.

In other cases, מִן is put immediately in front of the following word. As a consequence, the /n/ of the preposition is immediately followed by another

consonant and therefore it is assimilated to that consonant. The following sound changes take place:

1. Assimilation of the /n/ to the first consonant of the following noun which is doubled as a consequence, e.g., **min-miṣráyim* > *mimmiṣráyim* מִמִּצְרַיִם *from Egypt*, **min-gil'ād* > *miggil'ād* מִגִּלְעָד *from Gilead*
2. If the following word begins with a guttural or /r/, the /n/ is also assimilated to the first consonant of the following word but the vowel of the preposition is changed to *šere* and the first consonant of the following word is *not* doubled, e.g., מִן־אֶפְרַיִם *mē'əp̄ráyim* < **mi''əp̄ráyim* < **min-''əp̄ráyim* *from Ephraim*, מִן־חֶבְרֹן *mēḥəbrōn* < **miḥəbrōn* < *min-ḥəbrōn* *from Hebron*, מִן־רָחוֹק *from a distance*, מִן־אֱלֹהִים *from God*. This may also happen with the direct article, e.g., מִן־הַמֶּלֶךְ *from the king*.
3. The doubling of the first consonant before vocal *šwa* is often lost, e.g. מִקְצֵה *miqṣē* < *miqqəṣē* *at the end of* (noun קֵץ *end* in the construct state קֵץ with the prep. מִן).
4. With a word beginning with *yə-* assimilation of the /n/, loss of the doubling of the /y/ and contraction of *-iy-* > *-ī-* takes place, e.g., מִיְהוּדָה *mīhūdā* < *miyyəhūdā* < *min-yəhūdā*.

4.3 Other Local Adverbial Expressions

In addition to prepositional phrases, Biblical Hebrew uses other means to express spatial and local relations (e.g., *to, towards, in* etc.)

4.3.1 The Locative He

The locative He is the ending *-ā* that is attached to a noun or adverb to indicate the goal of a motion. The locative He is *not* stressed and can be used with common nouns, proper nouns or adverbs, e.g., הַבַּיִתָּה *into the house*, הַחֶבְרֹנָה *to Hebron*, שָׁמָּה *there* (as in *They went there*).

With feminine nouns with the ending *-ā* the locative He is attached to the construct state form (see below), e.g., עֲזָה *Gaza*, with locative He עֲזָתָה *to Gaza*.

4.3.2 Noun Phrases

Bare noun phrases without preposition or the locative He can also be used as adverbial expressions indicating spatial relations (*to, towards, in, at* etc.), e.g., the place name בֵּית־אֵל *in the clause* וַיָּבֹאוּ הָעָם בֵּית־אֵל *And the people came to Bethel*.

Bare noun phrases may also be used to indicate time, e.g., הַלַּיְלָה *this night, tonight* (2 Sam 19:8), הַשָּׁנִים הָאֵלֶּה *these years, during these years* (1 Kgs 17:1). Other adverbial functions are possible, too.

4.4 Vowel Changes in Biblical Hebrew

Originally, Biblical Hebrew had the following vowels:

Short Vowels	Long Vowels
<i>i</i>	<i>ī</i>
<i>a</i>	<i>ā</i>
<i>u</i>	<i>ū</i>

These vowels were subject to change in various ways over the course of time. The following outline summarizes the main changes that are relevant for understanding the morphology of Biblical Hebrew.

1. The long vowel /ā/ changed to /ō/ in stressed syllables at a very early date (cp. Hebrew שָׁלוֹם *peace* with its cognates in Aramaic שָׁלָם and Arabic *salām*).
2. Originally long vowels are usually not subject to change. This applies also to long vowels originating from contraction of diphthongs (semivowel /y/ or /w/ + vowel), e.g., -ay > -ē or -aw > -ō.
3. Originally short vowels in closed syllables are preserved.
4. Originally short vowels in open syllables may be subject to change depending on vowel quality and position of the syllable in the word.
 - a) In propretonic syllables all short vowels in open syllables are reduced to vocal *šwa* (or *ḥatef šwa*), e.g., *šadaqā > šadāqā צְדָקָה *justice*, *ibādā > ʾibōdā עֲבָדָה *work*.
 - b) In pretonic syllables original /a/ is preserved in disyllabic words before syllables with originally short vowel or syllables with an originally long vowel, e.g., *dabar > dābār דָּבָר, *šalām > šālōm שָׁלוֹם.
 - c) Originally short /i/ is preserved as *šere* in disyllabic words if the next syllable has an originally short vowel, e.g., *libab > lēbāb לֵבָב. If it is a long vowel, originally short /i/ is reduced to *šwa*, e.g., *ḥimār > ḥāmōr חֲמֹר.

- d) Originally short /u/ in pretonic syllables is always reduced to *šwa*, e.g., **ruhāb* > *rəḥōḇ* רְחוֹב *broad open place, plaza*.
 - e) If an open syllable with an originally short vowel is stressed as in some pausal forms of verbs, these vowels are preserved, e.g., יִשְׁמְרוּ as opposed to the context form יִשְׁמְרוּ.
5. If preserved, originally short vowels have the following forms in Biblical Hebrew according to the Tiberian Masoretic tradition:
- a) The originally short vowel /a/ appears usually either as *qameš* or *pataḥ* and at times also as *segol*. If the syllable is stressed, *pataḥ* only occurs in verbal forms; in other forms /a/ becomes *qameš* /ā/.
 - b) The vowel /i/ appears either as *hireq*, *šere* or *segol*.
 - c) The vowel /u/ appears either as *holem*, *qameš ḥaṭuf* or *qibbuš*. A *holem* originating from /u/ can only change into *qameš ḥaṭuf* or *qibbuš*, e.g., כָּל *all of*, with maqqef כָּל־ *kāl all of*; דֹּב *dōḇ* < *dubb bear*, plural דְּבִים *dubbīm*.
6. Original short /a/ in an unstressed closed syllable may change to /i/ (law of attenuation), e.g., the proper noun מִרְיָם which is Μαριαμ in the LXX.
7. Original short /i/ in a closed stressed syllable may change to /a/ (Philippi's Law); e.g., **bint* > *bat* בַּת *daughter*.

Notes

The law of attenuation and Philippi's law are not laws in the strict sense as there are exceptions to them (cf. JM § 29aa). They rather reflect a strong tendency to these vowel changes in defined circumstances.

4.5 Inflection of Nouns

Inflection of nouns happens in the following cases:

1. change of number from singular to plural or dual
2. in constructions called construct chains in which two (or more) nouns are joined to express the possessive relation and other relations as in בֵּית הַמֶּלֶךְ *the house of the king*
3. the attachment of enclitic personal pronouns (ePP) (also called pronominal suffixes in other grammars) as in בֵּיתוֹ *his house*

4.5.1 Gender and Number

Biblical Hebrew has two categories of gender, masculine (masc. or m.) and feminine (fem. or f.) and three categories of number, the singular (sg.), the plural (pl.) and for some nouns and uses, the dual (du.).

Masc. nouns in the singular are always without an ending whereas fem. nouns are often marked as fem. by the endings *-ā* or *-t*. A number of fem. nouns, though, are not marked as fem. by means of a fem. ending. An example of a marked fem. noun is אִשָּׁה *woman* with the fem. ending; an example of unmarked fem. noun is אִמָּה *mother* without the fem. ending.

In Biblical Hebrew the plural is used with most nouns if two or more entities are meant. The dual is mainly used with nouns referring to measures of time and space, body parts that come in pairs and certain objects consisting of two main parts.

singular		dual	
יָד	<i>hand</i>	יָדַיִם	<i>hands</i>
יוֹם	<i>day</i>	יוֹמַיִם	<i>two days</i>
—		מֵאֲזַנַּיִם	<i>scales</i>

When used for body parts, the dual replaces the plural; it is used even when more than two items are meant.

4.5.2 Absolute State and Construct State

For expressing the possessive relationship as in the noun phrase *the house of the king* Biblical Hebrew uses a construction called construct chain in which two or more nouns are joined to form a noun phrase. The following two examples illustrate this.

קוֹל יַעֲקֹב	<i>Jacob's voice</i> (Gen 27:22)
בֵּית הַמֶּלֶךְ	<i>the house of the king</i> (2 Sam 11:2)

In noun phrases like these, the first noun is in the construct state (cs. st.) and the second noun is in the absolute state (abs. st.). The first noun is the governing noun (in Latin *nomen regens*) and the second noun is the dependent noun (in Latin *nomen rectum*).

Construct chains form a stress unit. As the first element loses its main stress there is only one syllable in a construct chain carrying the main stress. This

may result in vowel changes in the noun in the construct state. In the example *בֵּית הַמֶּלֶךְ* *the house of the king* above, *בֵּית* is the cs. st. form of the noun in the abs. st. *בֵּית*.

The lexical form (or citation form) of nouns is the form of the absolute state.

Details of the use of the construct state are presented after the explanation of the vowel changes that come with the inflection of nouns.

4.5.3 Nominal Endings

The following nominal endings are found in Biblical Hebrew. They are attached to the adjective *טוֹב* *good* because the vowel of the adjective is unchangeable and it is attested in all forms mentioned. The endings of the dual forms of nouns with the fem. ending *-ā* are illustrated with the noun *שֵׁפָה* *lip, edge* which has changeable vowels. The noun *מֵאֲזֵנִים* *scale, balance* is always used in the dual (because of the two plates or bowls).

		masculine	feminine
sg.	abs. st.	∅ טוֹב	<i>-ā</i> שֵׁפָה
	cs. st.	∅ טוֹב	<i>-at</i> שֵׁפֶת
pl.	abs. st.	<i>-īm</i> טוֹבִים	<i>-ōt</i> שֵׁפּוֹת
	cs. st.	<i>-ē</i> טוֹבֵי	<i>-ōt</i> שֵׁפּוֹת
dual	abs. st.	<i>-āyīm</i> מֵאֲזֵנִים	<i>-ātāyīm</i> שֵׁפְתַיִם
	cs. st.	<i>-ē</i> מֵאֲזֵנֵי	<i>-tē</i> שֵׁפְתֵי

Normally, masc. nouns have the plural ending *-īm*, e.g., *דָּבָר* *word*, pl. *דְּבָרִים*, and fem. nouns have the plural ending *-ōt*, e.g., *בְּרָכָה* *blessing*, pl. *בְּרָכוֹת*. There are, however, masc. nouns with the plural ending *-ōt*, e.g., *מָקוֹם* *place*, pl. *מְקוֹמוֹת*, and some fem. nouns with the plural ending *-īm*, e.g., *שָׁנָה* *year*, pl. *שָׁנִים*.

Endings distinguish construct state forms from absolute state forms only in nouns with the feminine singular ending *-ā*, plural nouns with the ending *-īm* and masculine and feminine dual nouns. Masculine singular nouns, feminine nouns without ending like *אֶרֶץ*, and plural nouns with the ending *-ōt* are not distinguished by their endings from their counterparts in the absolute state.

Beside the distinct endings in some nouns in construct state, construct chains are recognizable by the presence of a dependent noun and the vowel changes in many nouns in construct state as compared to their form in the absolute state.

4.5.4 Vowel Changes

When nouns are used in the plural or dual or in the construct state, vowel changes may happen. With the addition of endings the position of the stress moves. Nouns in a construct chain form a stress unit with the main stress on the stressed syllable of the last noun in the construct chain. As a result vowels in unstressed open syllables of the noun in construct state are subject to change unless they are originally long. The following explanations focus on nouns with changeable vowels.

Monosyllabic nouns in the singular

	abs. st.	cs. st.
sg.	דָּם	דֶּם <i>blood of</i>
	עֵץ	עֵץ <i>tree of</i>
pl.	דָּמִים	דְּמִי
	עֲצִים	עֲצִי

Disyllabic nouns

Masculine nouns have the following forms:

	abs. st.	cs. st.
sg.	דָּבָר	דְּבַר
	זָקֵן	זִקֵּן
	לֵבָב	לִבֵּב
pl.	דְּבָרִים	דְּבָרִי
	זִקְנִים	זִקְנִי
	עֲנָבִים	עֲנָבִי

Note: The *dageš forte* in עֲנָבִי is secondary and has the purpose of making the *šwa* more audible (cf. GKC § 20h).

As an example of a feminine disyllabic noun זְדִקָּה *righteousness* can be mentioned.

	abs. st.	cs. st.
sg.	צִדְקָה	צִדְקַת
pl.	צִדְקוֹת	צִדְקוֹת

Segolate nouns

In the singular, the construct state of segolate nouns is identical to the absolute state except in segolate nouns with a semivowel as second root consonant. In the construct state, the original diphthong is contracted to a long vowel.

	abs. st.	cs. st.
sg.	בֵּית	בֵּית <i>house of</i>
	מָוֶת	מָוֶת <i>death of</i>

In the absolute state plural, segolate nouns use disyllabic bases with two originally short vowels. In the construct state, the original vowel of the first root consonant of the singular form is found (with $\text{ɔ} < *u$); the second root consonant has medial *šwa*.

	abs. st.	cs. st.	sg. form
pl.	מְלָכִים	מְלָכֵי <i>kings of</i>	מְלָךְ < <i>*malk</i>
	שְׁבָטִים	שְׁבָטַי <i>tribes of</i>	שְׁבֶט < <i>*šibṭ</i>
	חֳדָשִׁים	חֳדָשֵׁי <i>months of</i>	חֹדֶשׁ < <i>*ḥudš</i>

Segolate nouns with an original /u/ as vowel, may have absolute state plural forms like קְדָשִׁים *qḏāšim consecrated things*, שְׂרָשִׁים *šrāšim roots* with *qameṣ ḥaṭuf* in an open syllable. Some nouns have *segol* with the first root consonant in the construct state plural, e.g., חֳלָקֵיהֶם *their fields* (sg. cs. st. חֹלֶק).

In segolate nouns with a semivowel as second root consonant the diphthong (or triphthong) is always contracted in the cs. st. while in the abs. st. forms with contraction are attested as well as forms without.

	abs. st.	cs. st.
	זֵיתִים	זֵיתֵי <i>olive trees of</i>
pl.	חֲיָלִים	חֲיָלֵי <i>armies of</i>
		מוֹתֵי <i>deaths of</i>

Geminate nouns

Geminate nouns are nouns with an originally geminated final consonant that was simplified after the loss of the short final vowel: עַם *'am* < *'amm* < *'ammu*. In forms with an ending the gemination of the final consonant is restored.

	abs. st.	cs. st.
sg.	עַם צֶל דָּב	עַם צֶל דָּב
pl.	עַמִּים חֲצִים דָּבִים	עַמֵּי חֲצֵי דָּבִי*

Nouns ending in *segol-He*

Nouns with the ending *-ā* have the cs. st. ending *-ē*. The endings of the plural are attached to the last consonant of the noun.

	abs. st.	cs. st.
sg.	קֶנֶה שָׂדֶה	קֶנֶה <i>reed of</i> שָׂדֶה <i>field of</i>
pl.	קִנִּים שָׂדוֹת	קִנֵּי שָׂדוֹת

4.5.5 Construct Chains

The Syntax of Construct Chains

The definiteness of construct chains is determined by the noun in the absolute state, that is the last noun in the construct chain. If it is indefinite, the construct chain is indefinite (Judg 20:40; 1 Sam 10:3).

רֹאשׁ־חֲמֹר *a head of a donkey* (2 Kgs 6:25)

פֶּת־לֶחֶם *a morsel of bread* (Gen 18:5)

If the dependent noun is definite, the entire construct chain becomes definite (Gen 21:17; Gen 32:31). (Nouns are made definite by the definite article, by an enclitic personal pronoun or a definite dependent noun; proper nouns are definite in themselves; cf. Chapter 3, Section 8.1).

In a construct chain, only the last noun, that is the noun in the absolute state, may be definite.

קוֹל הַנֶּעֶר *the voice of the boy* (Gen 21:17)

בֶּן־הַמֶּלֶךְ *the son of the king* (2 Sam 18:12)

Note:

If it needs to be avoided that the entire phrase becomes definite because of a definite noun in it as in *a son of Jesse*, Biblical Hebrew uses constructions with the preposition לְ, e.g., בֶּן לְיִשִּׁי בֵּית הַלְחֶמִי *a son of Jesse the Bethlehemite* (1 Sam 16:18).

Construct chains may contain more than two nouns. If there are more than two nouns in a construct chain, only the last one is in the absolute state. The other nouns in the construct chain are in the construct state.

אֲב הַמּוֹן גּוֹיִם *the father of a multitude of nations* (Gen 17:4)

מִסְפַּר שְׁבֵטֵי בְנֵי־יִשְׂרָאֵל *the number of the tribes of the sons of Israel*
(1 Kgs 18:31)

קַרְנוֹת מִזְבֵּחַ קֶטֶרֶת הַסָּמִים *the horns of the altar of the incense of spices*
(Lev 4:7)

In a construct chain, nouns in the construct state may have two or more dependent nouns (e.g., 1 Sam 23:7; Num 20:5) although this is often avoided.¹

¹ Cf. אֶל־נְבִיאֵי אֲבִיךָ וְאֶל־נְבִיאֵי אֲמֶךָ *to the prophets of your fathers and to the prophets of your*

Chapter 4

On the other hand, a dependent noun may only have one governing noun which means that an English phrase like *the officials and elders of Succoth* needs to be broken up into two noun phrases in Biblical Hebrew (Judg 8:14).

עִיר דְּלָתִים וּבָרִיחַ	<i>a city with gates and bars</i> (1 Sam 23:7)
מְקוֹם זֵרַע וְתַאֲנָה וְגִפְנִין וְרִמּוֹן	<i>a place of seed or figs or vines or pomegranates</i> (Num 20:5)
אֶת־שָׂרֵי סִכּוֹת וְאֶת־זִקְנֶיהָ	<i>the officials of Succoth and its elders</i> (Judg 8:14)

As a construct chain is a very close unit, nothing may separate its nouns, the only exception being the locative *He*.

בֵּיתָהּ יוֹסֵף *to the house of Joseph* (Gen 43:17)

Attributive adjectives that modify the governing noun of a construct chain and demonstrative pronouns follow the dependent noun at the end of the construct chain.

בֹּעַל הַבַּיִת הַזֶּקֶן *the old owner of the house* (Judg 19:22)
כֵּן הַשֶּׁמֶן הַזֶּה *this flask of oil* (2 Kgs 9:1)

In the construct chain *בֹּעַל הַבַּיִת הַזֶּקֶן* in Judg 19:22 the adjective *זֶקֶן* modifies the noun *בֹּעַל* as shown by the noun phrases *זֶקֶן אִישׁ* and *הָאִישׁ הַזֶּקֶן* in Judg 19:16–17 although it would be grammatically possible to translate the construct chain *the owner of the old house*. In 2 Kgs 9:1, the antecedent of the demonstrative pronoun *זֶה* is the noun *כֵּן* and not the noun *שֶׁמֶן* (cf. the differing renderings of the phrase in Vg and LXX).

The Functions of Construct Chains

Besides the possessive relation construct chains express a number of different concepts. Important concepts are:

Quality or characteristic

mother (2 Kgs 3:13)

4.5 Inflection of Nouns

הַר הַקֹּדֶשׁ	<i>the holy mountain</i> (lit. <i>the mountain of holiness</i>) (Isa 27:13)
אֱלֹהֵי הַנֶּכֶר	<i>the foreign gods</i> (lit. <i>the gods of foreignness</i>) (1 Sam 7:3)
מִגְדַּל עֹז	<i>a strong tower</i> (lit. <i>a tower of strength</i>) (Judg 9:51)

The matter out of which something is made, or the content of something

רֶכֶב בְּרֹזָל	<i>iron chariots</i> (Judg 1:19)
נֹצִיב מֶלַח	<i>a pillar of salt</i> (Gen 19:26)
בִּקְבֵּק דְּבֶשׁ	<i>a bottle of honey</i> (1 Kgs 14:3)

If the governing noun expresses a verbal idea, the dependent noun can express the object of the action.

חֲמָס אָחִיךָ	<i>violence against your brother</i> (Ob 10)
נִקְמַת הַיְּכָלֹ	<i>vengeance for his temple</i> (Jer 50:28)

Construct chains can express the partitive idea, i.e., someone or something belonging to a group.

אֶחָד הָעָם	<i>one of the people</i> (1 Sam 26:15)
-------------	--

Adjectives can be used in the cs. st. as normal nouns as in 1 Sam 16:4 or for expressing various other ideas.

זִקְנֵי הָעִיר	<i>the elders of the city</i> (1 Sam 16:4)
עַם־קָשָׁה־עֵרָף	<i>a stiff-necked people</i> (Exod 32:9)
שָׂבַע יָמִים	<i>full of days</i> (Gen 35:29)
צָחָה צָמָא	<i>parched with thirst</i> (Isa 5:13)

Although proper nouns are definite in themselves they may occur in special phrases as governing noun in a construct chain.

יְהוָה צְבָאוֹת	<i>the Lord of hosts</i> (1 Sam 1:11)
יַרְדֵּן יְרִיחוֹ	<i>the Jordan at Jericho</i> (Num 33:48)
בֵּית לָחֶם יְהוּדָה	<i>Bethlehem of Judah</i> (Judg 19:1)

4.6.2 Construct Chains

Identify the construct chains in the clauses in Section 4.6.1 and write down the abs. st. forms of the nouns in the cs. st. and identify the vowel changes.

4.6.3 Translation into English

Translate the following construct chains into English:

גִּבּוֹר חֵיל

² לוֹ to him

³ הוּא he (independent personal pronoun)

⁴ דֶּרֶךְ יוֹם is a construct chain.

⁵ יָצָא yāšā(?) he went out

⁶ בֶּן־נֹר the son of Ner

⁷ הַלַּיְלָה pausal form of לַיְלָה

⁸ With a compound subject like מֹשֶׁה וְאַהֲרֹן the preceding verbal predicate is often in the singular (→ 5.6).

⁹ גִּלְעָדִי Gileadite

דָּרָךְ מְדַבֵּר מוֹאֵב
(יָמִים plural of יוֹם) יְמֵי הַמֶּשֶׁתֶּה

4.6.4 Translation into Hebrew

Translate into Hebrew using construct chains:

man of words

a strong tower (lit. a tower of strength)

a man of blood (use the plural of the word for blood)

the servant of the king

the servants of the king of יִשְׂרָאֵל

5.2 Irregular Nouns in Biblical Hebrew

A number of nouns have irregular forms in the absolute state in the plural and in the construct state in both the singular and the plural. Most of these nouns are very frequent in the Hebrew Bible. Therefore, familiarity with these forms is important.

Notes

1. The asterisk * indicates that the form is not attested in Biblical Hebrew.
2. More information can be found in P. Joüon and T. Muraoka, *A Grammar of Biblical Hebrew*, § 98 (abbr. JM). Other irregular nouns that are mentioned there, are אָבִי husband's father, אִמּוֹת* husband's mother, שֶׁהָ a head of small livestock.
3. The noun אָחִי brother has the following forms with enclitic personal pronoun that need to be mentioned: אֶחָאֵי my brothers (pausal form), אֶחָאֵי 'æḥāw his brothers. (with silent /y/)
4. The plural form אֲחֵיות sisters is attested in Rabbinic Hebrew but not in Biblical Hebrew.
5. The *dageš* in the ה in the plural forms בָּתִּים *bātīm*, בָּתִּי *bātē*, בָּתֵּינוּ *bātēnū* our houses, etc. is an exceptional *dageš lene* because it is preceded by a full (long) vowel. According to a different explanation, the *dageš* is a *dageš forte*; the forms are then pronounced as *bāttīm*, *bāttē*, *bāttēnū*, etc., with an exceptional *qameṣ gadol* in a closed unstressed syllable.
6. The nouns מַיִם and שָׁמַיִם are exceptional plural nouns (JM § 90f, 91f).

5.3 The Noun כָּל

The noun כָּל can be used as a substantive in the abs. st. meaning *the whole, entirety, everything*, e.g., וַיְהִי כִּי בֵרַךְ אֶת־אֲבְרָהָם בְּכָל, *And the Lord had blessed Abraham in all things* (Gen 24:1).

5.4 Stem Formations and Conjugations in Biblical Hebrew

It is much more frequently used as the governing noun in construct chains with the cs. st. forms כָּל, כָּל־ and כָּל־. Used in this way, כָּל means *all (of), every* or *any*. Illustrative examples are:

כָּל־מָקוֹם	<i>every place</i> (Deut 12:13)
כָּל־אִישׁ	<i>everyone</i> (lit. <i>every man</i> [person]) (Gen 45:1)
כָּל־תְּפִלָּה כָּל־תַּחֲנֻנָּה	<i>any prayer, any supplication</i> (1 Kgs 8:38)
כָּל־מַמְלָכוֹת	<i>all kingdoms</i> (1 Kgs 10:20)
כָּל־הָאָרֶץ	<i>all the land, the entire land</i> (Gen 13:15)
כָּל הָאָרְצוֹת	<i>all the lands</i> (Gen 41:54)

Note

The particular combination of signs כָּל is to be pronounced *kāl* only *once* in the Hebrew Bible in Isa 40:12 (3 m. sg. suffix conjugation of the verb כוֹל). In all other instances כָּל is the cs. st. of כָּל and is to be pronounced *kāl*.

5.4 Stem Formations and Conjugations in Biblical Hebrew

The morphology of the verb in Biblical Hebrew is characterized by a set of *stem formations* (Hebrew בְּנִינִים, singular בְּנִין) and a set of *conjugations* consisting of finite forms expressing tense, aspect and mood and the participle and the two infinitives as non-finite nouns (verbal nouns).

The finite forms with the suffix conjugation, prefix conjugation, jussive, cohortative and imperative are introduced in Chapters 5–7, the non-finite forms with the active and the passive participle and the infinitive construct and infinitive absolute in Chapters 8–9.

The system of the *binyanim* consists of the seven main *binyanim*: Qal, Niphal, Hiphil (with its passive counterpart Hophal), Piel (with its passive and reflexive counterparts Pual and Hitpael, respectively). Compared to the Qal, the other *binyanim* are characterized by prefixes or the gemination of the second root consonant. These additional elements modify the meaning of forms. The following examples illustrate this.

Qal מָלַךְ <i>he reigned as king</i>	Hiphil הִמְלִיךְ <i>he made (someone) king</i>
Qal אָבַד <i>he perished</i>	Piel אֶבַד <i>he made (someone) perish</i>
Qal קָנָה <i>he bought</i>	Niphal נִמְכַּר <i>he was sold</i>

The Qal forms are introduced in Chapters 5–15; the other *binyanim* are introduced beginning in Chapter 16. About 69 % of all verbal forms are Qal forms, making this *binyan* most frequent one by far. Hiphil forms are about 13 %, Piel forms about 9 % and Niphal forms about 6 %.

5.5 The Suffix Conjugation Qal

5.5.1 The Forms of the Suffix Conjugation Qal

The suffix conjugation is characterized by suffixes that are attached to the verbal root at the end. Other terms for the suffix conjugation are *perfect* or in Hebrew עֲבַר (*עָבַר*) *past tense*. As the terms *perfect* and עֲבַר make implicit statements about the meaning and use of these forms, the term *suffix conjugation* is preferred in this grammar because it pertains exclusively to formal features.

In the suffix conjugation Qal, Hebrew makes a formal distinction between fientive or active verbs on the one side and stative verbs on the other side. Fientive verbs are much more frequent than stative verbs. Among the stative verbs, Hebrew distinguishes between verbs with the thematic vowel /e/ and verbs with the thematic vowel /o/. The last category is very infrequent except for the verb יָכַל *to be able to, prevail* with 182 occurrences.

		suffix	fientive verb	stative verb	
sg.	3 m.	-Ø	כָּתַב	כָּבַד	קָטַן
	3 f.	-ā	כָּתְבָה	כָּבְדָה	קָטְנָה
	2 m.	-tā	כָּתַבְתָּ	כָּבַדְתָּ	קָטַנְתָּ
	2 f.	-t	כָּתַבְתְּ	כָּבַדְתְּ	קָטַנְתְּ
	1 c.	-tī	כָּתַבְתִּי	כָּבַדְתִּי	קָטַנְתִּי
pl.	3 c.	-ū	כָּתְבוּ	כָּבְדוּ	קָטְנוּ
	2 m.	-tæm	כָּתַבְתֶּם	כָּבַדְתֶּם	קָטַנְתֶּם
	2 f.	-tæn	כָּתַבְתֶּן	כָּבַדְתֶּן	קָטַנְתֶּן
	1 c.	-nū	כָּתַבְנוּ	כָּבַדְנוּ	קָטַנּוּ

The suffix conjugation forms include an expression of the subject in the suffixes. An overt subject is grammatically not necessary but frequently present.

The suffixes can be categorized into three groups: The vocalic suffixes in the 3 f. sg. and 3 c. pl. forms consist of only a vowel. These suffixes are stressed in context forms and unstressed in pausal forms. Among the consonantal suffixes – those that begin with a consonant – light and heavy consonantal suffixes can be distinguished. Whereas the light suffixes in the 2 m./f. sg., 1 c. sg. and 1 c. pl. forms are not stressed (except in a certain set of forms), the heavy suffixes in the 2 m./f. pl. forms are stressed.

Attaching vocalic suffixes or heavy suffixes leads to vowel reduction. In the case of heavy suffixes the first vowel is reduced. When vocalic suffixes are attached, the second vowel is reduced in context forms. In pausal forms the thematic vowel is preserved and stressed, e.g., **כָּתְבוּ**.

As examples of distinct pausal forms can be mentioned: 3 m. sg. **כָּתַב**; forms with vocalic suffix: 3 f. sg. **כָּתְבָהּ**, **כָּתְבָהּ** and 3 c. pl. **כָּתְבוּ**, **כָּתְבוּ**; forms with light suffix with lengthening of the thematic vowel: **כָּתְבֻּתָּהּ** etc.

The thematic vowel of static verbs of the type **כָּבַד** changes from /e/ to /a/ in all forms with consonantal suffix.

Sometimes the suffix of the 2 m. sg. is spelled with a vowel letter: **כָּתְבָתָהּ**.

In 2nd person forms and 1 c. sg. forms of verbs with /t/ as third radical, the /t/ of the root and the initial /t/ of the suffix stand next to each other; the ת is spelled only once and it is doubled, e.g., *kārátī* **כָּרַתִּי** *I have cut*.

Although in forms of verbs with /n/ as third radical the /n/ is immediately followed by the consonant /t/ in all forms with consonantal suffix except the 1 c. pl. forms, the /n/ of the root is *not* assimilated to the following /t/, e.g., *šāknī* **שָׁכַנְתִּי** *I dwelt*. An exception is the verb **נָתַן**, e.g., *nātānī* **נָתַתִּי** < *nātānī* *I gave*, *nātāntēm* **נָתַתֶּם** < *nātāntēm* *you gave*.

In 1 c. pl. forms of verbs with /n/ as third radical (e.g., **נָתַן**) the /n/ of the root and the initial /n/ of the suffix -nū stand next to each other; the נ is spelled only once and it is doubled, e.g., *nātānnū* **נָתַנּוּ** *we gave*.

The original forms of the suffixes may have bearing on verbal forms with enclitic personal pronouns. The zero morpheme of the 3 m. sg. form originates from the loss of a short final vowel **kataba* > *kātab* without an ending. The original forms of the suffixes of the 3 f. sg. and 2 m./f. sg. need to be mentioned here, too.

3 m. sg.	-a > Ø	* <i>kataba</i> > <i>kātab</i>	כָּתַב
3 f. sg.	-at > -ā	* <i>katabat</i> > <i>kātəbā</i>	כָּתְבָה
2 m. sg.	-ta > -tā	* <i>katabta</i> > <i>kātābtā</i>	כָּתַבְתָּ
2 f. sg.	-ti > -t	* <i>katabti</i> > <i>kātabt</i>	כָּתַבְתְּ

5.5.2 The Suffix Conjugation Qal of Guttural Verbs

Suffix conjugation forms of guttural verbs are characterized by only few differences in comparison with the verbs without gutturals. In verbs I gutt. and II gutt. the vocal *šwa* is replaced by *hatef pataḥ* in the 3 f. sg. and 3 c. pl. and the 2 m./f. pl., respectively. In verbs III gutt., the consonant cluster in the 2 f. sg. form is broken up by insertion of a vowel. The *dageš lene* in the /t/ of the suffix that is found in the verbal forms without guttural is retained.

	I gutt.	II gutt.	III gutt.
sg. 3 f.		כָּתְבָה	
2 f.			שָׁלַחְתְּ
pl. 3 c.		כָּתְבוּ	
2 m.	עֲזַבְתֶּם		
2 f.	עֲזַבְתֶּן		

5.5.3 The Use of the Suffix Conjugation

The use of the suffix conjugation and how it is translated depends on the verb type. Suffix conjugations forms of fientive verbs have different translation options than the same forms of stative verbs.

Fientive verbs

The suffix conjugation is used for events in the past.

מִים שָׁאַל חֵלֶב נָתַןָּהּ *He asked for water, she gave [him] milk.*
(Judg 5:25)

Sometimes the past event has bearing on the present. Then the present perfect should be used in the English translation.

5.5 The Suffix Conjugation Qal

וַהֲנִיחַ נָתַן יְהוָה עֲלֵיכֶם מֶלֶךְ ... and see, the Lord has set a king over you.
(1 Sam 12:13)

קָרַע יְהוָה אֶת־מַמְלָכֹת
יִשְׂרָאֵל מֵעַלְיָךְ הַיּוֹם The Lord has torn the kingdom of Israel from
you today. (1 Sam 15:28)

In narratives the suffix conjugation is used instead of the *wayyiqtol* form when a constituent is fronted (often for emphasis or contrast).

וַהֲעִיר שָׂרְפוּ בָאֵשׁ And the city they burnt with fire. (Jos 6:24)
וְאֶת־בָּנוֹתֵיהֶם נָתַנוּ לְבָנֵיהֶם ... and their daughters they gave to their sons.
(Judg 3:6)

וַיַּצִּידָהּ נָתַן לוֹ ... and he gave him provisions. (1 Sam
22:10)

The suffix conjugation is used for anterior events (in a past tense context the pluperfect is used in English).

וַיִּקְחוּ אֶת־הַפָּר אֲשֶׁר־נָתַן And they took the bull that he had given them.
לָהֶם (1 Kgs 18:26)

וַיִּשְׂפֹךְ הַדֶּשֶׁן מִן־הַמִּזְבֵּחַ And the fat ashes poured out from the altar
כַּמּוֹפֵת אֲשֶׁר נָתַן אִישׁ according to the sign that the man of God had
הָאֱלֹהִים בְּדַבַּר יְהוָה given. (1 Kgs 13:5)

Stative verbs

Suffix conjugation forms of stative verbs refer to states in the present. This applies also to verbs of mental perception (e.g., יָדַע Q. *to know*) and verbs that express emotions (e.g., אָהַב Q. *to love*).

עַל־כֵּן גָּדֹלָתְךָ אֲדֹנָי יְהוָה Therefore you are great, O Lord GOD (2 Sam
7:22)

קָטַנְתִּי מִכָּל הַחֲסָדִים I am too insignificant for all your kindness
(Gen 32:11)

לֹא יָדַעְתִּי מִי עָשָׂה I do not know who did this thing (Gen 21:26)
אֶת־הַדָּבָר הַזֶּה

אָהַבְתִּי אֶת־אֲדֹנָי אֶת־אִשְׁתִּי I love my lord and my wife and my children
וְאֶת־בָּנֵי (Exod 21:5)

Chapter 5

Suffix conjugation forms of stative verbs can also express a state in the past or the entrance into a state in the past.

כִּי יִגְדַּתִּי מִפְּנֵי הָאֵף וְהַחֲמָה אֲשֶׁר קִצַּף יְהוָה עֲלֵיכֶם	<i>For I was afraid of the anger and wrath that the LORD had against you. (Deut 9:19)</i>
וַיִּנְעֵץ אֶת־הַיְלָדִים אֲשֶׁר נָדְלוּ אִתּוֹ	<i>And he exchanged counsel with the young men that had grown up with him. [= that had become grown-up with him] (1 Kgs 12:8)</i>

The suffix conjugation has other functions that do not need to be introduced here.

5.6 Subject Expression and Agreement

As explained above, the suffix conjugation forms and the other finite verbal forms include an expression of the subject in the suffixes and prefixes marking the forms for person, gender and number. An overt subject is grammatically not necessary but frequently present. If an overt subject is present, it agrees with the verbal form in gender and number. In Gen 13:12 the verb and the subject are in the singular; in Judg 3:5 they are both in the plural.

אַבְרָם יָשַׁב בְּאֶרֶץ־כְּנָעַן וְלוֹט יָשַׁב בְּעָרֵי הַכְּפָר	<i>Abram settled in the land of Canaan while Lot settled in the cities in the vicinity [of the Jordan] (Gen 13:12)</i>
וּבְנֵי יִשְׂרָאֵל יָשָׁבוּ בְּקֶרֶב הַכְּנַעֲנִי	<i>So the Isrealites settled among the Canaanites (Judg 3:5)</i>

With 1st and 2nd person verbal forms only independent personal pronouns may be used as overt subjects. They agree with the verbal form in person, number and gender.

אֲנִי שָׁמַעְתִּי	<i>I have heard [it] (Ezek 35:13)</i>
-------------------	---------------------------------------

While agreement is the norm, lack of agreement does occur. In Gen 9:15, for example, the subject מַיִם *water* is plural, but the following verbal predicate יִהְיֶה is a singular form. Especially when the verb is at the beginning of the clause and followed by a compound subject consisting of more than one entity, lack of agreement can be observed (Exod 7:10).

וְלֹא־יִהְיֶה עוֹד הַמַּיִם לְמַבּוּל The water shall not become a flood again
(Gen 9:15)

וַיָּבֹאוּ מֹשֶׁה וְאַהֲרֹן אֶל־פַּרְעֹה Moses and Aaron came to Pharaoh (Exod
7:10)

When singular nouns like עַם or גּוֹי *nation, people* are used as subject, the verbal predicate is often in the plural as in Josh 24:24 (cf. Josh 24:21 with a singular verb). This is possible because the subject refers to an entity consisting of more than one element. The technical term for this phenomenon is *constructio ad sensum* (Engl. *construction according to meaning or notional agreement*), which means that grammar follows meaning and not form.

וַיֹּאמְרוּ הָעָם אֶל־יְהוֹשֻׁעַ and the people said to Joshua (Josh 24:24)

The rules for agreement and the expression for the subject apply to all finite verbal forms, i.e., the suffix conjugation, the prefix conjugation, the volitive forms jussive, cohortative and imperative, and the *wayyiqtol* and *wəqataltí* forms. They also apply to the participle with respect to gender and number.

Other terms for *agreement* and *lack of agreement* are *congruency* and *incongruency*.

5.7 The Negative לֹא

The most common negative in Biblical Hebrew is לֹא *lō(?) not* (with silent א). It is used with verbal forms (except infinitives) as negation of the entire clause. The negative לֹא is usually placed immediately before the verbal form, e.g., לֹא צָחַקְתִּי *I have not laughed* (Gen 18:15).

The negative לֹא is also used as the negative answer *no* to a yes-no question, request or statement (e.g., Gen 23:11; 1 Sam 1:15).

It can be used to negate a single word as in לְדֶרֶךְ לֹא־טוֹב *a way not good* (Ps 36:5), בֶּן לֹא חָכָם *an unwise son* (Hos 13:13), בְּלֹא־אֵל *with a not-God* (Deut 32:21).

6.2 Prefix Conjugation Qal

6.2.1 The forms of the Prefix Conjugation

The prefix conjugation is characterized by prefixes in all forms of the paradigm. In some forms suffixes are attached to the form as well.

In the prefix conjugation Biblical Hebrew distinguishes two forms with different thematic vowels, i.e., the vowels between the second and third root consonants. The form יִקְטֹל *yiqṭōl* with the thematic vowel /ō/ is used for fientive verbs while the form יִכְבֵּד *yikḅad* with the thematic vowel /a/ is used for stative verbs.

For a proper understanding of the forms of the prefix conjugation forms of verbs with gutturals and some weak verbs it is important to note that the form יִקְטֹל *yiqṭol* is the result of the development **yaqtulu* > *yiqṭol* (with loss of the final short vowel as usual in BH).¹ The change of the prefix vowel /a/ > /i/ is due to the law of attenuation (/a/ > /i/ in unstressed closed syllables). The change of /u/ > /ō/ in stressed syllables is regular.

The prefix vowel /i/ and thematic vowel /a/ of the forms יִכְבֵּד *yikḅad*, etc., of the stative verb are the original vowels; they were not subject to change.

¹ The original vowels are preserved in Classical Arabic, e.g., *yaf'ulu he will do*. The forms of the prefix conjugation forms of verbs Iʕ, II w/y and II gem. can only be explained with the original forms with the vowel /a/ in the prefix syllable of fientive verbs.

		pref.	suff.	fientive	stative
sg.	3 m.	y-		יִכְתֹּב	יִכְבֵּד
	3 f.	t-		תִּכְתֹּב	תִּכְבֵּד
	2 m.	t-		תִּכְתֹּב	תִּכְבֵּד
	2 f.	t-	-ī	תִּכְתְּבִי	תִּכְבְּדִי
	1 c.	ʔ-		אִכְתֹּב	אִכְבֵּד
pl	3 m.	y-	-ū	יִכְתְּבוּ	יִכְבְּדוּ
	3 f.	t-	-nā	תִּכְתְּבֶנָּה	תִּכְבְּדֶנָּה
	2 m.	t-	-ū	תִּכְתְּבוּ	תִּכְבְּדוּ
	2 f.	t-	-nā	תִּכְתְּבֶנָּה	תִּכְבְּדֶנָּה
	1 c.	n-		נִכְתֹּב	נִכְבֵּד

Notes

The vowel /æ/ in the prefix of the 1 c. sg. form needs to be noted. The consonant /ʔ/ often triggers the change of a vowel to /æ/.

The forms with stressed vocalic suffix (2 f. sg. and 3/2 m. pl.) have distinct pausal forms. The stress is on the penultimate syllable and the original thematic vowel is preserved instead of being reduced as in the context forms: e.g., יִכְתְּבִי, יִכְבְּדִי.

In forms with /a/ as thematic vowel the *pataḥ* is lengthened to *qameṣ* in pausal forms, e.g., יִכְבֵּד.

The forms 3/2m. pl. are quite often extended by an additional ך called paragogic Nun, e.g., תִּשְׁמְרוּן *you shall keep* (Deut 6:17), יִשְׁמְעוּן *they will hear* (Deut 4:6). Most of the 305 examples in the Hebrew Bible are found in Deut, Isa, Job and Ps 104 (JM § 44e). There is no difference in meaning between the normal forms and the forms with paragogic Nun. In pausal forms the thematic vowel is preserved despite the position of the stress, e.g., תִּכְרֹתֶיךָ *you shall cut down* (Exod 34:13), תִּדְבְּקֶיךָ *you shall cling* (Deut 13:5). Sometimes pausal forms with paragogic Nun are found in context. In five cases 2 f. sg. forms also have a paragogic Nun, e.g., תִּדְבְּקֶיךָ *you shall cling* (Ruth 2:8).

The possible confusion of identical forms (3 f. sg. and 2 m. sg. forms and 3/2 fem. pl.) is hardly ever an issue in Biblical Hebrew texts.

6.2.2 Historical Background

In the earliest phase of Northwest Semitic the prefix conjugation had four distinct forms. Two forms had a short final vowel: *yaqtulu* and *yaqtula*. The form *yaqtulu* functioned as an indicative form while the form *yaqtula* was used as a subjunctive. Vestiges of the form *yaqtula* can still be found in the cohortative and the long form of the imperative.

The third form was a short form without a final vowel *yaqtul* which functioned either as a perfective past tense (or preterite) or as a volitive form. This form is preserved in the *wayyiqtol* form and the jussive in Biblical Hebrew.

Because of the general loss of short final vowels the formal difference between the forms *yaqtulu* and *yaqtul* is lost in most forms. It is reflected only in some volitive forms and *wayyiqtol* forms of certain classes of weak verbs and in some Hiphil forms.

A fourth form was the so-called energetic mode *yaqtulan(na)* which is preserved only in some forms of the prefix conjugation with enclitic personal pronouns.

6.2.3 Verbs with Gutturals in the Prefix Conjugation

		I gutt.		II gutt.	III gutt.
		fientive	stative		
sg.	3 m.	יַעֲזֹב	יִחְזֹק	יִבְחַר	יִשְׁלַח
	3 f.	תַּעֲזֹב	תִּחְזֹק	תִּבְחַר	תִּשְׁלַח
	2 m.	תַּעֲזֹב	תִּחְזֹק	תִּבְחַר	תִּשְׁלַח
	2 f.	תַּעֲזֹבִי	תִּחְזֹקִי	תִּבְחַרִי	תִּשְׁלַחִי
	1 c.	אֶעֱזֹב	אֶחְזֹק	אֶבְחַר	אֶשְׁלַח
pl.	3 m.	יַעֲזֹבוּ	יִחְזְקוּ	יִבְחְרוּ	יִשְׁלְחוּ
	3 f.	תַּעֲזֹבְנָה	תִּחְזְקְנָה	תִּבְחַרְנָה	תִּשְׁלַחְנָה
	2 m.	תַּעֲזֹבוּ	תִּחְזְקוּ	תִּבְחְרוּ	תִּשְׁלְחוּ
	2 f.	תַּעֲזֹבְנָה	תִּחְזְקְנָה	תִּבְחַרְנָה	תִּשְׁלַחְנָה
	1 c.	נֶעֱזֹב	נִחְזֹק	נִבְחַר	נִשְׁלַח

Notes

The gutturals ה, ח and ע prefer the vowel /a/ in the positions before and after the guttural. There are, however, some I gutt. verbs with *yaqtul* prefix conjugation forms that have the prefix vowel /æ/ instead of /a/, e.g., יִהְדֹּף *he will push*. When the guttural א is preserved as a consonant, the vowel /æ/ is preferred, e.g., יִאָּבֵד *he will bind*.

Many I gutt. verbs have a *ḥatef* vowel with the first root consonant instead of silent *šwa* (cp. יִעֲזֹב with יִכְתֹּב) while other I gutt. verbs tolerate the silent *šwa* (e.g., יִחַנֹּד *he shall desire*).

In context forms of I gutt. verbs with vocalic suffix (2 f. sg. and 2/3 m. pl.) the two consecutive vocal *šwa* are changed to a full vowel that corresponds to the *ḥatef šwa*, and medial *šwa* which does not trigger a *dageš lene* in the following consonant, e.g., **taʿāzabū* > *taʿazbū* תִּעְזְבוּ and **yæḥæzaqū* > *yæḥæzqū* יִחַזְקוּ. In forms like these Biblical Hebrew tolerates short vowels in open syllables.

Fientive verbs I gutt. have the vowel pattern *a–u* with preservation of the original vowel of the prefixes while stative verbs I gutt. have the vowel pattern *i–a* (with change of the /i/ to /æ/ to bring the prefix vowel closer to the vowel /a/ that is preferred by gutturals).

Verbs II gutt. usually have the vowel pattern *i–a* irrespective of their semantic classification as fientive or stative. The stem vowel /ō/ can be found with a few verbs, e.g., יִאָּחֵז *he shall grasp*. Verbs III gutt. almost always show the vowel pattern *i–a*.

In pausal forms with vocalic suffix the original thematic vowel is preserved and the stress is on the penultimate syllable, e.g., תִּשְׁלַחְוּ, יִעֲזְבוּ.

In forms with /a/ as thematic vowel the *pataḥ* is lengthened to *qameṣ* in pausal forms, e.g., יִכְתֹּב.

6.2.4 The Use of the Prefix Conjugation

The prefix conjugation has three main uses:

1. as a future tense and – almost exclusively occurring in questions and subordinate clauses – present tense (1 Sam 9:16; Gen 24:31)
2. as a form expressing imperfective aspect for durative or iterative (repeated) events in the past (1 Kgs 17:6)
3. as a modal form expressing obligation, capability etc. (expressed in English with auxiliary verbs like *may*, *would*, *shall*, *can*, *must*, *want*, *could*, *should*, etc.), e.g., Exod 20:9; Deut 23:7. With the negative אֵל the prefix conjugation is used for general or strict prohibitions (e.g., Exod 20:15).

This use is called *vetitive* and forms a subgroup of the modal use of the prefix conjugation.

כָּעֵת מָחָר אֶשְׁלַח אֵלֶיךָ אִישׁ מֵאֶרֶץ בִּנְיָמִן	<i>Tomorrow about this time I will send to you a man from the land of Benjamin</i> (1 Sam 9:16)
לָמָּה תֵּעָמַד בַּחוּץ	<i>Why are you standing outside?</i> (Gen 24:31)
וּמִן־הַנָּחַל יִשְׁתֶּה	<i>... and from the brook he used to drink.</i> (1 Kgs 17:6b)
שֵׁשֶׁת יָמִים תַּעֲבֹד	<i>Six days you may work.</i> (Exod 20:9)
לֹא תִגְנוֹב	<i>You shall not steal.</i> (Exod 20:15)

6.2.5 The *waw*-Prefix Conjugation or *wayyiqtol* Form

The *waw*-prefix conjugation (*waw*-PC) or *wayyiqtol* form is a past tense form that is based on the short form of the prefix conjugation *yaqtul* in its function as perfective past tense. It is formed by a special form of the conjunction *waw* with *pataḥ* und *dageš forte* in the consonant of the prefix syllable. As the **ס** of the 1 c. sg. prefix does not take *dageš forte* the vowel is changed to *qameṣ*.

This special form of the conjunction is called *waw consecutive* (sometimes called *waw inversive* [Hebrew וְהִפְּוּי] although this term is rather misleading and historically incorrect). In the strong verb, the actual form of the *wayyiqtol* form is identical to the normal prefix conjugation. This applies to pausal forms as well. Deviating forms only occur with some weak verbs and in derived conjugations.

		<i>wayyiqtol</i>	
		fientive	stative
sg.	3 m.	וַיִּכְתֹּב	וַיִּכְבֹּד
	3 f.	וַתִּכְתֹּב	וַתִּכְבֹּד
	2 m.	וַתִּכְתֹּב	וַתִּכְבֹּד
	2 f.	וַתִּכְתְּבִי	וַתִּכְבְּדִי
	1 c.	וָאֶכְתֹּב	וָאֶכְבֹּד

		<i>wayyiqtol</i>	
		fientive	stative
pl.	3 m.	וַיִּכְתְּבוּ	וַיִּכְבְּדוּ
	3 f.	וַתִּכְתְּבֶנָּה	וַתִּכְבְּדֶנָּה
	2 m.	וַתִּכְתֹּב	וַתִּכְבֹּד
	2 f.	וַתִּכְתְּבִי	וַתִּכְבְּדִי
	1 c.	וַיִּכְתֹּב	וַיִּכְבֹּד

The *wayyiqtol* form is used as a past tense form, e.g., Exod 24:4. Chains of *wayyiqtol* forms form the backbone of narratives. *wayyiqtol* forms need to be in clause initial position.² With stative verbs the *wayyiqtol* form usually has ingressive meaning, i.e., *began to* . . ., e.g., Gen 41:56.

וַיִּכְתֹּב מֹשֶׁה אֶת כָּל־דִּבְרֵי יְהוָה *And Moses wrote down all the words of the Lord.* (Exod 24:4)

וַיִּחְזַק הָרָעָב בְּאֶרֶץ מִצְרַיִם *And the famine became severe in the land of Egypt.* (Gen 41:56)

6.3 Volitive Forms

6.3.1 Introduction

Volitive forms are verbal forms that express an intention or desire. Biblical Hebrew has three volitive forms, the cohortative (1st person), the imperative (2nd person) and the jussive (2nd and 3rd person). The most frequent volitive form is the imperative which is introduced in Chapter 7.

6.3.2 The Jussive

The jussive is a volitive form that can be used in the 3rd or 2nd person. Historically, the jussive is based on the short form of the prefix conjugation *yaqtul*. The jussive forms of strong verbs are identical to the prefix conjugation forms

² Whenever another element needs to be placed in clause initial position (e.g., the negative לֹא), different verbal forms need to be used.

discussed above. Only weak verbs of the types IIIy and II w/y have distinct jussive forms in the Qal.

The jussive is used for commands, instructions, requests and petitions in the 3rd person and in the 2nd person. It is used both in positive and negative clauses. With negative commands, the negative **אַל** is used. Positive clauses with the 2nd person jussive forms as predicate, however, are very infrequent.

יִשְׁפֹּט יְהוָה בֵּינִי וּבֵינְךָ *Let the Lord judge between me and you.* (Gen 16:5)

יָבֹא־נָא אֵלַי *Let him come to me.* (2 Kgs 5:8)

אַל-תִּשְׁלַח יָדְךָ אֶל-הַנֶּעֱר *Do not lay your hand on the boy.* (Gen 22:12)

6.3.3 The Cohortative

The cohortative – the first person volitive form – is used for exhortations, requests, wishes, or declarations of intent. It is marked by the ending *-ā* that is attached to the 1 c. sg./pl. prefix conjugation form. The thematic vowel is reduced in context forms as the ending is stressed.

		cohortative
sg.	1 c.	אֶתְּבָה
pl.	1 c.	נִתְּבָה

In pausal forms the thematic vowel is preserved and stressed: נִתְּבָה, אֶתְּבָה

וְאֶקְבְּרָה אֶת-אָבִי *and let me bury my father.* (Gen 50:5)

הָבָה נִלְפְּנָה לְבָנִים *Come now, let us make bricks.* (Gen 11:3)

6.4 The Marker of Subordination אֲשֶׁר

The word **אֲשֶׁר** serves as a marker of subordination introducing dependent clauses among which relative clauses are the most frequent. Because of this, **אֲשֶׁר** is sometimes called relative particle.

6.4.1 Relative Clauses

Relative clauses can either function as dependent attributive clauses modifying a noun or they can be substantivized replacing a noun. Unlike the relative pronouns *which* and *that* in English or *ὅς, ἡ, ὅ* etc. in Greek, אשר is not a relative pronoun in the sense that it is a constituent of the relative clause. It rather functions as a marker of subordination. As a consequence, one often finds in the relative clause a resumptive pronoun or adverb which refers back to the antecedent. If the resumptive pronoun would be the direct object of the predicate of the relative clause, it is usually dropped because it can be easily retrieved from the immediate context.³ Other resumptive elements (e.g., prepositional phrases) may be dropped, too.

If the relative clause serves as attribute to a noun, it is possible to first render אשר as *about which can be said* and translate the relative clause as if it were an independent clause. In the next step, the relative clause can be integrated smoothly into the main clause.

מִן־הַמָּקוֹם אֲשֶׁר־אַתָּה שָׁם *from the place about which can be said: you are there > from the place where you are*
(Gen 13:14)

In the overview below it is indicated which element is dropped from the relative clause.

אֵינָהּ הָאֲנָשִׁים אֲשֶׁר־בָּאוּ אֵלַיךְ הַלָּיְלָה	<i>Where are the men who came to you tonight?</i> (Gen 19:5)
וַיִּקְרָא אַבְרָם שֵׁם־בְּנוֹ אֲשֶׁר־יָלְדָהּ הָגָר יִשְׁמָעֵאל	<i>And Abram called the name of his son whom Hagar bore, Ishmael</i> (Gen 16:15; direct object)
עַל־הַדָּבָר אֲשֶׁר־דִּבֶּר אֵלָיו נָבוֹת הַיִּזְרְעֵאֵלִי	<i>... because of the word that Naboth, the Jezreelite, had said to him</i> (1 Kgs 21:4; direct object)
וַיַּעַל מֵעָלָיו אֱלֹהִים בַּמָּקוֹם אֲשֶׁר־דִּבֶּר אִתּוֹ	<i>And God went up from him in the place where he had spoken with him</i> (Gen 35:13; local adverbial phrase, cf. Gen 35:15)

³ An example of an resumptive pronominal element as direct object is found in 2 Kgs 16:3
כְּתַעֲבוֹת הַגּוֹיִם אֲשֶׁר הוֹרִישׁ יְהוָה אֹתָם מִפְּנֵי בְנֵי יִשְׂרָאֵל
according to the abominations of the peoples that the Lord had driven out before the Israelites.

Chapter 6

The following two clauses contain substantivized clauses with **אֲשֶׁר** as subject (Gen 38:10) or direct object (Exod 19:4; Exod 18:24).

וַיֵּרַע בְּעֵינֵי יְהוָה אֲשֶׁר עָשָׂה	<i>And what he did was evil in the eyes of the Lord (Gen 38:10)</i>
אַתֶּם רְאִיתֶם אֲשֶׁר עָשִׂיתִי לְמִצְרַיִם	<i>You have seen what I did to Egypt (Exod 19:4)</i>
וַיַּעַשׂ כֹּל אֲשֶׁר אָמַר	<i>And he [Moses] did everything he [Jethro] had told him (Exod 18:24)</i>

Substantivized clauses with **אֲשֶׁר** may also be dependent on a preposition.

בְּאֲשֶׁר תָּמוּתִי אָמוּת	<i>Where you will die I will die (Ruth 1:17)</i>
כִּי אֶסְלַח לְאֲשֶׁר אֲשָׂאִיר	<i>... for I will forgive those whom I will leave as a remnant (Jer 50:20; with ellipsis of the direct object)</i>
וַיֵּלֶךְ אַבְרָם כַּאֲשֶׁר דִּבֶּר אֵלָיו יְהוָה	<i>And Abram went according to what the Lord had said to him (Gen 12:4)</i>

6.4.2 Other Subordinate Clauses Introduced with **אֲשֶׁר**

The subordination marker **אֲשֶׁר** maybe also be used as a conjunction subordinate clauses with causal (*because*), concessive (*although*), final (*in order to*), consecutive (*so that*) or temporal (*when*) meaning.

6.5 Exercises

6.5.1 Translation of Verbal Forms

Translate the following verbal forms. Identify the gender (masc., fem., com.) and number (sg., pl.) the forms of which the English translation is ambiguous (i.e., *you, they*). Mark the stressed syllable if stress is not on the last syllable.

1 תִּזְכְּרוּ	2 אָכַרְתָּ	3 תַּעֲבֹד	4 תִּשְׁמְרוּן	5 תִּקְרַב	6 תִּזְכְּרִי	7 נִשְׁמַע
8 אֲשַׁלַּח	9 יִמְלֹכוּ	10 תִּשְׁלַחְנָה				

6.5.2 Translation of Sentences

Translate the following sentences from the Hebrew Bible. Less frequent names of persons and geographical names in these sentences: בְּנֵי־הוּ, גִּדְעוֹן, גִּלְעָד, יָבִישׁ גִּלְעָד, יַפְתָּח.

7.2 The Independent Personal Pronoun

7.2.1 The Forms of the Independent Personal Pronoun

The independent personal pronoun (iPP) has the following forms:

Singular				Plural			
1	c.	אֲנִי, אֲנִי	<i>I</i>	1	c.	אֲנִי, אַתָּה, הֵם	<i>we</i>
2	m.	אַתָּה	<i>you</i>	2	m.	אַתָּם	<i>you</i>
	f.	אַתְּ	<i>you</i>	2	f.	אַתְּנָה, אַתְּנָן	<i>you</i>
3	m.	הוא	<i>he</i>	3	m.	הֵמָּה, הֵם	<i>they</i>
	f.	הִיא	<i>she</i>	3	f.	הֵנָּה	<i>they</i>

Notes about the Forms of the Independent Personal Pronoun

1. The following pausal forms are attested (some of them have a different position of the stress than the context forms): 1 c. sg. אֲנִי and אֲנִי; 2 m. sg. אַתָּה or אַתָּה (with *zāqēf qāṭōn*); 2 f. sg. אַתְּ; 1 c. pl. אֲנַחְנוּ or אֲנַחְנוּ.
2. In the Torah, the personal pronoun of the 3 f. sg. is spelled הִיא in the Ketiv with the Qere perpetuum הִיא in almost all instances. For more information cf. Joüon and Muraoka, *A Grammar of Biblical Hebrew*, §§ 16f, 39c.
3. The existence of two different pronouns for the 1 c. sg. is remarkable. The form אֲנִי is more frequent than the form אֲנִי (874 and 359 attestations, respectively). The longer form אֲנִי was phased out in Late Biblical Hebrew. Mishnaic Hebrew only uses אֲנִי.
4. The 2 m. sg. form is five times spelled אַתָּה.
5. Rare alternative forms are אַתָּה for the 2 m. sg. (four times); אַתְּ* for the 2 f. sg. (seven times as Ketiv אַתְּ); אֲנַחְנוּ* for the 1 c. pl. (as in Mishnaic Hebrew; only in Jer 42:6 Ketiv).

7.2.2 The Use of the iPP in Nominal Clauses

In nominal clauses the iPP may be used in the following ways.

1. The independent personal pronoun is used as the subject in nominal clauses (2 Sam 12:7).
2. The independent personal pronoun is used as subject in clauses with a participle as predicate (1 Sam 17:45).
3. The 3 m. sg. form הוּא may be used in verbless clauses to disambiguate the preceding subject and the predicate (2 Sam 7:28).
4. As subject of a nominal clause, the independent personal pronoun may be used similarly to the demonstrative pronoun (2 Kgs 15:12; Lev 10:3).

אַתָּה הָאִישׁ	<i>You are the man</i> (2 Sam 12:7)
אַתָּה בָּא אֵלַי בְּחֶרֶב וּבַחֲנִית וּבְכִידוֹן וְאֶנְכִי בָא-אֵלֶיךָ בְּשֵׁם יְהוָה צְבָאוֹת אֱלֹהֵי מִעְרָכֹת יִשְׂרָאֵל	<i>You are coming to me with a sword, with a spear and with a javelin, but I come to you in the name of the Lord of hosts, the God of the ranks of Israel</i> (1 Sam 17:45)
אַתָּה-הוּא הָאֱלֹהִים	<i>You are God</i> (2 Sam 7:28)

הוא דבר־יהוה אשר דִּבֶּר
אל־יהוה This is the word of the Lord that he had spo-
ken to Jehu (2 Kgs 15:12)

הוא אשר-דיבר יהוה *This is what the Lord has said ...* (Lev 10:3)

7.2.3 The Use of the iPP in Verbal Clauses

The independent personal pronoun is used as the subject in clauses with finite verbal forms as predicate (often for emphasis of the subject):

כִּי אַתָּה יֹדַעַת לְבָבָהּ *For you alone know the heart of all children*
אֶת־לֵבב כָּל־בְּנֵי הָאָדָם *of mankind (1 Kgs 8:39)*

7.2.4 The iPP as Demonstrative Pronoun

As attribute to a noun the 3rd person forms may be used as demonstrative pronouns for far deixis. The independent personal pronoun in this function follows the noun it modifies and always has the article.

הָאִישׁ הַהוּא *that man* (Lev 20:4)

הַעִיר הַהִיא *that city* (Josh 20:4)

הָאֲנָשִׁים הַהֵמָּה *those men* (Num 9:7)

This use of the iPP is frequently found in the temporal adverbial phrases **בַּיּוֹם** *on that day* and **בַּיָּמִים הָהֵם** *in those days*.

7.2.5 The iPP in Apposition to an Enclitic Pronoun

The independent personal pronoun may be used in apposition to an enclitic personal pronoun for emphasis:

בְּרַכְנִי גַם־אֲנִי אָבִי *Bless me, too, O my father* (Gen 27:34)

בִּמְקוֹם אֲשֶׁר לָקְקוּ הַכְּלָבִים
אֶת־יָדַיִם נְבוֹת יִלְקוּ הַכְּלָבִים
אֶת־דַּמְךָ גַּם־אֶתָּה
(1 Kgs 21:19)

7.3 The Imperative

7.3.1 The Forms of the Imperative

		fientive	stative
sg.	m.	כָּתֹב	כָּבֹד
	f.	כָּתִבִי	כָּבֹדִי
pl.	m.	כָּתְבוּ	כָּבְדוּ
	f.	כָּתְבֵנָה	כָּבְדֵנָה

Notes

The thematic vowel of the imperative form of a verb is identical to the thematic vowel of the *yiqtol* form of that verb.

There is no *dageš lene* in the third root consonant in the fem. sg. and masc. pl. forms. The *šwa* with the second root consonant is a medial *šwa*.

Pausal forms of the fem. sg. and masc. pl. forms have the same thematic vowel as the masc. sg. form, e.g., כָּתְבִי, כָּתְבוּ, כָּבֹדִי.

If the imperative is followed by *maqqef*, the thematic vowel *holem* is shortened to *qameṣ ḥatuf*, e.g., מְלִיכָהּ-עָלֵינוּ *Reign over us!* (Judg 9:14).

An example of an imperative form of a stative verb is חֲזַק *be strong!* (Josh 1:6). The pausal form of the m. sg. imperative of the stative verb has a lengthened thematic vowel, e.g., חֲזַקֵּךְ *be bold!* (Josh 1:6).

7.3.2 The Imperative of Strong Verbs with Gutturals

		I gutt.		I ^ʔ	II gutt.	III gutt.
sg.	m.	עֲזֹב	חֲזֹק	אֲמַר	בָּחַר	שָׁלַח
	f.	עֲזְבִי	חֲזֹקִי	אֲמָרִי	בָּחַרִי	שָׁלַחִי
pl.	m.	עֲזְבוּ	חֲזֹקוּ	אֲמַרוּ	בָּחַרוּ	שָׁלְחוּ
	f.	עֲזְבֵנָה	חֲזֹקֵנָה	אֲמַרְנָה	בָּחַרְנָה	שָׁלְחֵנָה

Notes

Like the regular verb, verbs I gutt. and I^ʔ distinguish between fientive and stative verbs. An example of an imperative form of a I^ʔ stative verb is אֲמַץ *be*

bold! (Josh 1:7).

Imperative forms of verbs with **ס** as first root consonant are always strong with a consonantal **ס** (unlike the weak verbs I' in the prefix conjugation forms, e.g., **יֹאמֶר**). The thematic vowel is either *holem* or *pataḥ* depending on the verb type as fientive or stative, e.g., **אָמַר** *say!*, **אַמִּץ** *be bold!*

In the fem. sg. and masc. pl. forms, II gutt. verbs have the vowel *pataḥ* with the first root consonant and a *ḥatef šwa* (*ḥatef pataḥ*) with the second root consonant instead of a silent *šwa*.

7.3.3 The Long Form of the Imperative

The imperative masc. sg. may be expanded by attaching the ending *-ā*. This ending is called paragogic **ה**. It occurs about 288 times in the Hebrew Bible. It “has, in general, no appreciable different nuance from the usual form” (JM § 114m). Illustrative forms are: **אֲכַלְהָ** *ʾaklā eat!* (sometimes **מִכְרֶה** *sell!*), **שְׁמַעְהָ** *hear!* (III gutt.).

In pausal forms the ending *-ā* is unaccented and the thematic vowel which is reduced in context forms, is preserved, e.g., **שְׁמַעְהָ** *hear!*.

7.3.4 The Use of the Imperative

The imperative is used mainly for commands and wishes.

שָׁמַר אֶת־הָאִישׁ הַזֶּה	<i>Guard this man</i> (1 Kgs 20:39)
וְעַתָּה שְׁמַע לְקוֹל דְּבָרֵי יְהוָה	<i>And now, listen to the voice of the words of the Lord</i> (1 Sam 15:1)
פָּתְחוּ אֶת־פִּי הַמְעָרָה	<i>Open the mouth of the cave</i> (Josh 10:22)
קַבְּצוּ אֶת־כָּל־יִשְׂרָאֵל הַמִּצְפָּה	<i>Gather all Israel to Mizpah</i> (1 Sam 7:5)

Imperatives may be used with an independent personal pronoun (2nd person) as subject, e.g., **לֵךְ אַתָּה** *Come!* (Judg 9:14).

The imperative may be used for addressing a superior like a king or God without being impolite.

The imperative is never used with a negative. Instead, either the jussive is used with **אַל** (the so-called prohibitive) or the prefix conjugation (*yiqṭol* form) is used with **לֹא** (the so-called vetitive). The prohibitive is usually used for specific negative commands in a certain situation, whereas the vetitive typically occurs

in general prohibitions in legal texts. Either form, however, can be found in contexts where one would expect the other.

אַל־תִּשְׁפֹּךְ דָּם	<i>Do not shed blood</i> (Gen 37:22)
אַל־תִּעֲמֹד	<i>Don't stop</i> (1 Sam 20:38)
לֹא־תִכְרֹת לָהֶם וְלֹא־לֵהֶם בְּרִית	<i>Do not make a covenant with them or their gods</i> (Exod 23:32)

The three volitive forms, the imperative, the jussive and the cohortative, may be followed by the particle **נָא**. The function of **נָא** is not completely clear. It may be indicating a polite request. According to a different interpretation, **נָא** is used if the speaker expects some resistance to the request or command or if the request comes unexpectedly or does not flow from the context. It is advisable to leave **נָא** untranslated.

דְּרִשׁ־נָא כִּיּוֹם אֶת־דְּבַר יְהוָה	<i>Seek first the word of the Lord</i> (1 Kgs 22:5)
---	---

7.4 Nominal Clauses

Clauses without a finite verbal form as predicate are called nominal clauses. The subject is typically a noun or pronoun. Predicates can be nouns, adjectives or prepositional phrases.

If the predicate is indefinite, the nominal clause has descriptive or classifying function.

נַעַר מִצְרַיִם אָנֹכִי	<i>I am a young man from Egypt</i> (1 Sam 30:13)
הָרָה אָנֹכִי	<i>I am pregnant</i> (2 Sam 11:5)

If the predicate is definite, the nominal clause has identifying function.

אֲנִי יוֹסֵף	<i>I am Joseph</i> (Gen 45:3)
אָנֹכִי הָרֹאֶה	<i>I am the seer</i> (1 Sam 9:19)
אָנֹכִי אֱלֹהֵי אַבְרָהָם אָבִיךָ	<i>I am the God of Abraham, your father</i> (Gen. 26:24)

Prepositional phrases can also function as predicate of a nominal clause.

יִהְיֶה אִנֹּכִי עִמָּךְ Behold, I am with you (Gen 28:15)

מִחֲרָן אֲנִיחֵנוּ We are from Haran (Gen 29:4)

The most common unmarked constituent order of nominal clauses is subject–predicate. The reasons for deviating from this constituent order are diverse.

Nominal clauses are timeless. The default location in time is the present. In a past tense context, however, nominal clauses are located in the past. To make past or future reference explicit, forms of the verb *הָיָה* *to be* are used (→ 12.2). Temporal adverbs may serve the same function, e.g., *וּמָחָר אַתָּה וּבָנֶיךָ עִמִּי* *and tomorrow you and your sons will be with me* (1 Sam 28:19).

The independent personal pronoun *הוּא* may be used in nominal clauses as an additional element. Different explanations were presented for this use of *הוּא*. It possibly functions to disambiguate the preceding subject and the predicate.

אַתָּה־הוּא הָאֱלֹהִים You are God (2 Sam 7:28)

7.5 Adjectives

7.5.1 The Use of the Adjective

Adjectives are a subcategory of the noun. Adjectives have have three different functions in Hebrew:

1. As attribute they modify (describe) a noun (2 Sam 14:2).
2. They can be used independently like other nouns (the so-called substantivized use) (Qoh 2:14).
3. They can be used as the predicate of a nominal clause (Jer 8:8).

וַיִּקַּח מִשָּׁם אִשָּׁה חָכְמָה And he took from there a wise woman (2 Sam 14:2)

מִי כְּהָחֲכָם Who is like the wise? (Qoh 8:1)

חָכְמִים אֲנִיחֵנוּ We are wise (Jer 8:8)

Adjective phrases can be expanded with the degree particle *מְאֹד* *very*, e.g., *אִישׁ חָכָם מְאֹד* *a very wise man* (2 Sam 13:3). Sometimes, the preposition *עַד* *up to, until* is added, e.g., *חֲרָדָה גְּדֹלָה עַד־מְאֹד* *a very strong trembling* (Gen 27:33). Originally, *מְאֹד* is a noun meaning *strength, power*.

7.5.2 The Forms of the Adjective

As a subcategory of the noun, adjectives have the same endings except for the fact that they are not used in the dual. Adjectives with changeable vowels follow the rules for vowel reduction for nouns (→ 4.5.4).

	Masculine	Feminine
Singular	Ø טוב	-ā טובה
Plural	-īm טובים	-ōt טובות

7.5.3 Adjectives as Attribute or Predicate

If used as attribute, adjectives follow the noun they modify and must agree with the noun in number and gender. If the modified noun is definite, the adjective takes the article. The following examples illustrate this.

אִישׁ גָּדוֹל	<i>a great man</i> (2 Kgs 5:1)
מְלָכִים גָּדוֹלִים	<i>great kings</i> (Jer 25:14)
אִשָּׁה גְּדוּלָּה	<i>a wealthy woman</i> (2 Kgs 4:8)
מַמְלָכוֹת גְּדוּלוֹת	<i>great kingdoms</i> (Jer 28:8)
הַיָּם הַגָּדוֹל	<i>the great sea</i> (i.e., the Mediterranean Sea) (Josh 23:4)
הַבְּרֶכָה הָעֲלִיּוֹנָה	<i>the upper pool</i> (2 Kgs 18:17)
הַהָרִים הַגְּבוּהִים	<i>the high mountains</i> (Gen 7:19)
הָאֲתוֹת הַגְּדוּלוֹת	<i>the great signs</i> (Josh 24:17)

Note

Agreement is also required in the case of fem. nouns without a fem. ending, e.g., הָעִיר הַגְּדוּלָּה *the great city* (Gen 10:12).

If used as predicate of nominal clauses, adjectives agree with the subject in gender and number.

טוֹבָה הָאֶרֶץ מְאֹד מְאֹד *The land is exceedingly good* (Num 14:7)

7.5.4 Comparative and Superlative

Unlike English or Greek, Hebrew does not have distinct forms to express the comparative (e.g., *higher*) or the superlative (e.g., *highest*). For the comparative, a prepositional phrase with **מִן** is used to indicate the entity with which something is compared; the adjective itself remains unchanged. This is illustrated by the following examples with the adjectives **מֵתוּק** *sweet*, **עָז** *strong* and **צַדִּיק** *righteous*

מִהַּמֵּתוּק מִדְּבַשׁ וּמֵה עָז מֵאַרִּי *What is sweeter than honey and what is stronger than a lion? (Judg 14:18)*
 צַדִּיק אַתָּה מִמֶּנִּי *You are more righteous than I (1 Sam 24:18)*

For the superlative, the adjective is used with the definite article or it is made definite by other means, e.g., a definite dependent noun in a construct chain.

הָעִיר הַקְּרִבָּה אֶל-הַחָלָל *the town that is nearest to the slain man (Deut 21:3)*
 יְהוֹאָחָז קָטָן בְּנָיו *Jehoahaz, his youngest son (2 Chr 21:17)*

If the two entities that are compared are incommensurable, the particle *too* together with a prepositional phrase with *for* may be used in English.

קוּם אֲכַל כִּי רַב מְנַחֵךְ *Get up, eat, for the journey is too much for you (1 Kgs 19:7)*
 הַהֲרָדָה

חֲכָמָה	wisdom (ḥokmā)

Chapter 8

חֵן	<i>favor, grace</i> (gem. noun; with ePP חֵנִי)
חֹשֶׁךְ	<i>darkness</i>
כֶּכֶר	<i>round loaf, talent, vicinity</i> (esp. the region of the Jordan) (fem.)
כַּף	<i>the hollow, flat of the hand, hand, sole (of the foot)</i> (gem. noun; dual כַּפַּיִם)
מַרְאֶה	<i>sight, appearance, vision</i>
סוּס	<i>horse</i>
רֶכֶב	<i>chariotry, chariots</i> (collective), <i>chariot</i> (rare meaning)

8.1.3 Prepositions

אַחֲרֵי	<i>after, behind</i> (local and temporal)
לְפָנֵי	<i>in front of, before</i> (local and temporal) (prep. לְ + פָּנִים)
נֶגֶד	<i>in front of, in sight of, opposite to</i>
עַד	<i>up to, as far as, until</i> (local and temporal)
תַּחַת	<i>under, beneath, instead of, in place of</i>

8.1.4 Other Parts of Speech

לְאמֹר	<i>introduction of direct speech</i> (<i>lē(')mōr</i>)
תָּמִיד	<i>continuously, always</i> (adv.), <i>continuity</i> (noun)

8.2 Nouns with Enclitic Personal Pronouns

Nouns may be combined with enclitic personal pronouns (ePP) to express the idea of possession. They are attached directly to the noun which may then undergo changes in its form (see below), e.g., בֵּיתִי *my house*. Most forms of

8.2 Nouns with Enclitic Personal Pronouns

the enclitic personal pronouns show formal similarities with the corresponding independent personal pronouns.

			ePP	iPP

		f. *-ki >	ךִּי -	אַתְּ	< *ʾatti
	3	m. *-ahu >	וְ -	הוא	
		f.	הָ -	היא	
pl.	1	c.	נוּ -	אֲנֵינוּ	
	2	m.	כֶּם -	אַתֶּם	
		f.	כֵּן -	אַתֶּן	
	3	m.	םָ -	הֵם	
		f.	ןָ -	הֵנָּה	

Enclitic personal pronouns may also express other ideas than possession like the object of an implied action, e.g., **הַמָּסִי** *the wrong done to me* (Gen 16:5).

8.2.1 Singular Nouns with Enclitic Personal Pronoun

With singular nouns, the connecting vowels /ā/ and /ē/ are used for the forms with the 2 f. sg. 3 f. sg. 1 c. pl. and 3 m./f. pl. enclitic pronouns.

			masc.	fem.
1	c.	sg.	סוּסִי <i>my horse</i>	סוּסָתִי <i>my mare</i>

	f. pl.	סוּסְכֶן <i>your horse</i>	סוּסְתֶן <i>your mare</i>
3	m. pl.	סוּסָם <i>their horse</i>	סוּסָתָם <i>their mare</i>
	f. pl.	סוּסָן <i>their horse</i>	סוּסָתָן <i>their mare</i>

Notes about the Form of Enclitic Personal Pronouns on Singular Nouns

1. Distinct pausal forms are only found with the 2 m. sg. enclitic pronoun with singular nouns (סוּסְךָ and סוּסְתְּךָ).
2. The 3 m. sg. enclitic personal pronoun was originally *-hū*. Together with the connecting vowel /a/ the suffix developed on singular nouns from *-āhū* via elision (loss) of the intervocalic /h/ and contraction of the diphthong to its current form: *-āhū* > *-aw* > *-ō*. The spelling of the 3 m. sg. enclitic personal pronoun in Hebrew inscriptions ה- reflects the older form with /h/ before it elision, e.g., [ע]בְדֵה *his servant* (Lachish 2:5). The same spelling is sometimes found in the Hebrew Bible, e.g., the Ketiv אֶהְיֶה with the Qere אֶהְיֶה in Gen 12:8 or הַכֹּל *its entirety* in 2 Sam 2:9.
3. With nouns ending in *segol-he* (e.g., שְׂדֵה) the enclitic pronoun 3 masc. sg. is *-ēhū*, e.g., שְׂדֵהוּ *his field*.
4. With the nouns אָב (cs. st. אָבִי), אָח (cs. st. אָחִי), פֶּה (cs. st. פִּי) the 3 m. sg. enclitic pronoun is either *-hū* or *-w*, e.g., אָבִיהוּ or אָבִיו *ābīw*, אָחִיהוּ or אָחִיו *āhīw*, פִּיהוּ or פִּיו *pīw*.

8.2.2 Plural Nouns with Enclitic Personal Pronoun

With plural nouns with the plural ending *-īm*, the enclitic pronouns are attached to the original form of cs. st. with subsequent vowel contraction in all forms except the forms with 1 c. sg. and 2 f. sg. enclitic pronoun.

	f. pl.	סוּסֵיכֶן <i>your horses</i>	סוסוֹתֵיכֶן <i>your mares</i>
3	m. pl.	סוּסֵיהֶם <i>their horses</i>	סוסוֹתֵיהֶם <i>their mares</i>
	f. pl.	סוּסֵיהֶן <i>their horses</i>	סוסוֹתֵיהֶן <i>their mares</i>

Notes about the Form of Enclitic Personal Pronouns on Plural Nouns

1. The pausal form of plural nouns with the 1 com. sg. enclitic pronoun is סוּסֵי.
2. The 3 m. sg. enclitic personal pronoun with plural nouns is pronounced *-āw* (the ך is *not* pronounced), e.g., יָמָיו *yāmāw his days*. This is often reflected in the phonetic spelling without ך in the Ketiv, e.g., וְאִנְשֵׁי *and his men* (with the Qere וְאִנְשָׁיו) (1 Sam 23:4). This phonetic spelling is already attested in a Hebrew inscription from the early 6th century BCE: אִנְשֵׁי *his men* (Lachish 3:18).
3. With plural nouns with the ending *-ōt* the 3 m. pl. enclitic pronoun may be *-ām*, especially with the noun אָב, e.g., אָבוֹתָם *their fathers* (the form אָבוֹתֵיהֶם is only attested in Late Biblical Hebrew), שְׁמוֹתָם *their names*. With the 3 f. pl. suffix the form שְׁמוֹתֵיהֶן *their names* is attested.

8.2.3 Changes of Nouns with Enclitic Personal Pronouns

Enclitic pronouns are attached to the cs. st. of nouns. This can be clearly seen with feminine nouns with feminine ending.

abs. st.	cs. st.	with ePP	
שִׁפְחָה	שִׁפְחָתָהּ	שִׁפְחָתָהּ	<i>her maidservant</i>
אִשָּׁה	אִשְׁתָּהּ	אִשְׁתִּי	<i>my wife</i>

Vowel changes may happen when an enclitic pronoun is attached, e.g., **יְכָרִי** *my words*. For details see Section 4.5.4.

Enclitic pronouns on nouns ending in *segol-he* are attached to the last root consonant of the noun, **שְׂדֶךְ** *your field*, **שְׂדֶהָ** *her field*, **מִחְנֶהוּ** *his army*.

With geminate nouns, the gemination is restored when enclitic pronouns are attached, e.g., **עַמּוֹ** *his people*.

The noun **יָד** *hand* has *segol* in forms with enclitic pronouns 2 masc. or fem. pl.: **יָדְכֶם**, **יָדֶיהָ** *your hand*.

For irregular nouns with enclitic pronouns see Section 5.2.

8.3 The Participle

8.3.1 The Forms of the Participle Active Qal

The participle in Hebrew is a verbal noun (or verbal adjective) which is inflected for gender and number like the adjective. The participle active Qal has the following forms:

	Masculine	Feminine
Singular	כָּתֹב	כּוֹתֶבֶת
Plural	כּוֹתְבִים	כּוֹתְבוֹת

Notes

1. In the Masoretic Text, the plene spelling of the participle **כוֹתֵב** is much less frequent than the defective spelling **כָּתֹב**.
2. The vowel /ō/ is unchangeable. This vowel developed via the Canaanite sound change $\bar{a} > \bar{o}$: **kātib > kōtēḅ*.
3. The f. sg. form has the alternative form **כּוֹתֶבָה**.
4. Verbs with gutturals show the expected vowel changes: Verbs II gutt. **שֹׁלְחִים**, etc.; verbs III gutt. **שֹׁלְחִים**, **שֹׁלְחָה**.
5. Stative verbs form a participle with the vowel pattern **כָּבֵד** with the forms **כָּבֵד** (masc. sg.), **כָּבֵדִים** (masc. pl.), **כָּבֵדָה** (fem. sg.), **כָּבֵדוֹת** (fem. pl.).

8.3.2 The Forms of the Participle Passive Qal

	Masculine	Feminine
Singular	כָּתוּב	כּוֹתוּבָה
Plural	כּוֹתוּבִים	כּוֹתוּבוֹת

Note

In forms with an ending, the long vowel /ū/ is frequently spelled defectively, e.g., כְּתוּבִים *written, inscribed* (Deut 9:10).

8.3.3 The Use of the Participle

Like the adjective, the participle can be used as attribute, as predicate or substantivized. The same rules for the position of the attribute and the agreement between the governing noun and the attribute apply as for the adjective (→ 7.5.3).

The active participle is basically timeless and indicates progressive (on-going) or – at times – repeated events. Normally, the active participle refers to ongoing events like the English present progressive but it is also used for future events, especially events in the near future. In a past tense context it can also refer to past events. In narratives, the participle is frequently used in circumstantial clauses (with reference to the past).

The participle of the stative verb with the pattern כָּבֵד often functions like a normal adjective, e.g., עַמְּךָ הַכָּבֵד הַזֶּה *this your great people*. But it can also indicate a process, e.g., the participle נִגְדַל in עַד יִגְדַל וְיִלְךָ הָלֹךְ וְיִגְדַל מְאֹד *and the man become wealthier and wealthier, until he was very wealthy* (Gen 26:13).

The passive participle indicates a state that is the result of a preceding action.

Examples of the Attributive Use

In the following examples the participle is used as an attribute to a noun.

עַם בֹּטֵחַ	<i>an unsuspecting people</i> (Judg 18:10)
הָעָם הַיֹּשֵׁב בְּאֶרֶץ	<i>the people that lives in the land</i> (Num 13:28)
מִזְבֵּחַ יְהוָה הַהָרוּס	<i>the demolished altar of the Lord</i> (1 Kgs 18:30)

Examples of the Predicative Use

The predicative use of the participle is illustrated by the following examples.

הִנֵּה-עָם יוֹרֵד מִרְאשֵׁי הַהָרִים	<i>Look, people are coming down from the mountaintops</i> (Judg 9:36)
--------------------------------------	---

רָאָה נָא אֲנִי יוֹשֵׁב בְּבֵית אַרְזִים	<i>See, I am living in a house of cedar</i> (2 Sam 7:2)
בָּרוּךְ יְהוָה אֱלֹהֵי אֲדָנִי אַבְרָהָם	<i>Blessed be the Lord, the God of my master Abraham</i> (Gen 24.27)
וַיִּרְאוּ וַהֲגִידוּ דְלֹתוֹת הַעֲלִיָּה נִעְלֹת	<i>And they saw that the doors of the roof- chamber were locked</i> (Judg 3:24)
רָאִיתִי אֶת־יְהוָה יוֹשֵׁב עַל־כִּסֵּאוֹ	<i>I have seen the Lord sitting on his throne</i> (1 Kgs 22:19)

Examples of the Substantivized Participle

Examples of substantivized participles can be found in the following references.

אָרוּר נָתַן אִשָּׁה לְבִנְיָמִן	<i>Cursed is the one who gives a wife to Ben- jamin</i> (Judg 21:18)
וַיֵּצְאוּ מֵעָלָיו כָּל־הָעֹמְדִים עָלָיו	<i>and all those who were standing beside him went out from him</i> (Judg 3:19)

The Active Participle and its Complements

As a verbal adjective, the participle also has properties of the verb in the sense that it allows certain complements to be connected with it in all its three uses (as attribute, as predicate or substantivized). These can be direct objects and/or indirect objects (Judg 21:18), prepositional objects (1 Kgs 19:5) or local complements (Num 13:29).

אָרוּר נָתַן אִשָּׁה לְבִנְיָמִן	<i>Cursed is the one who gives a wife to Ben- jamin</i> (Judg 21:18)
וַהֲגִידָה מַלְאָךְ נֹגֵעַ בּוֹ	<i>And behold, here an angel touched him</i> (1 Kgs 19:5)
עַמְלֵק יוֹשֵׁב בְּאֶרֶץ הַנֶּגֶב	<i>Amalek is living in the land of the Negev</i> (Num 13:29)

Complements can be connected to the participle in the construct state. This even applies to prepositional phrases (Isa 9:1). Adverbial adjuncts can also be expressed as dependent nouns of participles (1 Kgs 18:19).

גִּזְזֵי צֹאנוֹ	<i>those who were shearing his sheep</i> (Gen 38:12)
יֹשְׁבֵי הָאָרֶץ	<i>the inhabitants of the land</i> (Exod 23:31)
יֹצְאֵי הַתֵּבָה	<i>those going out from the ark</i> (Gen 9:10)
יֹשְׁבֵי בְּאֶרֶץ צִלְמוֹת	<i>those living in the land of deep darkness</i> (Isa 9:1)
אֲכָלֵי שֻׁלְחַן אֵיזֶבֶל	<i>those eating at the Jezebel's table</i> (1 Kgs 18:19)

8.4 Circumstantial Clauses

A circumstantial clause gives background information to the main story line of a narrative text which is constituted by a chain of *wayyiqtol* forms. The circumstantial clause can be a nominal clause (sometimes with the copular verb *היה* *to be*), a clause with a participle or a clause with finite verb as predicate.

Circumstantial clauses can interrupt the main story line (Gen 18:1; 2 Kgs 8:7; Gen 37:24) or they can occur at the beginning of a narrative (or episode or scene) (1 Kgs 13:11). The typical constituent order of circumstantial clauses is subject-predicate.

וַיֵּרָא אֵלָיו יְהוָה בְּאֵלֶי מִמְרָא וְהוּא יֹשֵׁב פֶּתַח-הָאֹהֶל בְּחֹם הַיּוֹם	<i>And the Lord appeared to him at the terebinths of Mamre as he sat in the entrance of the tent in the heat of the day</i> (Gen 18:1)
וַיָּבֹא אֵלִישָׁע דִּמְשֶׁק וּבֶן-הַדָּד מֶלֶךְ-סְרִיָּא חֹלָה	<i>And Elisha came to Damascus at a time when Ben-hadad, king of Syria, was sick</i> (2 Kgs 8:7)
וַיִּקְחוּהוּ וַיִּשְׁלְכוּ אֹתוֹ תְּבִרָה וְהַתֵּבָה רִקָּה אֵין בּוֹ מַיִם	<i>And they took him and threw into the cistern; the cistern was empty, there was no water in it</i> (Gen 37:24)
וַיְהִי אִתּוֹ זָקֵן יֹשֵׁב בְּבֵית-אֵל וַיָּבֹא בְנוֹ	<i>There was an old prophet living in Bethel. Now his son came ...</i> (1 Kgs 13:11)

The circumstantial clause may even interrupt the clause on the main level of the narrative. In this case circumstantial clause is a parenthesis in Hebrew. In the following example the circumstantial clause is located before the direct speech which is the direct object of the verb *וַיֹּאמֶר*.

וַיֹּאמְרוּ לִי הַמֶּלֶךְ וְהַשֹּׁנֵל
יֹשֶׁבֶת אֶצְלוֹ עַד-מָתִי יִהְיֶה
מִהֶלְכְּךָ
And the kings asked me with the queen sitting
next to him, “How long will your journey be?”
(Neh 2:6)

A clause with the structure *wā-X-qatal* that refers to an anterior event can also be classified as a circumstantial clause.

וַיֹּאמְרוּ אַבְשָׁלוֹם וְכָל-אִישׁ
יִשְׂרָאֵל טוֹבָה עֲצַת חוּשִׁי
הָאֲרָכִי מֵעֲצַת אַחִיתֹפֶל
וַיְהִי צִוָּה לְהַפֵּר אֶת-עֲצַת
אַחִיתֹפֶל הַטּוֹבָה
And Absalom and everyone of Israel said,
“The counsel of Hushai the Archite is better
than the counsel of Ahithophel.” But the Lord
had ordained to thwart the good counsel of
Ahithophel (2 Sam 17:14)

9.1 Vocabulary

9.1.1 Verbs

ברח	Q. to run away, flee
דרך	Q. to tread (cf. דֶּרֶךְ way), with קָשָׁת to bend the bow
זעק	Q. to cry, cry out, call
עבר	Q. to pass over, through, by, pass on
צעק	Q. to cry, cry out, call
קרע	Q. to tear
תפש	Q. to lay hold of, seize

9.1.2 Nouns

בגד	garment, clothing
בעל	owner, lord, Baal
זקן	old, old man (הַזִּקְנִים the elders)
חק	statute (pl. חֻקִּים)
ימין	right side, right hand, south
כסא	seat, chair, throne
מגן	shield (pl. מִגְנִים)
ממלכה	kingdom, sovereignty, dominion, reign (cs. st. מַמְלָכָה)
סלע	rock, cliff
עד	witness
עדות	witness, testimony, pl. laws, legal provisions (pl. עֵדוּת; with ePP also עֵדוּתָיו 'ēdwōtāw his legal provisions, etc.)
עצם	bone (m. or f.; pl. עֲצָמוֹת)
קשת	bow (fem.)

Chapter 9

שְׁמאל *left side, left, north (šamō(?)l)*
 שֵׁבֶט *rod, staff, scepter, tribe*

9.1.3 Prepositions

אֵת *with, close to, beside*
 עִם *with, close to, beside*

9.1.4 Other Parts of Speech

אַחֲרֵי־כֵן *afterwards (adv.)*
 בֹּל *not (negative used in poetry)*
 בְּלִי *not; without*
 לְבִלְתִּי *not (negative used with the inf. cs.; לְ + בִלְתִּי)*
 לְכֵן *therefore (לְ + כֵן)*

9.2 Prepositions with Enclitic Personal Pronouns

Prepositions take enclitic pronouns either in their form with singular nouns or in their form with plural nouns.

The following prepositions take singular noun type enclitic pronouns: לְ, בְּ, אֵת (and with *maqqef* אֶת־). The prepositions אֵת and עִם follow the pattern of geminate nouns with enclitic pronouns.

		Prep. לְ	Prep. בְּ	Prep. אֵת	Prep. עִם
1	c. sg.	לִי	בִּי	אֵתִי	עִמִּי, עִמָּדִי
2	m. sg.	לָךְ	בָּךְ	אֵתְךָ	עִמָּךְ
	f. sg.	לְךָ	בְּךָ	אֵתְךָ	עִמָּךְ
3	m. sg.	לוֹ	בוֹ	אֵתּוֹ	עִמּוֹ
	f. sg.	לָהּ	בָּהּ	אֵתָּהּ	עִמָּהּ

9.2 Prepositions with Enclitic Personal Pronouns

		Prep. לְ	Prep. בְּ	Prep. אֶת	Prep. עִם
1	c. pl.	לָנוּ	בָּנוּ	אֵתָנוּ	עִמָּנוּ
2	m. pl.	לָכֶם	בָּכֶם	אֵתְכֶם	עִמָּכֶם
	f. pl.	לָכֶן	בָּכֶן	—	—
3	m. pl.	לָהֶם	בָּהֶם, בָּם	אֵתָם	עִמָּהֶם, עִמָּם
	f. pl.	לָהֶן	בָּהֶן	—	—

Notes

1. The only deviating pausal form is found with the 2 m. sg. enclitic pronouns: לָךְ, בָּךְ, אֵתְךָ and עִמָּךְ instead of the context forms לְךָ, בְּךָ, אֵתְּךָ and עִמָּךְ.
2. With prepositions of the singular noun type different connecting vowels than with the noun are used with the pausal form of the 2 m. sg. enclitic pronoun, the 2 f. sg. enclitic pronoun and the 2/3 m./f. pl. enclitic pronoun.
3. In poetic texts, the form of the 3 m. pl. enclitic pronoun with the preposition לְ is often לָמוּ (53 attestations; mainly in Ps, Isa, Job, Lam).

The prepositions בְּ and מִן have special forms when used with enclitic pronouns. Both prepositions take the enclitic pronouns of the singular noun type. The form of the enclitic pronoun of the 1 c. sg. is יִי-.

The preposition בְּ uses a longer form with some enclitic pronouns. With the exception of forms with 2 and 3 pl. enclitic pronoun, the preposition מִן uses reduplicated forms (**minmin-* > **mimmin-*) to which the enclitic pronoun is attached

- with no change of consonants as in the case of the 1 c. sg. and 1 c. pl. enclitic pronoun forms מִמִּינִי (< **mimmin-nī*) and מִמִּינוּ
- with assimilation of the final /n/ of the reduplicated preposition to the first consonant of the enclitic pronoun as in the 2 m. sg. form pausal form מִמִּינְךָ (< **mimmin-ka*) (the 2 m. sg. context form מִינְךָ and 2 f. sg. form with enclitic pronoun מִינְךָ reflect a further development of this type)
- with assimilation of the initial /h/ of the original form of the enclitic pronoun to the preceding /n/ as in the 3 m. sg. and 3 f. sg. enclitic pronoun forms מִמִּינְהוּ (< **mimmin-hu*) and מִמִּינְהָ (< **mimmin-ha*).

3	m.	sg.	כְּמֹהוּ	מִמֶּנּוּ
	f.	sg.	כְּמוֹהָ	מִמֶּנָּה

3	m.	pl.	כְּהֶם, כְּמוֹהֶם	מִהֶם, מִהֶמָּה
	f.	pl.	כְּהֶן	מִהֶן, מִהֶנָּה

The object marker אֶת has the following forms with enclitic pronouns:

		Sg.	Pl.
1	c.	אֹתִי	אֹתָנוּ
2	m.	אֹתְךָ	אֹתְכֶם
	f.	אֹתְךָ	אֹתְכֶן
3	m.	אֹתוֹ	אֹתָהֶם, אֹתָהֶן
	f.	אֹתָהּ	אֹתָהֶן, אֹתָהֶן

Notes

1. The forms may also be spelled plene; e.g., אֹתִי, אֹתְךָ.
2. The pausal form with the 2 m. sg. enclitic pronoun is אֹתְךָ.

The following prepositions take plural noun type enclitic pronouns: עַל, אֶל, (תַּחְתֵּיהֶם beside the form תַּחְתָּם), אַחֲרֵי, עַד, בֵּין (with the exception of the form תַּחְתָּם beside the form תַּחְתֵּיהֶם) and the compound preposition לְפָנֵי. The forms of the three most frequent prepositions among these are as follows.

			Prep. אֶל	Prep. עַל	Prep. לְפָנַי
1	c.	sg.	אֵלַי	עָלַי	לְפָנַי
2	m.	sg.	אֵלַיְךָ	עָלַיְךָ	לְפָנַיְךָ
	f.	sg.	אֵלַיִךְ	עָלַיִךְ	לְפָנַיִךְ
3	m.	sg.	אֵלָיו	עָלָיו	לְפָנָיו
	f.	sg.	אֵלֶיהָ	עָלֶיהָ	לְפָנֶיהָ
1	c.	pl.	אֵלֵינוּ	עָלֵינוּ	לְפָנֵינוּ
2	m.	pl.	אֵלֵיכֶם	עָלֵיכֶם	לְפָנֵיכֶם
	f.	pl.	אֵלֵיכֶן	עָלֵיכֶן	לְפָנֵיכֶן
3	m.	pl.	אֵלֵיהֶם	עָלֵיהֶם	לְפָנֵיהֶם
	f.	pl.	אֵלֵיהֶן	עָלֵיהֶן	לְפָנֵיהֶן

Note

Forms of the prepositions אֶל and עַל with 2/3 m./f. pl. enclitic pronoun may be spelled defectively. This is particularly frequent with the proposition אֶל, e.g., אֵלֵהֶם.

9.3 The Infinitive Construct

9.3.1 The Form of the Infinitive Construct

Biblical Hebrew has two infinitives, the infinitive construct and the infinitive absolute. They differ in form and usage. As verbal nouns they render the action of the verb as such, e.g., *reading* in *I like reading*.

The infinitive construct of fientive verbs has the following forms:

	Reg. verb	I gutt.	I ʾ	II gutt.	III gutt.
inf. cs.	כָּתַב	עָזַב	אָסַר	בָּחַר	שָׁלַח

Stative verbs have the forms כָּבֵד or כְּבֵד *to be heavy*, קָטַן *to be small* and חָזַק *to be strong*.

The inf. cs. of the stative verb שָׁכַב *to lie down* is שָׁכַב or שָׁכַב. The form שָׁכַב occurs thirteen times with or without enclitic pronoun whereas the form שָׁכַב is

attested only four times and is used only with enclitic pronouns. Otherwise, the form **כְּתֹב** for the inf. cs. of stative verbs is rare.

When followed by *maqfēf*, the *holem* is shortened to *qameṣ ḥatuf* **כְּתֹב־** *kəṭəḇ*.

When the second root consonant is a *bəḡadkəfat* letter, the inf. cs. with the prefixed prepositions **בְּ** and **כְּ** is usually **בְּכָתֹב** and **כְּכָתֹב**, respectively, without *dageš lene* in the second root consonant. But with the preposition **לְ** it is **לְכָתֹב** with *dageš lene* in the second root consonant.

9.3.2 The Infinitive Construct with Enclitic Pronouns

With enclitic pronouns the infinitive construct has the following forms.

	Sing. Pron.	Pl. Pron.
1 c.	כְּתִבִּי / כְּתִבְנִי	כְּתִבְנוּ
2 m.	כְּתִבְךָ / כְּתִבְךָ	כְּתִבְכֶּם / כְּתִבְכֶּם
2 f.	כְּתִבְךָ	
3 m.	כְּתִבּוּ	כְּתִבֵּם
3 f.	כְּתִבְהֶן	

Notes

1. The *qameṣ* with the first root consonant is a *qameṣ ḥatuf*, e.g., **שְׁלַחִי** *šəllāḥī* *my sending*. Likewise, when the *qameṣ* is with the second root consonant, it is a *qameṣ ḥatuf* as well, e.g., **אֲכַלְכֶּם** *ʾəḵəlḵæm* *your eating*.
2. There are two distinct forms of the 1 c. sg. enclitic pronoun. In the form **כְּתִבִּי** the enclitic pronoun expresses the subject of the infinitive construct whereas in the form **כְּתִבְנִי** the enclitic pronoun expresses the object, e.g., **לְשֹׁכְנִי** *ləšəḵəṇī* *that I might dwell* (Exod 29:46), **לְלַכְדִּנִּי** *ləlḵəḏnī* *to capture me* (Jer 18:22). All other suffixes can either express either the subject of the infinitive construct or the object.
3. Instead of *qameṣ ḥatuf*, the vowel *hireq* is sometimes found with the first root consonant, e.g., **שִׁבְרִי** *šəḇrī* *my breaking*. The vowel *hireq* is also used for the inf. cs. with the thematic vowel /a/ **כְּתֹב**, e.g., **שִׁכְבָּהּ** *šəḵḇāḥ* *her lying* (Gen 19:33).

9.3.3 The Use of the Infinitive Construct

The Infinitive Construct as a Verbal Noun

The infinitive construct can be used just like regular nouns as subject (1 Sam 15:22) or object of the clause (Deut 2:7). The infinitive construct may be used as it is or it may be preceded by the preposition ל (1 Sam 15:22). It is also used as the dependent noun in a construct chain (Ruth 1:1).

הִנֵּה שְׁמוֹעַ מִזֶּבַח טוֹב לְהִקְשִׁיב מִחֶלֶב אֵילִים	<i>Obeying is better than sacrifice; listening [is better] than the fat of rams (1 Sam 15:22)</i>
יָדַע לְכַתֹּף אֶת־הַמִּדְבָּר הַגָּדֹל הַזֶּה	<i>He knows your walking through this great desert (Deut 2:7)</i>
וַיְהִי בִימֵי שְׁפָט הַשְּׁפָטִים וַיְהִי רָעַב בְּאֶרֶץ	<i>In the days of the ruling of the judges there was a famine in the land (Ruth 1:1)</i>

The Infinitive Construct with Prepositions in Adverbial Constructions

With the preposition ל the infinitive construct is frequently used as final or consecutive adjunct (Gen 37:25; 1 Kgs 16:2) or as modal adjunct *by doing so* (Deut 6:2).

וַיֵּשְׁבוּ לֶאֱכֹל־לֶחֶם	<i>And they sat down to eat food (Gen 37:25)</i>
וַתַּחַטֵּא אֶת־עַמִּי יִשְׂרָאֵל לְהַכְעִיסֵנִי בְּחַטָּאתָם	<i>And you made my people Israel sin so that they provoked me to anger with their sins (1 Kgs 16:2)</i>
לְמַעַן תִּירָא אֶת־יְהוָה אֱלֹהֶיךָ לְשֹׁמֵר אֶת־כָּל־חֻקֹּתָיו וּמִצְוֹתָיו	<i>... that you may fear the Lord your God by keeping all his statutes and his commandments (Deut 6:2)</i>

With the prepositions ב and כ the infinitive construct is used frequently as temporal adjunct.

וַיְהִי בִּבְרֹחַ אֲבִיתָר
בֶּן־אֲחִימֶלֶךְ אֶל־דָּוִד קֶעֱלָה
אֶפֻּד יָרַד בְּיָדוֹ
When Abiathar the son of Ahimelech fled to David to Keilah, an ephod came down in his hand. (1 Sam 23:6)

כַּשְׁמָעַ עֲשׂוֹ אֶת־דְּבָרֵי אָבִיו
וַיִּצְעַק צָעָקָה גְּדֹלָה וּמָרָה
עַד־מָאֵד
When Esau heard the words of his father, he cried out with a very loud and bitter cry (Gen 27:34)

With the preposition **בְּ** the infinitive construct also may have modal or causal meaning (cf. ESV for the causal translation of the infinitive with **בְּ** in 1 Kgs 18:18).

לֹא עָכַרְתִּי אֶת־יִשְׂרָאֵל כִּי
אִם־אַתָּה וּבֵית אָבִיךָ
בַּעֲזֹבְכֶם אֶת־מִצְוֹת יְהוָה
It is not I who have brought trouble on Israel, but you and your father's House, by forsaking the commandments of the Lord (1 Kgs 18:18 NJPS)

The preposition **מִן** together with the infinitive construct may have (negative) consecutive (1 Sam 8:7), causal (Deut 7:8) or temporal meaning (Lev 9:22).

כִּי־אֲתִי מֵאִסּוֹ מִמֶּלֶךְ עָלֵיהֶם
... for it is me whom they have rejected so that I am not king over them anymore (1 Sam 8:7)

כִּי מֵאַהֲבַת יְהוָה אֶתְכֶם
וּמִשְׁמֵרוֹ אֶת־הַשְּׁבָעָה אֲשֶׁר
נִשְׁבַּע לְאַבְתִּיכֶם הוֹצִיא יְהוָה
אֶתְכֶם בְּיָד חֲזָקָה
For because the Lord loved you and because he kept his oath that he had sworn to your fathers, he led you out with a strong hand (Deut 7:8)

וַיֵּרֶד מֵעֵשֶׂת הַחַטָּאת וְהַעֲלָה
וְהַשְּׁלָמִים
... and he stepped down after having sacrificed the sin offering, the burnt offering, and the offering of well-being (Lev 9:22)

The Infinitive Construct as Complement

With some verbs the infinitive construct is used as a complement (usually with the preposition **לְ** and at times without). The verbs **יָכַל** *to be able*, **חָדַל** *to cease* and **נָתַן** in the meaning *to allow, permit* can be mentioned here.¹

¹ The verb **יָכַל** is a stative verb with the vowel /ō/ as thematic vowel in the suffix conjugation. For the other forms of the verb → 13.2.

וְלֹא־יָכְלוּ עוֹד לַעֲמֹד לִפְנֵי אֹיְבֵיהֶם	And they could not stand any longer before their enemies (Judg 2:14)
וַיַּחֲדְלוּ לְבִנֵּת הָעִיר	And they stopped building the city (Gen 11:8)
וְלֹא־נָתַנוּ אִישׁ לַעֲבֹר	And they did not allow anyone to cross (Judg 3:28)

Other verbs that take infinitives as complements are: **מֵאֵן** Q. *to be willing*, **כָּלָה** Pi. *to refuse*, **כָּלָה** Pi. *to finish*, **חָלַל** Hi. *to begin*. These verbs will be introduced in later chapters because they are weak verbs and/or are used in a different *binyan* than Qal.

With some verbs the preposition **בְּ** can be used instead of **לְ**, e.g., **כָּלָה** Pi. *to finish* and **חָדַל** Q. *to cease*, *stop*.

The use of the infinitive construct with so-called modifying verbs will be discussed in Chapter 23.

9.4 The Infinitive Absolute

9.4.1 The Form of the Infinitive Absolute

The infinitive absolute Qal has the following form:

inf. abs. **כָּתוּב**

The inf. abs. may be spelled defectively, e.g., **אָכַל**. With a guttural as third root consonant the form is **שָׁלַח**.

9.4.2 The Use of the Infinitive Absolute

The inf. abs. is not used with prepositions, enclitic pronouns or as the governing noun in a construct chain. This fact explains the term *infinitive absolute* as opposed to the term *infinitive construct*. The following three main functions of the inf. abs. can be mentioned.

The Intensifying Use of the Infinitive Absolute

Together with another verb form of the same root the inf. abs. is used to intensify the verbal content or the meaning of the other verbal form or the nuance in its

context or a combination of all these.² Usually the inf. abs. is used in the same *binyan* as the other verbal form; but sometimes it can be in a different *binyan*. The following functions can be found frequently:

1. In positive statements, the inf. abs. can be used to intensify the factuality of the statement (Gen 37:33; Gen 18:18).
2. In negative statements the inf. abs. stresses the non-realization of the event (Gen 3:4; Dan 10:3).
3. In rhetorical questions the inf. abs. denies the realization of the event (2 Kgs 18:33).³
4. The inf. abs. intensifies the modal meaning of a verbal form (Num 35:16; Lev 7:24).

חַיָּה רָעָה אֲכָלְתָּהּ וְטָרַף טָרַף יוֹסֵף	<i>A fierce animal has devoured him. Joseph has surely been torn to pieces. (Gen 37:33)</i>
וְאַבְרָהָם הָיָה יְהוָה לְגוֹי גָּדוֹל וְעָצוּם	<i>Abraham will surely become a great and mighty nation. (Gen 18:18)</i>
לֹא־מוֹת תִּמָּתוֹן	<i>You will definitely not die. (Gen 3:4)</i>
וְסוּךְ לֹא־סָכַתִּי	<i>I did not even anoint myself. (Dan 10:3)</i>
הֲהִצִּיל הַצִּילוֹ אֱלֹהֵי הַגּוֹיִם אִישׁ אֶת־אֶרְצוֹ מִיַּד מֶלֶךְ אֲשׁוּר	<i>Did any of the gods of the nations save his land from the hand of the king of Assyria? (2 Kgs 18:33)</i>
מוֹת יוֹמֵת הָרָצָח	<i>The murderer must be put to death. (Num 35:16)</i>
וְחֵלֶב נֹבֵלָה וְחֵלֶב טָרֵפָה יַעֲשֶׂה לְכָל־מְלָאכָה וְאָכַל לֹא תֹאכְלֶהּ	<i>The fat of an animal that is dying of itself, or of a torn animal may be used for any use, but you must certainly not eat it (Lev 7:24)</i>

The Infinitive Absolute as Verbal Predicate

The inf. abs. can be used as a replacement for a finite form. It can either continue a preceding finite verbal form in which case it has the same function (Judg

² Jan P. Lettinga and Heinrich von Siebenthal, *Grammatik des biblischen Hebräisch*, 2nd ed. revised and expanded by Heinrich von Siebenthal (Gießen: Brunnen; Basel: Immanuel, 2016), 337.

³ Christo H. J. van der Merwe, Jacobus A. Naudé and Jan H. Kroeze, *A Biblical Hebrew Reference Grammar*, 2nd ed. (London: Bloomsbury, 2017), 179.

7:19) or it can be used without a preceding verbal form. In this case it often replaces an imperative (Exod 20:8; Jer 2:2) or a different finite verbal form (רָגַם in Num 15:35).

וַיִּתְּקֵנוּ בְּשׁוֹפָרוֹת וַנִּפֹּץ הַכִּדִּים אֲשֶׁר בְּיָדָם	<i>They blew the horns and smashed the jars that were in their hands (Judg 7:19)</i>
זָכוֹר אֶת־יוֹם הַשַּׁבָּת לְקֹדֶשׁ	<i>Remember the sabbath day by keeping it holy (Exod 20:8)</i>
הֲלֹךְ וְקִרְאתָ בְּאָזְנֵי יְרוּשָׁלַם	<i>Go and proclaim in the hearing of Jerusalem (Jer 2:2)</i>
מוֹת יוֹמָת הָאִישׁ רָגַם אֹתוֹ בָּאֲבָנִים כָּל־הָעֵדָה מִחוּץ לַמַּחֲנֶה	<i>The man must be put to death, the whole congregation shall stone him with stones outside of the camp (Num 15:35)</i>

Two Consecutive Infinitives Absolute

When the inf. abs. is used after a finite form of the same verb together with another coordinated inf. abs., the two infinitives express the idea that the two events happened simultaneously (or nearly simultaneously).

וַיִּרְדֵּהוּ אֶל־כַּפְּיוֹ וַיִּלֶּךְ הָלוֹךְ וַאֲכַל	<i>He scraped it [the honey] out into his hands and ate as he went along (Judg 14:9)</i>
וְכָל־הָעָם אֲשֶׁר־אִתּוֹ חָפוּ אִישׁ רֹאשׁוֹ וָעָלוּ עָלָה וּבָכָה	<i>...and all the people with him had covered their heads and they went up, weeping as they went (2 Sam 15:30)</i>

The inf. abs. הָלַךְ may be used together with a finite form and the infinite absolute of another verb to express the idea that an event took place continually or increasingly. (In 2 Sam 5:10 even the finite verb is a form of הָלַךְ leaving the inf. abs. גָּדוֹל to express the main meaning *to become greater*.)

וַיֵּסַע אַבְרָם הָלוֹךְ וְנִסְעָה הַנֶּגֶב	<i>And Abram journeyed by stages to the Negeb (Gen 12:9)</i>
וַיִּלֶּךְ דָּוִד הָלוֹךְ וְגָדוֹל	<i>And David became greater and greater (2 Sam 5:10)</i>

מְעַט	<i>a little, fewness, a few</i>
רַק	<i>only, still, but, however, nevertheless, surely</i>

10.2 The waw-Suffix Conjugation or *wəqatalṭi* Form

10.2.1 The Forms of the waw-Suffix Conjugation

The waw-suffix conjugation or *wəqatalṭi* form consists of the forms of the suffix conjugation with an obligatory conjunction וְ called *waw consecutive* (cf. 6.2.5). The only formal difference to the regular suffix conjugation (→ 5.5.1) is the position of the stress in the forms 2 m. sg. and 1 c. sg.

sg.	3 m.	וְכָתַב
	3 f.	וְכָתְבָה
	2 m.	וְכָתַבְתָּ
	2 f.	וְכָתַבְתְּ
	1 c.	וְכָתַבְתִּי
pl.	3 c.	וְכָתְבוּ
	2 m.	וְכָתְבוּם
	2 f.	וְכָתְבוּן
	1 c.	וְכָתְבוּנוּ

10.2.2 The Use of the waw-Suffix Conjugation

The *wəqatalṭi* form typically continues a preceding verbal form or a temporal adverbial expression. It is, however, possible that *wəqatalṭi* is used without

10.2 The waw-Suffix Conjugation or *wəqataltí* Form

a semantically similar or identical preceding verb (cf. *wəqataltí* with modal meaning as in Judg 11:8; Jer 28:13; Ezek 11:17; Ezek 25:13; following a causal clause as in 1 Kgs 20:28; with reference to the past following a *wayyiqtol* form as in 1 Sam 7:16).

wəqataltí often follows *yiqtol* and has the same meaning as the preceding *yiqtol*. A possible semantic difference between the two forms may be that *wəqataltí* adds the idea of sequence of events *then ... and then ...*, whereas *yiqtol* simply expresses its meaning as such. The *wəqataltí* form may then refer to future events (1 Sam 17:32), to iterative or durative situations in the past (1 Sam 2:19; 1 Sam 16:23) or to general truths (Gen 2:24).

עֲבֹדָה יֵלֶךְ וְנִלְחָם עִם־הַפְּלִשְׁתִּי הַזֶּה	<i>Your servant will go and fight with this Philistine (1 Sam 17:32)</i>
וּמַעִיל קָטָן תַּעֲשֶׂה־לוֹ אָמוֹ וְהַעֲלֵתָהּ לוֹ מִיָּמִים יְמִימָה בַּעֲלוּתָהּ אֶת־אִשָּׁה לִזְבֹּחַ אֶת־זִבְחַ הַיָּמִים	<i>And his mother used to make him a little robe and bring it up to him every year when she went up with her husband to offer the yearly sacrifice (1 Sam 2:19)</i>
וְהָיָה בְּהֵיוֹת רוּחַ־אֱלֹהִים אֶל־שָׁאוּל וְלָקַח דָּוִד אֶת־הַכֶּנּוֹר וַיִּנָּן בְּיָדוֹ וְרוּחַ לְשָׁאוּל וטוֹב לוֹ וְסָרָה מֵעָלָיו רוּחַ הָרָעָה	<i>And whenever the spirit from God came to Saul, David would take the lyre and play it with his hand and Saul would feel himself relieved and it would be well with him and the evil spirit would depart from him (1 Sam 16:23)</i>
עַל־כֵּן יַעֲזֹב־אִישׁ אֶת־אָבִיו וְאֶת־אִמּוֹ וְדָבַק בְּאִשְׁתּוֹ וְהָיוּ לְבָשָׁר אֶחָד	<i>Therefore a man will leave his father and his mother and cling to his wife and they shall be one flesh (Gen 2:24)</i>

A *wəqataltí* form can follow a participle (Exod 17:6), an inf. cs. (Ruth 3:4), or a temporal adverbial expression (Exod 17:4). The verbal form may have modal meaning as in the case of *wəqataltí* following a volitive form.

הִנְנִי עֹמֵד לְפָנֶיךָ שָׁם עַל־הַצּוּר בְּחֹרֵב וְהָכִיתָ בַּצּוּר וַיֵּצְאוּ מִמֶּנּוּ מַיִם וְשָׁתָה הָעָם	<i>I will be standing before you on the rock at Horeb and you shall strike the rock and water will come out from it and the people will drink (Exod 17:6)</i>
וַיְהִי בְשָׁכְבוֹ וַיֵּדַעַתָּ אֶת־הַמָּקוֹם אֲשֶׁר יִשְׁכַּב־שָׁם	<i>When he lies down, note the place where he lies down (Ruth 3:4)</i>

עוד מעט וסקלני *A little more and they will stone me* (Exod 17:4 NAB)

wəqataltí can follow a volitive form (i.e., imperative, jussive, cohortative). *wəqataltí* has the modal meaning of the preceding verbal form (2 Kgs 9:1b-2).

חגור מתניך וקח פך השמן
הזה בידך ולך רמת גלעד
ובאת שמה וראה-שם יהוא
בן-יהושפט בן-נמשי ובאת
והקמתו מתוך אחיו והביאת
אתו חדר בחדר *Gird up your loins, take this flask of oil in your hand and go to Ramoth-gilead. And look there for Jehu, the son of Jehoshaphat, son of Nimshi and enter and raise him from the midst of his fellows and bring him to an inner chamber* (2 Kgs 9:1b-2)

It is possible, however, that *wəqataltí* is used with volitive meaning without a preceding volitive form (Judg 11:8).

לכן עתה שבנו אליך
והלכת עמנו ונלחמת בבני
עמון והיית לנו לראש לכל
ישיבי גלעד *Therefore, now that we have returned to you, go with us and fight against the Ammonites and become for us the leader, for all inhabitants of Gilead* (Judg 11:8)

As the *wəqataltí* form has to appear at the beginning of the clause without any preceding element, *yiqtol* has to be used whenever an element is placed before the verb (e.g., the negative לא or a constituent of the clause).

ויעקתם ביום ההוא מלפני
מלככם אשר בחרתם לכם
ולא-יענה יהוה אתכם ביום
ההוא *... and you shall cry out on that day because of your king which you have chosen for yourselves, but the Lord will not answer you on that day* (1 Sam 8:18)

10.3 Enclitic Personal Pronouns on Verbal Forms

10.3.1 Analytic and Synthetic Constructions

Biblical Hebrew has two ways of connecting a pronoun as direct object to a verb. Either the object marker with an enclitic pronoun can be used (2 Kgs 10:35) or the enclitic pronoun can be attached to the verbal form directly (2 Kgs 13:9).

10.3 Enclitic Personal Pronouns on Verbal Forms

וַיִּקְבְּרוּ אֹתוֹ בְּשֶׁמְרוֹן *And they buried him in Samaria* (2 Kgs 10:35)

וַיִּקְבְּרֵהוּ בְּשֶׁמְרוֹן *And they buried him in Samaria* (2 Kgs 13:9)

These two clauses have the same meaning. The choice between the two constructions is purely stylistic. Overall, the synthetic construction with the enclitic pronoun directly attached to the verb is more frequent than the analytic construction with the object marker *אֹת*. An important difference between the two constructions is that the analytic construction makes fronting of the pronominal direct object possible (2 Sam 2:7).

כִּי־מֵת אֲדֹנֵיכֶם שָׂאוּל
וְגַם־אֲתִי מָשְׁחוּ בֵּית־יְהוּדָה
לְמֶלֶךְ עֲלֵיהֶם *... for your lord Saul is dead and the House of Judah have already anointed me king over them* (2 Sam 2:7 NJPS)

10.3.2 The Forms of the Enclitic Personal Pronoun on Verbs

The enclitic pronouns on verbs are very similar to their counterparts on the infinitive construct or the noun. If a connecting vowel is used, it is /a/ (*pataḥ*) or /ā/ (*qameṣ*) with the suffix conjugation and /ē/ (*ṣere*) with the prefix conjugation and the imperative.

		Suffix	SC	PC	
sg.	1 c.	-nī	שָׁמְרָנִי	יִשְׁמְרָנִי	יִשְׁמְעָנִי
	2 m.	-kā	שָׁמְרָךְ	יִשְׁמְרָךְ	יִשְׁאָלְךָ
	2 f.	-k	שָׁמְרִי	יִשְׁמְרִי	יִנְאָלְךָ
	3 m.	-ō/-hū	שָׁמְרוּ	יִשְׁמְרוּ	יִשְׁפָּחֻהוּ
	3 f.	-āh/-hā	שָׁמְרָהּ	יִשְׁמְרָהּ	יִקְרָעָהּ
וַיִּשְׁמְרֵהָ					
pl.	1 c.	-nū	שָׁמְרָנוּ	יִשְׁמְרָנוּ	יִפְגְּעֵנוּ
	2 m.	-kæm	שָׁמְרָכֶם*	יִשְׁמְרָכֶם*	יִשְׁאָלְכֶם*
	2 f.	*-kæn			
	3 m.	-m	שָׁמְרָם	יִשְׁמְרָם	יִמְאָסֵם
	3 f.	*-n			

Notes

In PC forms with thematic vowel /ō/ (*holem*), the thematic vowel is usually reduced before the ePP while the thematic vowel /a/ is preserved as /ā/ (*qameš*). In the 3 m. sg. PC form with ePP 2 m. sg. the *holem* is shortened to *qameš ḥatuf*: יִשְׁמְרֵךְ *yišmōrkā*.

In verbs with gutturals, the expected changes occur, i.e., *ḥatef šwa* instead of simple *šwa*, e.g., עָבַדְךָ *he served you* (Deut 15:18), מָשַׁחְךָ *he has anointed you* (1 Sam 10:1).

The ePP 3 m. sg. -ō is the result of the development from -āhū via elision (loss) of the intervocalic /h/ and contraction of the diphthong to its current form: -āhū > -aw > -ō.

Forms of the verb with ePP 2 f. pl. are not attested in the Hebrew Bible. The ePP would have been -kæn כְּנִי.

The enclitic pronoun 3 f. pl. is -n ךְּ- (with connecting vowel, if needed). Forms are analogous to the forms with ePP 3 m. pl.

With verbal forms other than the 3 m. sg. the following differences can be observed:

1. In verbal forms ending with a long vowel there is no need for a connecting vowel.
 - a) Verbal form 1 c. sg. SC: מָשַׁחְתִּי *I anointed him* (with elision of the intervocalic /h/ -tīhū > tīw); עָבַדְתִּיךָ *I served you*; נָתַתִּיךָ *I gave her*; שָׁלַחְתִּים *I have sent them*
 - b) Verbal form 3 c. pl. SC: עָבְדוּהוּ *they served him*; רָדְפוּךָ *they pursued you*
 - c) Verbal form 1 c. pl. SC: רָדַשְׁנוּהוּ *we sought him*
 - d) Verbal form 3 m. pl. PC: יִרְנְמוּהוּ *they shall stone him*
 - e) Verbal form 2 f. sg. PC: וַתִּזְבְּחִים *and you sacrificed them*
2. In verbal forms 2 f. sg. SC the original suffix -tī is preserved: יָלַדְתִּנִּי *you bore me*, נָתַתִּיךָ *you gave it*, מָצַאתִים *you found them*
3. In verbal forms 3 f. sg. SC the original suffix /t/ is preserved
 - a) ePP 1 c. sg.: יָלַדְתִּנִּי *she gave birth to me*
 - b) ePP 3 m. sg.: הִרְגָּתוּהוּ *she killed him*; יָלַדְתוּהוּ *she gave birth to him* (with assimilation of the /h/ to the /t/ *-athu > -attū)
 - c) ePP 3 f. sg.: אָחַזְתָּהּ *it has taken hold of her* (with assimilation of the /h/ to the /t/ *-athā > -attā)

- d) ePP 1 c. pl.: מְצֹאֲתָנוּ *it found us*
e) ePP 3 m. pl.: גָּנְבָתָם *she stole them*
4. In verbal forms 2 m. sg. SC with the suffix *-tā* and an ePP 3 m. sg. contraction happens, e.g., יָדַעְתָּו *you know him* < *-tō* < **-taw* < **-tahū* (with elision of the intervocalic /h/ and following contraction). Other enclitic pronouns simply follow the suffix *-tā*, e.g., נָטַשְׁתָּנִי *you have permitted me*, עָזַבְתָּם *you forsook them*, שָׁלַחְתָּנוּ *you sent them*.
5. In verbal forms 2 m. pl. SC the suffix is *-tū* instead of *-tæm*: הָעֵלִיתָנוּ *you have brought us up* (2 m. pl. SC Hiphil עָלָה with ePP 1 c. pl.).

10.3.3 The Enclitic Personal Pronoun with Energetic Nun

In a number of cases an additional נ is used between the verbal form and the enclitic pronoun. This נ is called *energetic Nun* and is considered a residue of an early energetic mode (→ 6.2.2). It is almost always used in PC forms without suffix. Instances of the energetic Nun with the jussive, the *wayyiqṭol* form or the imperative are infrequent. The energetic Nun does not change the meaning of the form when compared to the forms without. The following forms of the ePP with energetic Nun are attested.

sg.	3 m.	יִשְׁמְרֶנּוּ
	3 f.	יִשְׁמְרֶנָּה
	2 m.	יִשְׁמְרֶךָ
	1 c.	יִשְׁמְרֶנִּי
pl.	1 c.	יִשְׁמְרֶנּוּ

Notes

The gemination of the /n/ in the forms with 3 m./f. sg. ePP is the result of assimilation of the /h/ of the ePP to the preceding /n/: *-ænnū* < **-ænhū* and *-ænnā* < **-ænhā*, respectively.

The gemination of the /n/ in the forms with 2 m. sg. ePP is the result of assimilation of the /n/ to the following /k/ of the ePP: *-ækkā* < **-ænkā*.

In forms of the PC with the thematic vowel /a/, the vowel is preserved as *qameṣ*, e.g., יִשְׁמְעֶךָ *he will hear you*.

10.4 Existential Clauses

To make statements about the existence or non-existence of somebody or something Hebrew uses the particles **יֵשׁ** *there is* and **אֵין** *there is not* which is used in the cs. st. **אֵין** most of the time.

וַיֵּרָא יַעֲקֹב כִּי יֵשׁ שָׂבָר בְּמִצְרַיִם	<i>And Jacob saw that there was grain in Egypt</i> (Gen 42:1)
יְבֹאֲנָא אֵלַי וְיָדַע כִּי יֵשׁ נָבִיא בְּיִשְׂרָאֵל	<i>Let him come to me, that he may know that</i> <i>there is a prophet in Israel</i> (2 Kgs 5:8)
וַיִּקְחֻהוּ וַיִּשְׁלְכוּ אוֹתוֹ הַבְּרֶחַ וַהֲבֹור רֶק אֵין בּוֹ מַיִם	<i>And they took him and threw him into the</i> <i>cistern; the cistern was empty, there was no</i> <i>water in it</i> (Gen 37:24)
וַיִּפֶן כֹּה וְכֹה וַיֵּרָא כִּי אֵין אִישׁ	<i>And he turned this way and that way and saw</i> <i>that there was no one</i> (Exod 2:12)

With the preposition **לְ**, the particle **יֵשׁ** expresses the idea that somebody possesses something or something is available to somebody. For the negation of these ideas, the **אֵין** is used.

וַיֹּאמֶר עֲשׂוּ יִשְׁ-לִי רֶב אַחֵי	<i>And Esau said, "I have plenty, my brother"</i> (Gen 33:9)
וְיָדְעוּ כָּל-הָאָרֶץ כִּי יֵשׁ אֱלֹהִים לְיִשְׂרָאֵל	<i>... so that all the earth may know that Israel</i> <i>has a God</i> (1 Sam 17:46)
וַתְּהִי שָׂרַי עֲקָרָה אֵין לָהּ וָלֵד	<i>Sarai was barren; she did not have a child</i> (Gen 11:30)
וַתֹּאמֶר אֵין לִשְׁפָחָתִי כָּל בֵּית כִּי אִם-אֶסֹד שֶׁמֶן	<i>And she said, "Your maidservant does not</i> <i>have anything in the house except a flask of</i> <i>oil"</i> (2 Kgs 4:2)

10.5 Particles with Enclitic Personal Pronouns

A number of particles can be used with enclitic pronouns. In some forms, an additional **נ** is found which is similar to the energetic Nun with verbal forms.

		הֵנָּה	יֵשׁ	אֵין	עוֹד
sg.	1 c.	הֵנָּנִי/הֵנָּנִי		אֵינָנִי	עוֹדִי/עוֹדָנִי
	2 m.	הֵנָּךְ	יֵשְׁךָ	אֵינָךְ	עוֹדְךָ
	2 f.	הֵנָּךְ		אֵינָךְ	עוֹדְךָ
	3 m.	הֵנוּ	יֵשְׁנוּ	אֵינָנוּ	עוֹדָנוּ
	3 f.			אֵינָנָה	עוֹדָה/עוֹדָנָה
pl.	1 c.	הֵנָּנוּ/הֵנָּנוּ		אֵינָנוּ	
	2 m.	הֵנְכֶם	יֵשְׁכֶם	אֵינְכֶם	
	3 m.	הֵנָּם		אֵינָם	עוֹדָם

Notes

Distinct pausal forms are הֵנָּנִי (ePP 1 c. sg.), הֵנָּךְ (ePP 2 m. sg.), הֵנָּנוּ (ePP 1 c. pl.).

Alternative forms are הֵנָּה (Jer 18:3 Ketiv) instead of הֵנוּ and יֵשְׁכֶם (Deut 13:14) instead of יֵשְׁכֶם.

10.6 Negative Nominal Clauses

In order to form negative nominal clauses, Hebrew uses the negative אֵין or, more frequently, its cs. st. form אֵין. The negative לֹא, however, is also used for this purpose.

אֵל-תַּעֲלוּ כִּי אֵין יְהוָה בְּקִרְבְּכֶם	<i>Do not go up, for the LORD is not in your midst (Num 14:42)</i>
כִּי אֲנֹכִי מֵת בְּאֶרֶץ הַזֹּאת אֵינָנִי עֹבֵר אֶת-הַיַּרְדֵּן	<i>For I am about to die in this land; I won't cross the Jordan (Deut 4:22)</i>
לֹא-עֵת הָאֶסֶף הַמִּקְנֶה	<i>It is not the time for the livestock to be gathered (Gen 29:7)</i>
לֹא אִישׁ בְּשָׂרָה אַתָּה הַיּוֹם הַזֶּה	<i>You are not a man of news today (2 Sam 18:20)</i>

 תורה *instruction*

11.1.3 Other Parts of Speech

אף *also, even (adv.)*

11.2 Weak Verbs in Biblical Hebrew

Strong verbs are verbs that have three root consonants in all *all* their forms. Weak verbs, on the other hand, are verbs that do not have three root consonants in all their forms, either because one of the three root consonants is weak and prone to be lost or because they do not have more than two root consonants.

The weak root consonant can be found in first position in the root or in third position. Verbal roots with two weak root consonants are called *doubly weak* verbs. Verbal roots with a vocalic element in the middle as weakness – the II w/y verbs in the table below – are verbs with only two root consonants. These verbal roots are also called *hollow roots*. The geminate verb with a doubled second root consonant is a case apart.

The classes of weak verbs are identified by different names in Hebrew grammars. The Hebrew designation of weak verbal roots is based on the root **פעל** *to do, make*. The **פ** represents the first, the **ע** the second and the **ל** the third root consonant. In this textbook the romanized designations are used.

Hebrew	Romanized	
פ"א	I- <i>ʾāleṗ</i>	I ʾ
פ"י	I- <i>yōd</i>	I y
פ"נ	I- <i>nūn</i>	I n
ע"ו/י	II- <i>wāw/yōd</i>	II w/y
ע"ע	II geminate	II gem.
ל"א	III- <i>ʾāleṗ</i>	III ʾ
ל"ה	III- <i>hē</i>	III y

11.3 Weak Verbs: *I n* Verbs

I n verbs have /n/ as the first root consonant. The consonant /n/ is weak because it is assimilated to the following consonant if this follows the /n/ immediately, e.g., -nC- > -CC-. The following forms of *I n* verbs in the Qal stem are weak.

1. The forms of the prefix conjugation including its related forms, the jussive and the cohortative, because of the assimilation of the /n/ to the following second root consonant: $*yinC_2VC_3 > yiC_2C_2VC_3$, e.g., $*yinpōl > yippōl$ יפֹל *he will fall*, $*yingaš > yiggaš$ יגֹשׁ *he will approach*. In these forms the /n/ does not appear as a consonant anymore, but only in the *dageš forte* in the second root consonant. The assimilation, however, of the /n/ does not happen, when the second root consonant is a guttural, e.g., ינחֹל *he will inherit*.
2. The imperative and the inf. cs. of *I n* verbs with /a/ as the thematic vowel in the prefix conjugation and the imperative and inf. cs. of the verb נתן *to give* are weak forms. In these forms the /n/ is lost completely.

The very frequent verb נתן *to give* has the exceptional vowel pattern *a-i* in the prefix conjugation Qal: $*yantīn > *yattīn > yittēn$ יִתֵּן *he will give* (with attenuation of *a > i* in the closed unstressed prefix syllable).

The very frequent verb לקח *to take* behaves like a *I n* verb in the Qal. The prefix conjugation forms, the imperative and the inf. cs. are weak.

Part.	sg.	m.	נֹפֵל		נֹתֵן	לֹקֵחַ

Notes

In verbs have either the *i-o* or the *i-a* vowel pattern without a semantic difference between fientive and stative meaning.

The verb לקח loses the *dageš forte* in the second root consonant in context forms of the prefix conjugation with vocalic suffix, e.g., יָקְחוּ *they will take*.

The *dageš lene* in the 2 f. sg. SC form לָקַחְתְּ distinguishes this form from the inf. cs. with the preposition לָ: לָקַחְתְּ *to take*.

In pausal forms with vocalic suffix the thematic vowel is preserved and stressed, e.g., יָתְנוּ, יָקְחוּ (impv.).

Verbs that are both In and III gutt. often have strong inf. cs. forms, e.g., נָסַע. Some verbs have both forms, e.g., נָנַע and less frequently נָנַעַת.

The inf. cs. נָנַע of the verb נָתַן is the result of the assimilation of the third root consonant /n/ to the ending -t: *tint > > *titt > tēt נָנַעַת. A strong form of the inf. cs. נָתַן (or נָתַן־) is attested only in Gen 38:9 and Num 20:21 whereas the weak form נָתַת is attested more than 150 times. With enclitic pronoun, the inf. cs. of the verb נָתַן has forms like נָתַתוּ, נָתַתָּנוּ, etc. with restoration of the gemination.

The imperative m. sg. of the verb נָתַן is often the long form נָתַתָּה give!.

The verb נָגַשׁ to draw near, approach is a so-called suppletive verb. In the Qal it is only used in the PC, imperative and inf. cs.; in the SC and the participle it is used in the Niphal with no difference in meaning. It is included in the table because it is the most frequent verb In with /a/ as thematic vowel in the PC Qal by far.

11.4 Weak Verbs: I^ʔ Verbs

A number of verbs I^ʔ have weak forms in the prefix conjugation. The five I^ʔ verbs that only have weak PC forms are the verbs אָמַר to say, אָכַל to eat, אָבַד to perish and the two doubly weak verbs אָבַה to be willing (almost always with negation) and אָפַה to bake (I^ʔ and III y).¹ Therefore the rules of III y verbs apply to אָבַה and אָפַה as well (→ 12.2).

The weakness is due to א becoming silent at the end of the prefix syllable. As a result, the prefix vowel was lengthened /a/ > /ā/ and then changed to /ō/ according to the Canaanite sound shift. Subsequently, the thematic vowel became /a/ through dissimilation to avoid two consecutive dark vowels /ō/ and /u/. This development started in the 1 c. sg. form to avoid two consecutive consonants /ʔ/:

*a^ʔmur > *āmur > *ōmur > ʔōmar אֶמַר I will say

From this form the loss of the consonantal א spread to the rest of the PC forms. PC forms are the only weak forms of I^ʔ verbs in the Qal; all other forms are strong.

¹ Mnemonic saying: The baker says, “the one who does not want to eat will perish.”

Inf. abs.		אֹמֵר	אֹכֹל
Part.	sg. m.	אֹמֵר	אֹכֹל

Notes

In the 1 c. sg. form אָמַר the root consonant א is never preserved in writing. In the other forms it is almost always preserved in writing which makes the identification of these forms easy.

The 3 m./f. sg. and 2 m. sg. *wayyiqtol* forms of the verbs אָמַר and אָכַל without suffix are stressed on the penultimate syllable, e.g., וַיֹּאמֶר, וַתֹּאמֶר, וַיֹּאכַל, וַתֹּאכַל. Pausal forms 3 m./f. sg., 2 m. sg. and 1 c. sg. forms, however, are stressed on the last syllable, e.g., וַיֹּאמֶר, וַיֹּאכַל, וַתֹּאמֶר, וַתֹּאכַל including the pausal form וַיֹּאכַל.

In the impv. m. sg. and the inf. cs., the א takes *hatef segol*. In the impv. אֱמַר the original vowel *u* (> *ō*) is preserved because there was no need for dissimilation as in the prefix conjugation.

The verbs אָהַב, אָחַז and אָסַף have strong forms with preservation of the א as consonant as well as weak forms with elision of the א, e.g., וַיֹּאחֶז, וַיֹּאחֶז, וַיֹּאסֵף, וַיֹּאסֵף, וַיֹּאסֵף (!), אֶסְפָּה (cohortative), וַיֹּאדָּב, וַיֹּאדָּב.

The introduction of direct speech לֵאמֹר is originally the inf. cs. of the verb אָמַר with the preposition ל.

11.5 Questions in Biblical Hebrew (Part 1)

11.5.1 Yes-No Questions

Yes-no questions are usually marked with the syllable הָ *hā* which is prefixed to the first word of the question. This prefixed הָ *hā* is called *interrogative He*. In addition to this, it can be assumed that questions were pronounced with a different intonation than statements.

The interrogative He is vocalized in different ways:

1. Before non-gutturals with a full vowel it is הָ *hā*- (Gen 4:9)
2. Before non-gutturals with *šwa* it is הָ *ha*- (1 Kgs 21:20). Sometimes a *dageš forte* is added (Gen 37:32).
3. Before gutturals with any vowel except *qameṣ* or *hatef qameṣ* it is הָ *ha*- (Judg 13:11)
4. Before gutturals with *qameṣ* or *hatef qameṣ* it is הָ *hæ*- (Gen 24:5)

הֲשֹׁמֵר אָחִי אֲנִכִּי	<i>Am I the keeper of my brother?</i> (Gen 4:9)
הֲמִצַּאתִנִּי אִיבִי	<i>Have you found me, my enemy?</i> (1 Kgs 21:20)

הַכְתַּנְתָּ בִּנְךָ הֲיֵא אִם-לֹא	<i>Is it the robe of your son or not?</i> (Gen 37:20 Qere)
הֲאַתָּה הָאִישׁ אֲשֶׁר-דִּבַּרְתָּ אֶל-הָאִשָּׁה	<i>Are you the man who spoke to the woman?</i> (Judg 13:11)
הֲהִשָּׁב אָשִׁיב אֶת-בִּנְךָ אֶל-הָאָרֶץ אֲשֶׁר-יָצָאתָ מִשָּׁם	<i>Shall I then bring your son back to the land that you left?</i> (Gen 24:5)

Unmarked yes-no question are also attested in Biblical. It can be assumed that in spoken language they were discernible by their intonation. In a written text, the context helps to identify unmarked questions.

וַיֹּאמֶר הַמֶּלֶךְ שְׁלוֹם לְנַעַר לְאַבְשָׁלוֹם	<i>And the king said, "Is it well with the young man Absalom?"</i> (2 Sam 18:29)
וַיֹּאמֶר נָתָן אֲדֹנָי הַמֶּלֶךְ אַתָּה אָמַרְתָּ אֲדֹנִיָּהוּ יִמְלֹךְ אַחֲרָי וְהוּא יֹשֵׁב עַל-כִּסְאִי	<i>And Nathan said, "My lord, the king, have you said 'Adonijah shall become king after me and he shall sit on my throne'?"</i> (1 Kgs 1:24)

Biblical Hebrew does not have a word for yes. For a positive answer to a yes-no question either a word from the question (Gen 24:58) or another corresponding word (2 Kgs 18:7–8) is used. For a negative answer, Hebrew uses **לֹא** *no* (Judg 12:5).

וַיֹּאמְרוּ אֵלֶיהָ הֲתֵלְכִי עִם-הָאִישׁ הַזֶּה וַתֹּאמֶר אֵלָיו	<i>And they said to her, "Will you go with this man?" And she said, "Yes."</i> (Gen 24:58)
וַיֹּאמֶר הֲאַתָּה זֶה אֲדֹנָי אֵלֶיהוּ וַיֹּאמֶר לוֹ אָנִי	<i>And he said, "Is it you, my lord Elijah?" And he said to him, "Yes."</i> (1 Kgs 18:7–8)
וַיֹּאמְרוּ לוֹ אַנְשֵׁי-גִלְעָד הֲאֶפְרַתִּי אַתָּה וַיֹּאמֶר לֹא	<i>And the people from Gilead said to him, "Are you an Ephraimite?". And he said, "No."</i> (Judg 12:5)

11.5.2 Choice Questions

The interrogative **הֲ** is also used for introducing choice questions; the second option is introduced with **אִם**.

הֲלָנוּ אַתָּה אִם-לְצָרֵינוּ	<i>Are you for us, or for our enemies?</i> (Josh 5:13)
-------------------------------	--

הֲאֵלֶךְ עַל־רָמֹת גִּלְעָד Shall I go to Ramoth-gilead for battle or shall
לִמְלָחָמָה אִם־אֶחְדָּל I refrain? (1 Kgs 22:6)

Note

The word אם is most frequently used as conditional conjunction *if* (→ 15.3).

11.5.3 Indirect Questions

The interrogative He also introduces indirect (or embedded) questions (Exod 4:18), but אם is used for this, as well (2 Kgs 1:2). For indirect choice questions אם ... הַ is used (Gen 27:21).

וְאַרְאֶה הָעוֹדִים חַיִּים ... I want to see whether they are still alive
(Exod 4:18)

לָכוּ דִרְשׁוּ בְּבַעַל זְבוּב Go, inquire of Baal-zebub, the god of Ekron,
אֵלֵהִי עֲקֻרוֹן אִם־אֶחְיֶה whether I will recover from this sickness
מִחֲלִי זֶה (2 Kgs 1:2)

לְדַעַת הֲהִצְלִיחַ יְהוָה בְּדַרְכּוֹ ... to find out whether God had made his
אִם־לֹא journey successful or not (Gen 24:21)

12.2 Weak Verbs: III y Verbs

Originally, verbs of the category III y were verbs with the semivowels /y/ or /w/ as third root consonant. Because of contraction of the semivowel and the vowels preceding and/or following the semivowel, forms of III y verbs are often characterized by a long vowel after the second root consonant. The only form, in which the original root consonant /y/ is found regularly, is the participle passive.¹

Notes

Verbs IIIy were originally roots with the semivowels /y/ or /w/ as third root consonant. The diphthongs and triphthongs of the early forms of these root were simplified to long vowels, e.g., -aya > -ā in the 3 m. sg. form *galaya* > *galā* (cf. the original form of the strong verb **kataba*).

The 3 f. sg. SC form גִּלְתָּה combines the original suffix -āt and the suffix -ā of the strong verb. The resulting form גִּלְתָּה has the same syllable structure as the corresponding form of the strong verb כָּתַבְתָּה. The pausal form is גִּלְתָּהּ.

The 3 c. pl. SC form גִּלוּ is the result of the contraction of a diphthong -ay- and the 3 c. pl. morpheme /ū/: **galayū* > *gālū*.

Suffix conjugation forms of IIIy verbs in the Qal binyan are characterized by a long vowel -ā following the second root consonant in the 3 m. sg. form (e.g., גִּלְה) or by the long vowel -ī before consonantal suffixes (e.g., גִּלְיֵנָה).

Prefix conjugation forms of IIIy verbs in the Qal binyan are characterized by the long final vowel -ē in the forms without suffix. In the imperative m. sg. the final vowel is -ē.

IIIy verbs have distinct jussive and *wayyiqtol* forms. The 3 m./f. sg., 2 m. sg. jussive and *wayyiqtol* forms do not have the long final vowel -ē. The resulting consonant cluster at the end of the word is frequently resolved by insertion of a helping vowel similar to segolate nouns, e.g., יַעַשׂ, וַיַּעַשׂ, and he did. The prefix vowel is stressed except with the verbs היה and חיה. Important jussive and *wayyiqtol* forms of some frequent verbs are the following:

- Verb רָאָה: jussive יִרְאֵ, wayyiqtol 3 m. sg. יִירָא (wayyar(?)) with preservation of the א in the spelling although it is not pronounced), 3 f. sg. וִירְאֵ, 1 c. sg. וְאִירָא. The wayyiqtol forms with enclitic pronoun have consonantal א, e.g., וַיִּרְאֵהוּ and he saw him (Judg 19:3)
- Verb בָּכָה: וַיִּבְכֶּה, וַתִּבְכֶּה
- Verb שָׁתָה: וַיִּשְׁתֶּה

Short jussive and wayyiqtol forms without the long final vowel -*ā* are called *apocopate forms* (Latin *forma apocopata* or in the pl. *formae apocopatae* from the Latin noun *apocope* which comes from the Greek noun ἀποκοπή *a cutting off*).

At times, the long final vowel -*ā* is preserved in jussive and wayyiqtol forms, e.g., יִרְאֵה let him see, וַיִּבְנֵה and he built, וַיַּעֲשֵׂה and he made.

Instead of distinct forms for the cohortative, III y verbs use the regular prefix conjugation forms 1 c. sg./pl. as volitive forms, e.g., נִבְנֶה let us build (Gen 11:4).

The forms of the participle active are גֹּלֶה (m. sg.), גֹּלְהָ (f. sg.), גֹּלִים (m. pl.), גֹּלוֹת (fem. pl.). The forms of the participle passive are גָּלוּי (m. sg.), גָּלוּיָהּ (f. sg.), גָּלוּיִים (m. pl.), גָּלוּיוֹת (fem. pl.).

Verbs III y with gutturals have the same vowel differences when compared to strong verbs without gutturals, e.g., עָלִיתָם you went up (2 m. sg. SC), יַעֲלֶי they shall go up (3 m. pl. jussive), עֲלֵה go up! (impv. m. sg.). As a stative verb, the verb חָרָה has prefix conjugation forms with the prefix vowel *segol*, e.g., יִחַרְרֶה. The jussive and wayyiqtol 3 m. sg. are יִחַר and יִחַרְרֵ.

The very frequent verb הָיָה to be has *hatef segol* with the first root consonant in the 2 m. pl. SC form: הָיִיתֶם (the 2 f. pl. form is not attested in Biblical Hebrew). With the conjunction ו the form is וַהֲיִיתֶם. In the PC the verb הָיָה has the prefix vowel /i/ in all forms except the 1 c. sg. despite the guttural ה. The first root consonant ה always has silent *šwa*. In the wayyiqtol form 3 m. sg. the *dageš forte* in the prefix consonant י is lost: וַיְהִי. The inf. cs. with the proclitic prepositions is לְהִיּוֹת and בְּהִיּוֹת. The inf. abs. may also be הִיּוֹ. There is one occurrence of a participle in Exod 9:3: הוֹיָה (f. sg.).

The verb חָיָה to live has forms corresponding to those of the verb הָיָה, e.g., יִחְיֶה, יִחְיֶיךָ, יִחְיֶיךָם, וַיְחִי, etc. The 3 m. sg. SC form may also be חִי, as pausal form חָי and with consecutive *waw* וַיְחִי.

The verb נָטָה to stretch out is doubly weak being In and III y. It has prefix conjugation forms like יִנָּטָה, jussive forms like יִנָּט (3 m. sg.) and יִנָּט (2 f. sg.) and wayyiqtol forms like וַיִּנָּט (3 m. sg.) and וַיִּנָּט (3 f. sg.) with only one root consonant.

12.3 Weak Verbs: III' Verbs

III' verbs are characterized by the loss of the /ʔ/ as a consonant at the end of syllables. The silent (or: quiescent) **ס** is usually retained in the spelling of the forms which makes the identification of forms of III' verbs easy.

Notes

While in the suffix conjugation fientive and stative verbs are distinguished, there is no such distinction in the prefix conjugation. In the prefix conjugation, III^ʔ verbs always have the vowel pattern *i-a*.

In forms with vocalic suffix or with enclitic pronouns the **ס** is preserved as a consonant, e.g., **מָצְאוּ** *they found*, **תִּמְצְאוּ** *you will find*, **מָצְאוֹ** *he found him*, **יִמְצְאֶנִּי** *he will find you*. Therefore, these forms are strong forms.

In the 3/2 f. pl. PC forms of III^ʔ verbs the vocalization follows the corresponding form of III^y verbs. The **ס** is usually retained in the spelling. At times, other forms of III^ʔ verbs follow the lead of III^y verbs as well.

The very frequent verb **נָשָׂא** *to lift, carry* is doubly weak (Iⁿ and III^ʔ) with elision of the third root consonant /ʔ/ at the end of syllables and assimilation of the first root consonant /n/ in the prefix conjugation and complete loss of the /n/ in the imperative and the inf. cs.

III^ʔ verbs do not have distinct jussive or *wayyiqtol* forms.

The verb **חָטָא** *to sin* as a verb I gutt. and III^ʔ has prefix conjugation forms with *segol* as prefix vowel, e.g., **יִחָטְאוּ**.

12.4 WH-Questions

12.4.1 The Interrogative Pronouns **מִי** *Who?* and **מָה** *What?*

Biblical Hebrew has two interrogative pronouns proper, **מִי** *who?* and **מָה** *what?*. The forms of **מָה** differ depending on the initial consonant of the following word.

- Before words beginning with a non-guttural it is **מָה־** (with *dageš forte* in the first consonant of the following word), e.g., **מָה־שְׁמֶךָ** *What is your name?* (Gen 32:28)

- Before the guttural א (always), before ר (always) and before the guttural ע (almost always) it is מָה without *dageš forte*, e.g., מָה אֶמַר אֲלֵהֶם *What shall I say to them?* (Exod 3:13), מָה רָאוּ בְּבֵיתָךְ *What have they seen in your house?* (2 Kgs 20:15)
- Before the gutturals ה and ח it is מַה, e.g., מַה הוּא *What is it?* (Exod 16:15), מַה חַטָּאתִי *What is my sin?* (Gen 31:36) (except before the article)
- Before the definite article it is מֶה, e.g., מֶה הָאֲבָנִים הָאֵלֶּה *What are these stones?* (Josh 4:21)
- Before gutturals with *qameṣ* or *qameṣ hatuf* it is מֶה, e.g., מֶה עָשִׂיתָ *What have you done?* (Gen 4:10), מֶה הָיָה הַדָּבָר בְּנִי *What is the matter, my son?* (1 Sam 4:16). At times, this may be the case before gutturals with other vowels as well, e.g., מֶה עָשִׂיתִי מַה־עֹנִי וּמַה־חַטָּאתִי *What have I done? What is my guilt and what is my sin?* (1 Sam 20:1). This happens rarely even before non-gutturals, e.g., מֶה מִשְׁפַּט הָאִישׁ *What is the manner of the man?* (2 Kgs 1:7).

Both מִי and מָה can be used together with prepositions. When מָה is used with the prepositions בְּ or בִּי, the forms are בְּמַה, בִּימַה, and כְּמַה, and כְּמַה; forms with *pataḥ* and following *dageš forte* do not occur. The following examples illustrate this use.

לְמִי־אֶתָּה	<i>To whom do you belong?</i> (1 Sam 30:13) (Ps 78:25)
לְמִי אֲנִי אֶעֱבֹד	<i>Whom should I serve?</i> (2 Sam 16:19)
בְּמַה	<i>With what?, i.e., How [are you going to entice him]?</i> (1 Kgs 22:21)
כְּמַה יָמֵי שְׁנֵי חַיֶּיךָ	lit. <i>How many are the days of the years of your life?</i> (Gen 47:8)

The interrogative pronouns מִי and מָה can be used in construct chains, e.g., מִי בֶת־מִי אַתָּה *Whose daughter are you?* (Gen 24:47) בֶּן־מִי אַתָּה הַנָּעַר *Whose son are you, young man?* (1 Sam 17:58)

The interrogative pronoun מָה preceded by the preposition לְ has the meaning *why?* (see the next paragraph).

If מִי is the object of the interrogative clause it is always used with the object marker אֶת, e.g., אֶת־מִי אֶשְׁלַח *Whom shall I send?* (Isa 6:8).

Beside *what?* the interrogative pronoun מָה has other meanings like *how?*, *why?*. It may also be used in exclamations, e.g., מַה־טֹבֹו אֹהֶלֶיךָ יַעֲקֹב מִשְׁכְּנֹתֶיךָ *How fair are your tents, O Jacob, your dwellings, O Israel!* (Num 24:5).

12.4.2 Interrogative adverbs

Biblical Hebrew has the following frequent interrogative adverbs:

- Local: **אֵי** *where?*, **אֵי** *where?*, **אֵי** *where to?* (interrogative adverb **אֵי** *where to?* with directional **הֵ**), **מֵאֵי** *from where?*
- Temporal: **מָתַי** *when?*
- Causal: **לָמָּה** *why?* (preposition **לְ** + **מָה**), **מָדוּעַ** *why?*

אֵי may be used together with the preposition **עַד** in a temporal sense *How long?*, e.g., **עַד-אָנָּה יִנְאַצְנִי הָעָם הַזֶּה** *How long will this people despise me?* (Num 14:11).

The interrogative adverb **לָמָּה** *why?* is **לָמָּה** before gutturals.

לְקָרָא	toward, against (prep.; לְ + inf. cs. of קָרָא ₂ to encounter)
עַל־כֵּן	therefore

13.2 Weak Verbs: Iy Verbs

In the suffix conjugation Iy verbs have strong forms with three root consonants. Forms of the prefix conjugation are always weak, and so are most forms of the imperative and the infinitive construct. The infinitive absolute and the participles are strong.

In the prefix conjugation, two groups of Iy verbs need to be differentiated. There are Iy verbs with the vowel pattern *i-a* and verbs with the vowel pattern *a-i*. The verb יָכַל *to be able* is a case apart.

The group of Iy comprises two groups of verbs; first, verbs with /y/ as first root consonant originally. and, second, verbs with /w/ as first root consonant originally. In early Northwest Semitic initial /w/ became /y/. As a consequence, the verbs with an original first root consonant /w/ have /y/ as first root consonant in the suffix conjugation Qal.

Notes

In the *i-a* verbs – represented by the verb יֵרֵשׁ in the first column – the development of the prefix conjugation form was *yīraš* > *yīraš* יֵרֵשׁ with contraction of *iy* > *i*.

The group with the *a-i* vowel pattern – represented by the verb יֵשֵׁב in the second column – contains the following six verbs: יֵשֵׁב *to sit*, יָדַע *to know*, יָצָא *to go out*, יָרַד *to go down*, יָלַד *to bear, beget* and the verb הֵלֵךְ *to go*.

The explanation of the actual vowels $\bar{e}$ – $\bar{e}$ of the form יֵשֵׁב of *a-i* verbs is disputed.¹ Based on an original form **yašib* with only two root consonants and an open prefix syllable the form either developed along the path **yašib* > **yašēb* > *yēšēb* with assimilation of the prefix vowel to the thematic vowel or along the path **yašib* > **yayšib* > *yēšēb* with addition of the semivowel /y/ to the bring the form closer to the regular verb with three root consonants and subsequent contraction of the diphthong *ay* > $\bar{e}$.

In both types of *Iy* verbs the prefix vowel is unchangeable while the thematic vowel is reduced to *šwa* in context forms with vocalic suffixes, e.g., יֵרֵשׁוּ, יֵשְׁבִי. In pausal forms the thematic vowel is preserved, e.g., יֵרֵשׁוּ, יֵשְׁבִי (with defective spelling of the prefix).

The prefix vowel $\bar{u}$ of the verb יָכַל is the result of the contraction of the diphthong *iw* > $\bar{u}$: **yiwkal* > *yūkal* יָכַל.²

In the prefix conjugation forms of the verb יָדַע the thematic vowel is changed to /a/ because of the guttural יָדַע: יָדַע, יָדַע, יָדַע etc. In pausal forms

¹ The same vowel pattern in its original form *a-i* is found in the prefix conjugation forms of the verb נָתַן, e.g., יָתַן with attenuation of the prefix vowel *a* > *i*.

² At face value, the prefix conjugation forms of יָכַל look like Hophal forms (→ 23.2.1), but they are indeed Qal forms.

the thematic vowel is lengthened to *qameṣ*, e.g., *יִרְעַע*, *יִרְעֵי*. The same vowel /a/ is also found in the forms of the impv. *רַע*, etc., and the inf. cs. *רַעַת*.

In the frequent doubly weak verbs *יָצָא* *to go out* and *יָרָא* *to fear* the /ʔ/ becomes silent at the end of the syllable, e.g., *יָצָא* *yēṣā(ʔ)* and *יָרָא* *yirā(ʔ)*. In forms with vocalic suffix the ʔ is preserved as a consonant, e.g., *יָצְאוּ* and *יָרְאוּ*. In 2/3 f. pl. forms the vowels follow the pattern of IIIy verbs, e.g., *יָצְאוּנָה* (2 f. pl.) *וְיָרְאוּנָה* (3 f. pl.) (cf. *תִּגְלְיוּנָה*). The forms of the inf. cs. are *יָצֵאת* and *יָרֵא* and *יָרְאוּ*, respectively.

The verb *יָרָא* *to fear* is a stative verb with suffix conjugation forms like *יָרָא* (3 m. sg.), *יָרְאֵתִי* (1 c. sg.), *יָרְאוּתֶם* (2 pl.). The noun *יָרְאוּהָ* functions as inf. cs. besides the rare *יָרֵא*.

In the 2/3 f. pl. form *תִּשְׁבְּנָה* the vowel /a/ between the second and third root consonant is due to Philippi's Law (*i* > *a* in stressed closed syllable).

In *wayyiqtol* forms of *a-i* type verbs without suffix (except in 1 c. sg. forms) the stress is moved to the prefix syllable and the thematic vowel is changed to /æ/, e.g., *וַיֵּרֶד*, *וַיֵּלֶךְ*, *וַיֵּשֶׁב*, but in the 1 c. sg. the stress is on the last syllable *וַיֵּרֶדְתִּי*, *וַיֵּלֶכְתִּי*, *וַיֵּשְׁבְתִּי*. In pausal forms stress does not move, e.g., *וַיֵּרֶד*, *וַיֵּלֶךְ*. As retraction of stress in verbal forms only happens when the penultimate syllable is open and the final syllable is closed, stress does not move in forms of the verbs *יָצָא* and *יָרָא* due the quiescent /ʔ/ which results in an open final syllable.

Suffix-less jussive forms of Iy verbs of the *a-i* type are frequently stressed on the last syllable, e.g., *וַיֵּרֶד אֵלַי* *and let him come to me* (1 Sam 17:8) but forms with stress on the penultimate syllable are also attested, e.g., *תֵּרֶד אֵשׁ מִן־הַשָּׁמַיִם* *let fire come down from heaven* (2 Kgs 1:12).

Verbs Iy with *צ* as second root consonant have irregular prefix conjugation Qal forms with doubling of the *צ* as well as forms with a single /s/, e.g., *וַיִּצֹק* *and he poured* (Gen 28:18), *אֶצְקֶה* *I shall pour* (Isa 44:3) from the verb *יָצַק*.³

13.3 Numerals (I): Numbers 1–10

13.3.1 The Forms of Cardinal Numbers 1–10

The cardinal numbers from 1 to 10 have the following forms:⁴

³ At face value forms like *אֶצְקֶה* look like forms of *In* verbs, although they are indeed forms of *Iy* verbs.

⁴ In Modern Hebrew the numerals for *four* *אַרְבַּע* and *eight* *שְ�מוֹנֶה* are stressed on the penultimate syllable.

	With masc. nouns		With fem. nouns	
	abs. st.	cs. st.	abs. st.	cs. st.
1	אֶחָד	אֶחָד	אַחַת	אַחַת
2	שְׁנַיִם	שְׁנֵי	שְׁתֵּי	שְׁתֵּי
3	שְׁלֹשָׁה	שְׁלֹשָׁת	שְׁלוֹשׁ	שְׁלוֹשׁ
4	אַרְבָּעָה	אַרְבַּעַת	אַרְבַּע	אַרְבַּע
5	חֲמִשָּׁה	חֲמִשָּׁת	חֲמִשׁ	חֲמִשׁ
6	שֵׁשׁ	שֵׁשֶׁת	שֵׁשׁ	שֵׁשׁ
7	שִׁבְעָה	שִׁבְעַת	שִׁבְעַת	שִׁבְעַת
8	שְׁמוֹנָה	שְׁמוֹנַת	שְׁמוֹנָה	שְׁמוֹנָה
9	תְּשֻׁעָה	תְּשֻׁעַת	תְּשֻׁעַת	תְּשֻׁעַת
10	עֶשְׂרֵה	עֶשְׂרֵת	עֶשְׂרֵה	עֶשְׂרֵה

13.3.2 The Use of the Cardinal Numbers 1–10

The cardinal number for *one* אֶחָד and אַחַת, respectively, is an adjective. It has different uses in Biblical Hebrew:

- When it modifies a noun, it follows the noun and agrees with it in gender and number, e.g., אִישׁ־אֶחָד *one man* (in אֲנַחְנוּ בְּנֵי אִישׁ־אֶחָד *We are the sons of one man* Gen 42:13), אֶחָד בְּיוֹם *on one day* (1 Sam 2:34), אֶבֶן אַחַת *one stone* (Josh 4:5).
- In cs. st. followed by a dependent noun, noun phrase or prepositional phrase with מִן, e.g., אֶחָד הַהָרִים *one of the mountains*, אַחַת עָרֶיךָ *one of your towns*, אֶחָד מֵהֶם *one of them*
- Like an indefinite article, e.g., אִישׁ אֶחָד *a man* (1 Sam 1:1), אִשָּׁה אַחַת *a woman* (2 Kgs 4:1)
- Like an ordinal number *first*, e.g., וְשֵׁם הַשְּׁנִיית רֹת *The name of the first one was Orpah and the name of the second Ruth* (Ruth 1:4)

The cardinal number for *two* agrees with the noun it modifies in number and gender, i.e., שְׁנַיִם is used with masculine nouns and שְׁתֵּי is used with feminine nouns.

13.3 Numerals (I): Numbers 1–10

The cardinal numbers 3–10 are characterized by gender inversion. This means that masculine nouns are used with number words with feminine ending whereas feminine nouns are used with masculine number words.

The numerals 2–10 may be used in three different ways when they are used as modifiers of nouns:

- In construct state before the counted noun, e.g., שְׁנֵי בָּנִים *two sons*, שְׁתֵּי בָּנוֹת *two daughters*, שְׁלֹשָׁת בָּנָיו *his three sons*, שְׁלֹשׁ קָאִים *three seahs* (sg. שָׂאָה, f.)
- In absolute state before the counted noun, e.g., שְׁנַיִם אַנְשִׁים *two men*, שְׁתֵּים נָשִׁים *two women*, שְׁלֹשָׁה בָּנִים *three sons*, שְׁלֹשׁ עָרִים *three cities*
- In absolute state following the counted noun (especially in lists), e.g., עַמּוּדִים שְׁנַיִם *two pillars*, עָרִים שְׁתֵּים *two cities*, יָמִים שְׁלוֹשָׁה *three days*, עָרִים שְׁלֹשׁ *three cities*

Numerals may be used with enclitic pronouns, e.g., שְׁנֵיהֶם *the two of them*, שְׁלֹשָׁתָם *the three of them*, אַרְבַּעָתָם *the four of them*.

13.3.3 Ordinal Numbers 1–10

	masc.	fem.
1st	רִאשׁוֹן	רִאשׁוֹנָה
2nd	שֵׁנִי	שֵׁנִית
3rd	שְׁלִישִׁי	שְׁלִישִׁית
4th	רְבִיעִי	רְבִיעִית
5th	חֲמִישִׁי	חֲמִישִׁית
6th	שֵׁשִׁי	שֵׁשִׁית
7th	שְׁבִיעִי	שְׁבִיעִית
8th	שְׁמִינִי	שְׁמִינִית
9th	תְּשִׁיעִי	תְּשִׁיעִית
10th	עֲשִׂירִי	עֲשִׂירִית

Ordinal numbers are adjectives. As such, they follow the noun they modify and agree with it in number and gender. Dedicated forms of cardinal numbers exist only up to *10th*. For values above 10th cardinal numbers are used. With years and months, cardinal numbers are often used instead of ordinal numbers.

13.4 Adjectives with the Ending -ī

Adjectives with the ending -ī often indicate the belonging to an ethnic group, the origin from a country, area or city. This ending is therefore called *gentilic ending* (from Latin *gens* *tribe, people*). The ending -ī can also be used on regular adjectives like נָכְרִי *foreign*, נָקִי *free from guilt, innocent* (from the root נִקָּה). The different forms of עִבְרִי *Hebrew* are as follows:

	masc.	fem.
sg.	עִבְרִי	עִבְרִיָּה
pl.	עִבְרִים	עִבְרִיּוֹת

Notes

The plural form may have the ending -*īyyīm*, e.g., עִבְרִיִּים (only once in Exod 3:18), נִקְיִים.

The fem. sg. ending may also be -*īt*, e.g., שִׁפְחָה מִצְרַיִת *an Egyptian maidservant* (Gen 16:1), אֲרַמִּית (adv., *in Aramaic*), יְהוּדִית (adv., *in Judean*).

The ordinal numbers *2nd* to *10th* belong to this category of adjectives.

13.5 Exercises

13.5.1 Translation of Verbal Forms

Translate the following verbal forms. Identify the gender (masc., fem., com.) and number (sg., pl.) the forms of which the English translation is ambiguous (i.e., *you, they*). Mark the stressed syllable if stress is not on the last syllable.

1 אֵלֶּךְ	2 יֵלֶךְ	3 תֵּלְכוּ	4 לָכוּ	5 תִּטְמְאוּ	6 יִצְאָתִי	7 יִצְאוּ	8 יִצְאוּ

סָבִיבוֹת (סָבִיבֵיהֶם with ePP)	around, round about (prep.; pl. of סָבִיב, with ePP)

14.2 Weak Verbs: II w/y Verbs

The verbs of the type II w/y have root consonants with only two consonants. Another term for II w/y verbs is *hollow roots*.

II w/y verbs are characterized by

- a vocalic element between the two radicals in all forms except some rare Hophal forms.
- vocalic suffixes on SC, PC and imperative are *not* stressed
- open prefix syllables in the prefix conjugation Qal

Unlike other verbs, II w/y verbs are listed in the lexicon with the infinitive construct (without vowel pointing; except BDB); e.g., בּוֹשׁ, מוֹת, בּוֹא, שִׁים, קוּם.

Notes

The very frequent verb בוא is doubly weak with elision of the /ʔ/ at the end of a syllable (cf. the III^ʔ verbs).

In the suffix conjugation, three types of II w/y verbs can be distinguished:

- verbs with *ā* or *a* as stem vowel (e.g., קום to arise, stand up, שים to put, בוא to come and most other II w/y)
- verbs with *ē* (< **i*) as stem vowel (in Biblical Hebrew only the verb מות to die)
- verbs with *ō* as stem vowel (only a few stative verbs, e.g. ביש to be ashamed, טוב to be good)

In the prefix conjugation, there are three different types:

- verbs with the vowel pattern *a–u* based on the primitive forms *yaqtulu* with the prefix vowel /a/ and the thematic vowel /u/: **yaqūm* > *yāqūm* יקום (the majority of II wy verbs including the verb מות)
- verbs with the vowel pattern *a–i*: **yašīm* > *yāšīm* ישים (cf. the verbs ישב and נתן with the same vowel pattern in the prefix conjugation)
- verbs with the vowel pattern *i–a* for stative verbs with the change of the thematic vowel *ā* > *ō*: **yibāš* > *yēbōš* יבוש he will be ashamed

The original prefix vowels have been changed only slightly within the parameters of Biblical Hebrew (*a* > *ā* and *i* > *ē*, respectively).

In 3/2 f. pl. forms there are forms without and with connecting vowel, e.g., תשבנה without connecting vowel, תשבנה and תבאנה with connecting vowel and reduction of the prefix vowel).

II w/y verbs have distinct jussive forms in forms without vocalic suffix, e.g., יקם (but also יקם or יקם), ישב, ישים.

wayyiqtol forms of II w/y verbs without vocalic suffix are based on the corresponding jussive forms. In context forms, the stress is retracted to the penultimate syllable and the thematic vowel is shortened, e.g., יקם wayyāqom, יתשב wattāšb, ישים wayyāšem. In pausal forms, however, the stress is on the last syllable, e.g., יתשב wayyāšōb. Retraction of stress does not happen in 1 c. sg. forms, e.g., יאקום and יאשים.

The 3 m. sg. *wayyiqtol* form of the verb סור is יסר with *pataḥ* because of the final consonant ר.

The impv. m. sg. may be expanded by the ending *-ā*, e.g., קומה arise! (Num 10:35)

Forms of the verb **בוא** are frequently spelled defectively. The 3/2 m. pl. forms with the ending *-ū* of the verbs **בוא** and **בוש** are usually spelled defectively, e.g., **יבִּבְּאוּ**, **יבִּבְּשוּ** to avoid the use of two vowel letters. Defective spelling of 3/2 m. pl. forms of the verbs **קום** and **שוב** is also common, e.g., **יִשְׁבּוּ**.

The inf. cs. of the verb **שים** is **שִׁים** in most cases, but the form **שִׂים** is attested as well.

14.3 Numerals (II): Numbers above 10

14.3.1 Numbers 11–19

The numbers 11–19 consist of the words for the units in the absolute state with masculine nouns and of the words for the units in the cs. st. with fem. nouns, respectively, and special forms of the word for ten **עָשָׂר**. Gender inversion occurs for the numbers 13–19.

	With masc. nouns	With fem. nouns
11	אֶחָד עָשָׂר / עֶשְׂתֵּי עָשָׂר	אֶחָת עָשָׂרָה / עֶשְׂתֵּי עָשָׂרָה
12	שְׁנַיִם עָשָׂר / שְׁנֵי עָשָׂר	שְׁתֵּים עָשָׂרָה / שְׁתֵּי עָשָׂרָה
13	שְׁלֹשָׁה עָשָׂר	שְׁלֹשׁ עָשָׂרָה
14	אַרְבָּעָה עָשָׂר	אַרְבַּע עָשָׂרָה
15	חֲמִשָּׁה עָשָׂר	חֲמֹשׁ עָשָׂרָה
16	שֵׁשׁ עָשָׂר	שֵׁשׁ עָשָׂרָה
17	שִׁבְעָה עָשָׂר	שִׁבַּע עָשָׂרָה
18	שְׁמוֹנָה עָשָׂר	שְׁמוֹנֶה עָשָׂרָה
19	תִּשְׁעָה עָשָׂר	תִּשְׁעֶה עָשָׂרָה

Note

Rarely, the cs. st. form is used for the units with masc. nouns, e.g., **חֲמִשָּׁת עָשָׂר** *fifteen*.

14.3.2 Numbers 20–90

The numeral for *twenty* is the plural form of **עָשָׂר**. The numerals for *thirty*, *forty* ... *ninety* are the plural forms of the respective words for the units.

20	עֶשְׂרִים
30	שְׁלֹשִׁים
40	אַרְבָּעִים
50	חֲמִשִּׁים
60	שִׁשִּׁים
70	שִׁבְעִים
80	שְׁמוֹנִים
90	תִּשְׁעִים

14.3.3 Numerals for 100 and above

The numeral for *one hundred* is the fem. noun מֵאָה, the numeral for *one thousand* is the masc. noun אֶלֶף. Both numerals are used in the dual for *two hundred* and *two thousand*, respectively.

מֵאָה	100
מֵאוֹת	200
שְׁלֹשׁ מֵאוֹת ... תִּשְׁעֵי מֵאוֹת	300 ... 900
אֶלֶף	1,000
אַלְפִים	2,000
שְׁלֹשָׁת אַלְפִים ... תִּשְׁעַת אַלְפִים	3,000 ... 9,000
עֶשְׂרֵת אַלְפִים or רִבְבָּה or רַבּוּא / רַבּוּ	10,000
עֶשְׂרִים אֶלֶף or שְׁתֵּי רַבּוֹת / שְׁתֵּי רַבּוּא	20,000
שְׁלֹשִׁים אַלְפִים	30,000

14.3.4 Notes of the Use of Numerals above Ten

- Usually the numeral precedes the counted noun, e.g., שְׁנַיִם עָשָׂר אַנָּשִׁים *twelve men* (Deut 1:23), שְׁתֵּים עָשָׂר אֲבָנִים *twelve stones* (1 Kgs 18:31).

- The counted noun is in the plural except for nouns that are used with numerals frequently, e.g., יום *day*, שנה *year*, איש *man*, נפש *soul, person*, שבט *tribe*, but also with אמה *cubit*, שקל *sheqel*, e.g., יום וארבעים *forty days and forty nights* (Gen 7:12).
- Units and tens are connected with the conjunction ו, e.g., עשרים ושנים *twenty-two years* (1 Kgs 16:29).
- When units, tens and hundreds are used together, the higher numerals usually come first, e.g., ושל מאות וחמשים *forty-five thousand, six hundred and fifty* (Num 1:25). Deviating sequences of the numerals, however, are attested as well, e.g., שנים ושמנים שנה ושבע *seven hundred and eighty-two years* (Gen 5:26), אלה ושבע מאות *one thousand and seven hundred and seventy-five sheqel* (Exod 38:25).¹
- For ordinal numbers above *tenth* cardinal numbers are used.
- For indication of days and years, cardinal numbers may be used instead of ordinal numbers for *second* to *tenth*.

Notes

In weak forms, vocalic suffixes are not stressed, e.g., וַיִּסְבוּ *and they marched around [the city]* (Josh 6:14), תָּמְדוּ *they were complete* (Josh 4:1); but in strong forms they are stressed, e.g., סִבְבוּ *they marched around* (Josh 6:15).

Fientive II gem. verbs have strong forms in the suffix conjugation Qal 3 m./f. and 3 c. pl. with dissociated second root consonant (e.g., סִבְבוּ, סִבְבִּי) while other forms are weak with a doubled second root consonant and a connecting vowel before the consonantal suffix (e.g., סִבֶּינָה).

Stative II gem. verbs normally have weak forms with doubled second root consonant. There are, however, some strong suffix conjugation forms of stative II gem. verbs with dissociated second root consonant.

Instead of weak forms with connecting vowel between the second root consonant and the suffix there are also forms without connecting vowel, e.g., תִּגְמְנוּ *we have been consumed* (1 c. pl. suffix conjugation Qal from תָּמַם; Jer 44:18).

Prefix conjugation forms of II gem. verbs are characterized by an open prefix syllable. The vowel is preserved if the following syllable is stressed, e.g., יָסְבוּ.

As in geminate nouns, the gemination of the second root consonant is lost in forms without an ending. When an ending is added, the gemination is preserved.

Fientive verbs have the vowel pattern *a-u* of the fientive type of the strong verb **yaqtul(u)* with preservation of the vowel quality of the prefix vowel and slight adjustment of the vowel quality of the thematic vowel: **yasubbu* > **yasubb* > *yāsōb* יָסַב.

Stative II gem. verbs have the vowel pattern *i-a* **yikbad(u)* with change of the prefix vowel from /i/ to /ē/: **yiqallu* > **yiqall* > *yēqal* יָקַל.

In *wayyiqtol* forms without suffix, retraction of stress is attested, e.g., וַיֵּסְבּוּ *and we went around [Mount Seir]* (Deut 2:1); וַיְבִיחֵם *and he brought into confusion* (Exod 14:24); but cf. וַיִּתְקַל *and she became insignificant* (Gen 16:4) with stress on the last syllable.

Alternative forms of the prefix conjugation have a geminated first root consonant and a simple second root consonant, e.g., 3 m. sg. יָסַב (instead of יָסַב), 3 m. pl. יָסְבוּ (instead of יָסְבוּ), 3 f. pl. תִּסְבְּנָה (instead of תִּסְבְּנָה). As this is normal in Aramaic, these forms are called *aramaizing forms*.

Participle forms of fientive verbs are strong. Stative verbs may have an adjective instead of a dedicated participle form, e.g., קָל *light, swift* (pl. קָלִים) from the root קָלָל.

The vowel pattern *a-i* in the prefix conjugation Qal is preserved with a few infrequent verbs, e.g., יִגֵּן *he will defend* from the verb גָּנָן (Isa 31:5).¹

In a few instances, the gemination of the second root consonant is lost, e.g., נָבְזָה *let us plunder* (1 Sam 14:36), נִבְלָה *let us confuse* (Gen 11:7) from the verbs בִּזָּז and בָּלַל, respectively.

15.3 Conditional Clauses

A conditional clause indicates a condition that another action, event or state is subject to or contingent on. The condition and the contingent action, event or state may be simply be two clauses next to each other. Sometimes they are juxtaposed without the conjunction וַ (Neh 1:8) but normally they are joined by means of the conjunction וַ (1 Sam 16:2; Gen 44:22).

אִתְּם תִּמְעָלוּ אֲנִי אֶפְיץ *If you will act unfaithfully, I will disperse you*
 אֶתְּכֶם בְּעַמִּים *among the nations.* (Neh 1:8)

¹ At face value, a form like this looks like a Hiphil form. In Rabbinic Hebrew Qal forms of the verb גָּנָן were indeed reanalyzed as Hiphil forms.

וַיֹּאמֶר שְׁמוּאֵל אִיךָ אֵלַי וְשָׁמַע שְׂאוּל וַיְהַרְגֵנִי	<i>And Samuel Said, “How can I go? If Saul hears about this, he will kill me.”</i> (1 Sam 16:2)
וַנֹּאמֶר אֶל-אֲדֹנָי לֹא-יִוָּכַל הַנֶּעַר לְעֹזֹב אֶת-אָבִיו וְעֹזֹב אֶת-אָבִיו וְנָמַת	<i>And we said to my lord, “The boy cannot leave his father. If he leaves his father, [his father] will die.”</i> (Gen 44:22)

Most commonly, however, conditional clauses are introduced by the conjunctions **אם** *if* and less frequently by **כִּי** *if*. With the conjunction **אם**:

אִם-טוֹב בְּעֵינֶיךָ לָבוֹא אִתִּי בְּכֹל בָּא וְאָשִׁים אֶת-עֵינִי עָלֶיךָ וְאִם-רָע בְּעֵינֶיךָ לָבוֹא-אִתִּי בְּכֹל חָדָל	<i>If it is good in your sight to come with me to Babylon, then come and I will take care of you. But if it is bad in your sight to come with me to Babylon, then don’t come</i> (Jer 40:4)
אִם-נָא מָצָאתִי חֵן בְּעֵינֶיךָ אֶל-נָא תַעֲבֹר מֵעַל עַבְדְּךָ	<i>If I have found favor in your sight, do not pass by your servant</i> (Gen 18:3)
אִם-אֶמְצָא בְּסֹדֶם חֲמִשִּׁים צְדִיקִים בְּתוֹךְ הָעִיר וְנִשְׁאַתִּי לְכָל-הַמָּקוֹם בְּעַבְדֹרָם	<i>If I find in Sodom fifty righteous within the city, I will forgive the whole place for their sake</i> (Gen 18:26)

Examples with the conjunction **כִּי**:

כִּי-תִמְצָא אִישׁ לֹא תִבְרַכְנוּ	<i>If you meet anyone, do not greet him</i> (2 Kgs 4:29)
כִּי תֹאמַר בְּלִבְּךָ רַבִּים הַגּוֹיִם הָאֵלֶּה מִמֶּנִּי אֵיכָה אוּכָל לְהוֹרִישָׁם לֹא תִירָא מֵהֶם	<i>If you say in your heart, “These nation are more numerous than we; how could I dispossess them?” do not be afraid of them ...</i> (Deut 7:17–18)

Note In these examples the use of the conjunction **כִּי** comes close to its use as temporal conjunction with the meaning *when*.

The main clause may simply follow the *if*-clause (Exod 21:7) or it may be connected to the *if*-clause by means of the conjunction **וְ**, the so-called *waw* of apodosis (or *waw apodoseos*) (Exod 21:35).² At times, it may be difficult to identify the beginning of the main clause, but logic and the accents in a fully

² The technical term for the *if*-clause is *protasis* (from Greek *πρότασις*); the main clause is called *apodosis* (from Greek *ἀπόδοσις*).

pointed text make the identification certain in most cases. In the example Exod 21:35 the main clause begins with *וּמָכְרוּ* and *they shall sell*. (The conjunction *וְ* before the conditional conjunction *כִּי* connects this law with the preceding context.)

*וְכִי־יִמְכַר אִישׁ אֶת־בִּתּוֹ
לְאִמָּה לֹא תֵצֵא כְצֵאת
הַעֲבָדִים* *And if someone sells his daughter as a slave,
she shall not go out as the [male] slaves do*
(Exod 21:7)

*וְכִי־יִגָּף שׁוֹר־אִישׁ אֶת־שׁוֹר
רֵעֵהוּ וָמָת וּמָכְרוּ אֶת־הַשׁוֹר
הַחַי וְחָצּוּ אֶת־כֶּסֶפוֹ וְגַם
אֶת־הַמָּת יַחְצִיּוּ* *If the ox of a man injures the ox of his neigh-
bor and it dies, they shall sell the live ox and
divide its price and they shall also divide the
dead one* (Exod 21:35)

15.4 Accents (Part I)

A fully pointed biblical text does not only include vowel signs and other reading signs as the *šwa* or the *meteg* but also accents. The original purpose of the accents was to regulate the musical recitation of the biblical text (JM § 15 e).

The accents can be divided into disjunctive accents and conjunctive accents. Whereas disjunctive accents separate words and phrases from each other, conjunctive accents join them to the following element or elements in a clause.

The majority of accents are on the stressed syllable of a word while a number of accents are on the last syllable of a word (*postpositive* accents) or on the first syllable of a word (*prepositive* accents). Therefore, postpositive and prepositive accents do not necessarily indicate the stressed syllable of the word. An exception is the disjunctive postpositive accent *pašta* which is repeated on the stressed syllable if it is the penultimate syllable, e.g., *מִלֵּךְ, דָּבָר*.

In this chapter the four most important disjunctive accents are introduced and then used in the Hebrew reading (Section 15.6).

<i>דָּבָר silluq</i>	with the last word of the verse before : <i>sof pasuq</i> (end of the verse)
<i>דָּבָר atnah</i>	divides the verse into two parts
<i>דָּבָר segolta</i>	postpositive
<i>דָּבָר zaqef qaton</i>	

Accents serve two important functions for the study of the Hebrew Bible.

First, most accents indicate the position of stress which is helpful for the correct pronunciation especially of unfamiliar words. Second, accents help to identify grammatical relations between words. For example, in Exod 21:35 in Section 15.3 the *if*-clause ends with *וְנָתַתְּ* with *atnah*, thus marking the beginning of the main clause. In 1 Kgs 1:19 the *atnah* separates between the objects of the verbal predicates *וַיִּקְרָא* and *קָרָא*, respectively.

וַיִּזְבַּח שׁוֹר וּמְרִיא-וְצֹאן לָרֹב וַיִּקְרָא לְכָל-בְּנֵי הַמֶּלֶךְ וּלְאַבְיָתָר הַכֹּהֵן וּלְיֹאָב שֶׁר הַצָּבָא וּלְשִׁלְמֹה עֲבֹדָה לֹא קָרָא:	<i>And he sacrificed oxen, fattened calves and small cattle in abundance and invited all the sons of the king and Abiathar the priest and Joab the commander of the army; but he did not invite your servant Solomon (1 Kgs 1:19)</i>
---	--

Pausal forms are used with *silluq* and *atnah*; but they can occur with other disjunctive accents as well.

16.2 The Niphal Binyan

16.2.1 The Forms of the Strong Verb in the Niphal

The Niphal is the fourth most frequent binyan behind the Qal, the Hiphil (→ 17.2) and the Piel (→ 19.2). It is attested about 4140 times in the Hebrew Bible. The Niphal has mainly reflexive-passive meaning. Morphologically, it is characterized by the additional element /n/ that is prefixed as the syllable *ni-* in the suffix conjugation and participle forms. In the other forms, it is placed as *-n* immediately before the first root consonant and subsequently assimilated to it: $-nC_1-$ > $-C_1C_1-$. The suffixes and prefixes of the SC, PC and imperative indicating person, number and gender are identical to the suffixes and prefixes of the corresponding forms in the Qal.

Notes

The forms of the Niphal have the following main characteristics:

- In the suffix conjugation and the participle and sometimes in the inf. abs., the syllable *ni-* is prefixed to the verbal form, e.g., נִשְׁבַּר *it has been broken* (SC); נִשְׁבָּר *broken* (part.).

- In the prefix conjugation forms the /n/ of the Ni. is assimilated to the first root consonant of the verb: **yinkatib* > *yikkātēb* יִכְתֹּב.
- In the imperative, the infinitive construct and some forms of the infinitive absolute a prosthetic consonant /h/ is added to the form in order to preserve the syllable structure and the assimilated /n/ as a sign of the Niphal.

The prefix vowel of the 1 c. sg. suffix conjugation can also be /i/ instead of /æ/, e.g., אֶשָּׁבַע *I will swear*. The prefix vowel of the cohortative 1 c. sg. is always /i/, e.g., אֲמַלְטָה *let me escape*.

In *wayyiqtol* and imperative forms without suffix, retraction of stress may occur, e.g., וַיִּלָּחֶם *and he fought*, הִשָּׁמֶר *be careful!*. Forms without retraction of stress are attested as well, e.g., וַיִּנְחֶם *he consoled himself*.

In the participle f. sg., forms with the ending /-ā/ are attested as well, e.g., נִשְׁבָּרָה *broken*.

In pausal forms, reduced vowels are preserved as full vowels, e.g., נִלְקָחָה *it was taken*, נִלָּחֲמוּ *they fought*, יִפְרְדּוּ *they will separate from each other*.

At times, the vowel between R₁ and R₂ in pausal forms is /a/ instead of /ē/, e.g., וַיִּנְמֹל *and he was weaned* (Gen 21:8).

In the suffix conjugation, forms with paragogic Nun may occur, e.g., יִכָּרְתוּן *they will be cut off*.

The verb לָקַח, which behaves like a *In* verb in the Qal, has strong forms in all forms of the Ni., e.g., נִלְקָח *it was taken*, אֶלְקָח *I will be taken*.

The first root consonant of *Ir* verbs is not geminated in the prefix conjugation, the imperative and the infinitives. Instead of *hireq* these verbs have *šere* in the prefix syllable of the prefix conjugation, the imperative and the infinitive construct, e.g., וַיִּרְדָּם *and he fell asleep* (Jonah 1:5; pausal form).

The primitive form of the suffix conjugation of the strong verb **naqtala* is not preserved in the strong verb. Instead the form changed to **niqtala* which explains the forms of the I gutt. verbs (→ 16.2.3). The primitive form **naqtala* becomes relevant in the Niphal forms of Iy, II w/y and II gem. verbs. The same applies to the participle.

16.2.2 The Meaning of Verbs in the Niphal

Originally, the Niphal binyan had reflexive-middle meaning but assumed passive meaning over time when the original Qal passive, of which only vestiges are left in Biblical Hebrew, was being phased out (→ 26.3). As a consequence, the Niphal often serves as a passive to the Qal (and sometimes the Hiphil).

1. Passive: לקח Qal *take*, Ni. *to be taken* (The subject is acted upon.)
2. Reflexive meaning: שמר Qal *keep*, Ni. *keep oneself, be on one's guard* (The subject affects itself with the verbal action.)
3. Middle meaning: שאל Qal *ask*, Ni. *ask for oneself*; נקם Qal *avenge*, Ni. *avenge oneself* (The subject acts in its own interest.)
4. Reciprocal: שפט Qal *judge*, Ni. *enter into controversy* (Two or more entities are involved in the action of the verb.)
5. Tolerative: דרש Qal *seek, inquire*, Ni. *to let oneself be inquired of*
6. No obvious Niphal meaning: שבע Ni. *to take an oath* (no Qal equivalent)

If the meaning of a verb in the Qal (or sometimes the Hiphil) is known, these semantic categories should be considered for the translation of the verb in the Niphal. A lexicon will help in further specifying the meaning.

16.2.3 Guttural Verbs in the Niphal

Niphal forms of guttural verbs show the expected differences with the regular verb:

- change of vowel quality to /a/ or a vowel closer to /a/
- avoidance of silent šwa in the prefix syllable *ni-* of the suffix conjugation and use of *hatef šwa* instead
- use of *hatef šwa* instead vocal šwa
- loss of the gemination of R₁ in the prefix conjugation, the impv. and the infinitives and change of the preceding vowel from /i/ to /ē/ (this applies to all gutturals including ה and ח)

Notes

Verbs I gutt. may have the vowel /a/ in the prefix syllable of the Ni. suffix conjugation and participle instead of /æ/, e.g., *נַעֲשָׂה* it was done (2 Kgs 23:22). This is often the case with the verb *עשה*.

Retraction of stress may occur in prefix conjugation and imperative forms without suffix, e.g., *וַיִּאָסֶף* and he was gathered (Gen 25:8), *וַיִּנָּחַם* and he regretted (Gen 6:6).

The original vowel /ē/ between R₂ and R₃ is restored in pausal forms of the prefix conjugation, e.g., תִּשְׁבַּעַתְּ *you shall swear* (Deut 6:13), יִשְׁבַּעוּ *they swear* (Jer 5:2).

16.3 Oaths in Biblical Hebrew

Oaths and curses are frequently introduced either with the conditional conjunction אִם for a negative statement (“certainly not”) (1 Sam 3:14) or with אִם לֹא or כִּי for a positive statement (“certainly”) (Josh 14:9; 1 Kgs 1:13). This use of אִם, אִם לֹא, or כִּי is conditioned by the self-imprecation כֹּה-יַעֲשֶׂה-לִּי אֱלֹהִים וְכֹה יוֹסֶף *May God do so to me and add more also* (as, e.g., in 2 Kgs 6:31) which means that the person who takes an oath is willing to accept divine punishment in the case of non-realization of the oath.¹ The use of אִם or אִם לֹא in oaths or curses without the self-imprecation depends on its suppression or omission although it is implied. As oaths are also taken by God (cf. 1 Sam 3:14 above) “the consciousness of the real meaning of the formula was lost at an early period, and אִם לֹא simply came to express verily, אִם verily not” (GKC § 149 b).²

וְלָכֵן נִשְׁבַּעְתִּי לְבֵית עֲלִי
אִם-יִתְכַּפֵּר עוֹן בֵּית-עֲלִי
בְזָבַח וּבִמְנַחָה עַד-עוֹלָם
*Therefore I have sworn to the house of Eli
that the iniquity of the house of Eli shall not
be atoned for by sacrifice or offering forever
(1 Sam 3:14)*

וַיִּשָּׁבַע מֹשֶׁה בַּיּוֹם הַהוּא
לֵאמֹר אִם-לֹא הָאָרֶץ אֲשֶׁר
דָּרַכָה רַגְלִי בָּהּ לְךָ תִּהְיֶה
לְנַחֲלָה וּלְבָנֶיךָ עַד-עוֹלָם
*And Moses swore on that day, “The land on
which your foot treads shall belong to you as
inheritance and to your sons forever” (Josh
14:9)*

הֲלֹא-אַתָּה אֲדֹנָי הַמֶּלֶךְ
נִשְׁבַּעְתָּ לְאַמְתְּךָ לֵאמֹר
כִּי-שְׁלֹמֹה בְנִי יִמְלֹךְ אַחֲרַי
וְהוּא יֵשֵׁב עַל-כִּסְאִי
*Did you not, my lord the king, swear to
your maidservant, “Your son Solomon shall
reign as king after me and he shall sit on my
throne?” (1 Kgs 1:13)*

וַיֹּאמֶר כֹּה-יַעֲשֶׂה-לִּי אֱלֹהִים
וְכֹה יוֹסֶף אִם-יִעֲמֹד רֹאשׁ
אֵלִישָׁע בֶּן-שַׁפְטָן עָלָיו הַיּוֹם
*And he said, “May God do so to me and
add more also, if the head of Elisha son of
Shaphat remains on him today” (2 Kgs 6:31)*

¹ The verbal form יוֹסֶף is a Hiphil jussive form of the verb יָסַף meaning *to do again, continue doing something*.

² A different explanation is offered in JM § 165.

At times, the oath can be expressed as simple statements without **אִם** or **אֲלֵא** (Judg 21:1).

וַאִישׁ יִשְׂרָאֵל נִשְׁבַּע בְּמִצְפָּה
לֵאמֹר אִישׁ מִמֶּנּוּ לֹא־יִתֵּן
בֵּתוֹ לְבָנִימִן לְאִשָּׁה
Now, the men of Israel had sworn in Mizpah,
“No one from us shall give his daughter to
Benjamin as a wife” (Judg 21:1)

An exclamatory formula with a form of **חַי** meaning *life* in this context may be used at the beginning of an oath. If followed by **יְהוּה** (pronounced *ʾădōnāy*) or the independent personal pronoun **אֲנִי** *I*, the form is **חַי** (1 Sam 19:6; Num 14:28). Followed by other nouns the form is **חַיִּי** (1 Sam 17:55; Gen 42:15).

וַיִּשְׁבַּע שָׁאוּל חַי־יְהוּה
אִם־יוּמָת
אֲמַר אֲלֵהֶם חַי־אֲנִי
נֶאֱמַר־יְהוּה אִם־לֹא פָאֶשֶׁר
דְּבַרְתֶּם בְּאָזְנִי בִן אֶעֱשֶׂה
לָכֶם
And Saul swore, “As the Lord lives, he shall
not be put to death” (1 Sam 19:6)
Say to them, “As I live, says the Lord, I will
certainly do to you as you have spoken in my
hearing” (Num 14:28)

וַיֹּאמֶר אַבְנֵר חַי־נַפְשִׁי
הַמֶּלֶךְ אִם־יֵדְעֵתִי
בְּזֹאת תִּבְחָנוּ חַי פַּרְעֹה
אִם־תֵּצְאוּ מִזֶּה כִּי אִם־יָבֹוא
אֶחָיְכֶם הַקָּטָן הִנֵּה
And Abner said, “By your life, O king, I do
not know” (1 Sam 17:55)
By this you shall be tested: As Pharaoh lives,
you shall not go out from here unless your
youngest brother comes here (Gen 42:15)

Another way of introducing an oath is the interjection **חֲלִילָה** *far be it!* (literally *to the profane!*). Different constructions following **חֲלִילָה** are possible; the most common one is the construction with the preposition **לְ** and an enclitic personal pronoun and a following inf. cs. with the preposition **מִן** (Gen 44:17).

וַיֹּאמֶר חֲלִילָה לִי מַעֲשֹׂת
זֹאת
And he said, “Far be it from me that I should
do this”, i.e., I will not do this (Gen 44:17)

The deity by whom someone takes an oaths is expressed by a prepositional phrase with **בְּ** (1 Sam 28:10).

וַיִּשְׁבַּע לָהּ שָׁאוּל בַּיהוָה
לֵאמֹר חַי־יְהוּה אִם־יִקְרָךְ
עוֹן בְּדָבָר הַזֶּה
And Saul swore to her by the Lord, “As the
Lord lives, no punishment shall happen to you
because of this matter” (1 Sam 28:10)

16.4 Exercises

16.4.1 Translation of Verbal Forms

Translate the following verbal forms. Identify the gender (masc., fem., com.) and number (sg., pl.) of forms of which the English translation is ambiguous (i.e., *you, they*). Mark the stressed syllable if stress is not on the last syllable.

- 1 נִלְחָם 2 נִלְחָמוּ 3 נִלְחָמוּ 4 נִלְחָמִי 5 יִלְחָם 6 וַיִּלְחָם 7 תִּלְחָמוּ

17.2 The Hiphil Binyan

17.2.1 The Forms of the Strong Verb in the Hiphil

With about 9300 occurrences, the Hiphil is the second most frequent binyan behind the Qal. The Hiphil is characterized by the additional element /h/ that is prefixed as the syllable *hi-* in the suffix conjugation or *ha-* in the imperative, infinitive construct and infinitive absolute. In the prefix conjugation and the participle the /h/ is elided between two vowels *CVha-* > *Ca*. The suffixes and prefixes of the SC, PC and imperative indicating person, number and gender are identical to the suffixes and prefixes of the corresponding forms in the Qal and the Niphal.

SC	sg.	3 m.	הִקְטִיב

Notes

Vocalic suffixes are not stressed in Hiphil forms. Compare הִכְתִּיבוּ with the corresponding Qal form כָּתְבוּ.

In *wayyiqtol* forms and jussive forms without a suffix the thematic vowel is /ē/, e.g., *וַיִּשְׁלֵךְ* and *he threw* and *וְיִשְׁלֹךְ* *let him throw*. With enclitic pronouns, however, these forms have the thematic vowel /ī/, e.g., *וַיִּשְׁלֵכֶהוּ* and *he threw it [the staff]*.

In the imperative the /h/ of the Hiphil at the beginning of the forms is preserved. This applies to the infinitive construct and infinitive absolute as well.

The *šere* of the imperative m. sg. corresponds to the same vowel in *wayyiqtol* forms and jussive forms. With enclitic pronoun, however, this form has the thematic vowel /ī/, e.g., *הִשְׁלִיכֵהוּ* *throw it [the staff]*.

The longer forms of the imperative Hiphil is *הִשְׁמָעוּ*, e.g., *הִשְׁמָעוּ* *listen!* (Job 33:1).

The primitive form of the prefix conjugation was **yahaqtil* or **yuhaqtil*. The /h/ of the Hiphil was elided between vowels; the prefix vowel /a/ of the /*-ha-/ syllable is preserved as the vowel of the prefix syllable. The long vowel /ī/ is due to analogy with II w/y verbs.

The explanations about the prefix syllable of the prefix conjugation forms are to be applied to the prefix of the participles, too: *mVhaktīb* > *maktīb* > *maktīb* *מַכְתִּיב*.

The participle f. sg. is usually *מַכְתִּיבָה*; forms with the feminine ending -ā are attested, too, e.g., *מַכְתִּיבָהּ* *a woman giving birth for the first time* (Jer 4:31).

The primitive form of the suffix conjugation may have been **hiqtil*. The long vowel /ī/ in forms without a suffix or forms with vocalic suffix is due to analogy with II w/y verbs (→ 24.2.1). The vowel /a/ in the second syllable of suffix conjugation forms with consonantal suffixes is the result of the sound change /i/ > /a/ in stressed closed syllables (so-called Philippi's Law). A different primitive form of the suffix conjugation **haqtal* may be assumed for some categories of weak verbs.¹

17.2.2 The Meaning of Verbs in the Hiphil

The Hiphil has the following main meanings:

- Causative (someone causes somebody to do something), e.g., *מִלַּךְ* Qal *to rule as king*, Hi. *to make somebody rule as king*; *רָאָה* Qal *to see*, Hi. *to show something to somebody*

¹ Some scholars assume **haqtal* to be the primitive form of the suffix conjugation forms of both strong and weak verbs. In this case the prefix vowel *hi-* is the result of attenuation /a/ > /i/ in an unstressed closed syllable. The long vowel /ī/ in forms without a suffix or forms with vocalic suffix is due to analogy with imperfect forms where its presence can be accounted for by analogy with II w/y verbs.

- Denominative (the verb is derived from a noun): noun אָזן *ear* → verb אָזן Hi. *to listen, hear*; noun שָׁרֵשׁ *root* → verb שָׁרֵשׁ Hi. *to put down roots*
- Declarative: רָשַׁע Qal *to be guilty*; Hi. *to declare guilty* (cf. רָשָׁע *guilty*)
- Intransitive (frequently from adjectives or stative verbs): שָׁמֵן Hi. *to make fat* (causative) or *to become fat* (intransitive; from שָׁמֵן *fat, robust*)
- Without obvious Hiphil meaning: שָׁלַךְ Hi. *to throw*
- Sometimes the Hiphil functions as a causative to the Niphal: שָׁבַע Ni. *to take an oath*, Hi. *to make somebody take an oath*; נָצַל Ni. *tear oneself away, deliver oneself; be delivered*, Hi. *take away; rescue*

If the meaning of a verb in the Qal is known, these semantic categories should be considered for the translation of the verb in the Hiphil. A lexicon will help in further specifying the meaning of Hiphil forms.

17.2.3 Guttural Verbs in the Hiphil Binyan

Verbs I gutt.

In the suffix conjugation, the prefix vowel is changed to *səgol*: הִעֲמִיד, etc. (cf. the primitive form **hiqtil*).

The prefix syllable is usually closed by a *ḥaṭef* vowel: suffix conjugation הִעֲמִידָהּ, prefix conjugation הִעֲמִידִי, etc.

Verbs II gutt.

Verbs II gutt. don't show any differences to the regular strong verbs without gutturals because the second root consonant R₂ is always at the beginning of a syllable with a full vowel.

Verbs III gutt.

In forms of the suffix conjugation without suffix and in the prefix conjugation the long vowel /ī/ is followed by a furtive *pataḥ*, e.g., הִשָּׁבַיעַ *he made somebody swear*. The same applies to the /ē/ of the infinitive absolute, e.g., הִשָּׁבַע.

In *wayyiqtol* forms without suffix and forms of the jussive and the imperative without suffix the vowel /ē/ is replaced by /a/, e.g., וְאַל-יִבְטַח אֶתְכֶם (יִבְטַח) *Don't let Hezeqiah make you trust in the Lord*, 2 Kgs 18:30), וְיִבְטַח אֶתְכֶם *and he made you trust in a lie*, Jer 29:31). This vowel change is also attested in verbs IIIr, e.g., וְיָתַר *and she [Ruth] had left over* (3 f. sg. *wayyiqtol* of the verb יָתַר Hi., Ruth 2:14), but preservation of the *šere* is attested as well, e.g., וְיִבְעַר *and he set to fire* (Judg 15:5).

In the participle f. sg. the vowel sequence of the ending is *a-a*, e.g., מִנְעַת (from the root נגע; 2 Chr 3:11).

17.3 Hypothetical Conditional Clauses with לו or לוֹלֵא

For hypothetical conditional clauses – the contents of both the *if*-clause and the main clause are unreal – the conjunctions לו *if* and לוֹלֵא or – with a different spelling and actually more frequent – לוֹלֵא *if not* are used (לוֹלֵא is dissimilated from *lūlō*(?), i.e., לו + לֵא).

וַיֹּאמֶר אַחֵי בְנֵי־אִמִּי הֵם
חַי־יְהוָה לֹו הַחַיִּיתֶם אוֹתָם
לֹא הִרְגֵנִי אֶתְכֶם
And he said, “They are my brothers, the sons
of my mother. As the Lord lives, if you had
spared their their lives I would not kill you.”
(Judg 8:19)

וַיֹּאמֶר הָאִישׁ אֶל־יֹאבָב וְלֹו
אֲנֹכִי שֹׁקֵל עַל־כַּפִּי אֶלֶף
כֶּסֶף לֹא־אֲשַׁלַּח יָדִי
אֶל־בֶּן־הַמֶּלֶךְ
And the man said to Joab, “Even if I felt the
weight of a thousand shekels in my hands
I would not stretch out my hand against
the king’s son” (2 Sam 18:12 Qere Aleppo
Codex)

וַיֹּאמֶר לָהֶם לוֹלֵא חֲרַשְׁתֶּם
בְּעֹגְלָתִי לֹא מָצְאתֶם חִידָתִי
And he said to them, “If you had not plowed
with my heifer you would not have solved my
riddle” (Judg 14:18)

Note

The conjunction לו is sometimes spelled לוֹא or even לֵא in the Ketiv.

Related to its use in hypothetical conditional clauses is the use of the suffix conjugation or *qatal* form in hypothetical main clauses (Gen 18:12; Gen 21:7).

וַתִּצְחַק שָׂרָה בְּקִרְבָּהּ לֵאמֹר
אַחֲרַי בָּלִיתִי הִיָּתָה־לִּי עֲדָנָה
And Sarah laughed to herself, “Shall I have
pleasure after I am worn out?” (Gen 18:12)

וַתֹּאמֶר מִי מִלֵּל לֵאבְרָהָם
הַיִּנִּיקָה בָּנִים שָׂרָה
And she said, “Who would have said to Abra-
ham that Sarah has nursed children?” (Gen
21:7)

17.4 Wishes with לו

As a particle, לו also introduces wishes (Gen 17:18). At times, these wishes are hypothetical (Num 14:2).

- וַיֹּאמֶר אַבְרָהָם אֶל־הָאֱלֹהִים And Abraham said to God, “O that Ishmael
 לוֹ יִשְׁמַעְאֵל יְחִיָּה לְפָנֶיךָ might live before you!” (Gen 17:18)
- וַיֹּאמְרוּ אֲלֵהֶם כָּל־הָעֵדָה And the whole congregation said to them, “If
 לוֹ־מָתְנוּ בְּאֶרֶץ מִצְרַיִם אוֹ only we had died in Egypt or if only we had
 בַּמִּדְבָּר הַזֶּה לוֹ־מָתְנוּ died in this wilderness!” (Num 14:2)

18.2 The Hophal Binyan

18.2.1 The Forms of the Strong Verb in the Hophal

The Hophal is the passive form to the Hiphil; e.g., הִשְׁלַכְתִּי *I threw* (Hi.) and הִשְׁלַכְתִּי *I was thrown* (Ho.). There are only about 380 occurrences of the Hophal in the Hebrew Bible with most forms from weak verbs. In Modern Hebrew, the Hophal is called Huphal.

The Hophal is characterized by the prefix syllable **hu-*. The vowel sequence *u-a* is characteristic of passive verbal forms. In Tiberian Hebrew the prefix vowel can be either /ɔ/ (< /u/) (*qameṣ ḥatuf*) or the original /u/ (*qibbuṣ*). In the participle /u/ is more frequent than /ɔ/ because of the preceding labial sound /m/.

Notes

In the suffix conjugation the primitive form was **huqtila*. The thematic vowel changed from **i* to *a* due to analogy with the prefix conjugation *yuqtal* and/or Philippi's Law (*i* > *a* in stressed closed syllable).

In the prefix conjugation the primitive form was **yuhuqṭalu* resulting in *yuqtal* or *yəqṭal* in Tiberian Hebrew after the loss of the short final vowel and the elision of the intervocalic /h/.

The imperative Ho. is attested only twice in the Hebrew Bible: הָפְנִי *be turned back* (from the root פנה, Jer 49:8), הִשְׁכַּבְּךָ *put yourself to bed* (Ezek 32:19).

18.2.2 Guttural Verbs in the Hophal

Verbs I gutt.

The prefix vowel of I gutt. verbs is always /ɔ/ (*qameṣ ḥatuf*). There are forms with *ḥatef qameṣ* and forms with silent *šwa* with the first root consonant, e.g., הִהָפֵךְ *it has been turned upon* (Job 30:15) יִעֲמֹד *it shall be placed* (Lev 16:10)

Verbs II gutt. and III gutt.

The forms that are attested in the Hebrew Bible do not show differences to the regular strong verb.

18.3 Wishes with מִי יִתֵּן

The interrogative pronoun מִי *who?* and the verbal form יִתֵּן (3 m. sg. prefix conjugation of נתן) are used idiomatically with the meaning *Would that it may be so!* to express wishes.

וַיֹּאמְרוּ אֶל־הֶם בְּנֵי יִשְׂרָאֵל
מִי־יִתֵּן מוֹתֵנוּ בְּיַד־יְהוָה
בְּאֶרֶץ מִצְרַיִם

And the Israelites said to them, "Would that we had died through the hand of the Lord in the land of Egypt." (Exod 16:3)

בִּבְקֹר תֹאמַר מִי־יִתֵּן עֶרֶב
וּבְעֶרֶב תֹאמַר מִי־יִתֵּן בֹּקֶר

In the morning you will say, "If only it were evening", and in the evening you will say, "If only it were morning" (Deut 28:67)

18.4 The Forms וַיְהִי and וַיְהִי as Discourse Markers

The forms וַיִּהְיֶה (3 m. sg. *wayyiqtol*) and וַהֲיָאֵל (3 m. sg. *wəqataltí*) of the verb הָיָה may be used as ordinary verbs in normal verbal clauses with a subject and a predicate.

וַיְהִי רָעָב בְּאֶרֶץ
 And there was a famine in the land (Gen
 12:10)

וַיֹּאמֶר יִשְׂרָאֵל אֶל-יוֹסֵף הִנֵּה
אֲנִי מֵת וְהָיָה אֱלֹהִים עִמָּךְ

*And Israel said to Joseph, "I am about to die,
but God will be with you" (Gen 48:21)*

In many cases, however, the forms וַיְהִי and וַיִּהְיֶה are not used as normal verb forms but as discourse markers to indicate the time reference for the following state of affairs as past with וַיְהִי or as future with וַיִּהְיֶה . Usually these forms are followed by a temporal adverbial phrase or a temporal clause (Gen 26:32; Hos 1:5). There are quite many cases of וַיִּהְיֶה in a future time discourse before a normal main clause (Gen 4:14).

When used as discourse markers, וַיְהִי and וַיְהִי should not be translated.

וַיְהִי בַּיּוֹם הַהוּא וַיָּבֹאוּ עֲבָדֵי יִצְחָק

וְהָיָה בַּיּוֹם הַהוּא וְשָׁבַרְתִּי
אֶת־קֶשֶׁת יִשְׂרָאֵל בַּעֲמֻק
יִזְרְעֵאל

*On that day I will break the bow of Israel in
the plains of Jezreel (Hos 1:5)*

וְהָיָה כָל-מֹצְאִי יִהְיֶנִּי *And whoever finds me will kill me* (Gen 4:14)

In line with the possible meanings of *waw*-SC (*wəqataltī*) forms, וַיִּזְכֹּר may be used as a discourse marker for the past time with iterative meaning (Exod 33:9; Judg 19:30).

וְהָיָה כְּבֹא מֹשֶׁה הָאֱלֹהִים
יֵרֵד עַמּוּד הָעָנָן וְעָמַד בַּפֶּתַח
הָאֹהֶל וְדִבֶּר עִם־מֹשֶׁה

*When Moses entered the tent, the pillar of
cloud would come down and stand at the
entrance of the tent and he [the Lord] would
speak with Moses (Exod 33:9)*

וְהָיָה כָּל-הָרָאָה וְאָמַר
לֹא-נִהְיָתָה וְלֹא-נִרְאָתָה
כְּזֹאת לְמִיּוֹם עָלוֹת
בְּנֵי-יִשְׂרָאֵל מֵאֶרֶץ מִצְרַיִם
עַד הַיּוֹם הַזֶּה

Anybody who saw it, would say “Something like this has not happened or been seen since the day the Israelites went up from the land of Egypt until this day” (Judg 19:30)

Notes

In the second syllable of 3 m. sg. suffix conjugation forms three different vowels are attested:

- *šere* is the most common vowel, e.g., בָּקֵשׁ Pi. *he sought* (in pausal forms one only finds *šere*).
- *pataḥ* is less common, e.g., קִדֵּשׁ Pi. *he sanctified*.
- *səgol* with the three verbs יָדַבֵּר Pi. *he spoke*, כָּבַשׁ Pi. *he washed* (clothes) and כָּפַר Pi. *he appeased, made atonement*.

In *wayyiqṭol* forms 3 m. sg./pl. the prefix consonant /y/ loses its gemination because of the vocal *šwa*, e.g., וַיִּדְבֹּר *and he spoke*.

Geminate verbs have strong Piel forms with consonants in all three slots, e.g., קָלַל (SC) *he cursed* (2 Sam 19:22), לָקַלַּל (inf. cs.) *to curse* (Josh 24:9).

If R_2 is a sibilant (i.e., ס, צ, ש and ש) or מ, נ, ק, י, and ל and requires a vocal *šwa*, the gemination of R_2 is frequently lost. The following examples illustrate this phenomenon:

suffix conj.	בָּקֵשׁוּ	3 m. pl.
prefix conj	תִּבְקֹשִׁי	2 f. sg.
<i>wayyiqṭol</i>	וַיִּבְקֹשׁוּ	3 m. pl.
impv.	בִּקְשׁוּ	m. pl.
inf. cs.	לִבְקֹשִׁי	with enclitic pronoun
participle	מִבְקֹשִׁים	m. pl.

The primitive form of the suffix conjugation form was possibly **kattaba*. In the 3 m. sg. form the vowel *šere* of the second syllable is due to analogy with the prefix conjugation form יָכַתֵּב.¹

The primitive form of the prefix conjugation form was **yukattib* > **yakattib* which developed to יָכַתֵּב in Tiberian Masoretic Hebrew. The same primitive vowels were present in the forms of imperative, the inf. cs. and participle.

19.2.2 The Meanings of Verbs in the Piel

Piel verbs have the following main meanings compared to the Qal:

- *Factitive*: The Piel verb expresses that a state is brought about: גָּדַל Q. *to be, become great*; גָּדַל Pi. *to make great*. The factitive meaning is the most common one.
- *Intensive*: The Piel verb expresses an intensified action compared to the Qal: שָׁבַר Q. *to break*; שָׁבַר Pi. *to shatter, break*. (Sometimes, the difference in meaning may be difficult to discern.)
- *Iterative*: A repeated action or an action that affects a number of objects is expressed: קָבַר Q. *to bury*; קָבַר Pi. *to bury many*.
- *Declarative-estimative*: The Piel verb expresses that the object is in a certain state: קָדַשׁ Qal *to be holy*; קָדַשׁ Pi. *to declare holy*. (JM §52 d: “This may be subsumed under factitive in the sense that, whilst the factitive denotes the generation of a state or quality actually and physically, the declarative-estimative does so mentally or verbally.”)
- *Denominative*: The verb expresses an event that is derived from a noun: כָּהֵן *priest*; כָּהֵן Pi. *to serve as priest*. Denominative verbs in the Piel may have privative meaning: רָשָׁן *fat*; רָשָׁן Pi. *to take away, clear the fat ashes* (besides the factitive meaning *to make fat*).
- *Without obvious Piel meaning*: With a number of verbs, the Piel seems to be used without a particular Piel meaning, e.g., אָרַשׁ Pi. *to betroth*, צִוָּה Pi. *to command*.

If the meaning of a verb in the Qal is known, these semantic categories should be considered for the translation of the verb in the Piel. A lexicon will help in further specifying the meaning.

¹ Alternatively the primitive vowel may have been *kittibu* > *kittib* > *kittēb* with the vowel change **i* > *a* in forms with consonantal suffix due to Philippi’s law (**i* > *a* in closed stressed syllable), e.g., *kittab̥tæm* כִּתְּבֵתֶם.

19.2.3 Verbs with Gutturals or /r/ in the Piel Binyan

Verbs with Gutturals or /r/ as R₂

In Biblical Hebrew as it has been transmitted by the Masoretes, the guttural consonants א /ʔ/, ה /h/, ח /ħ/ and ע /ʕ/ and the consonant ר /r/ are not geminated. At earlier stages of the Hebrew language, however, they could be doubled, but this possibility was lost in stages over time. Depending on when it was lost, Hebrew did either tolerate short syllables in now open unstressed syllables after the loss of the gemination or lengthened the vowel in the now open syllable.

The following verbs with gutturals as R₂ preserve the short vowels /i/ or /a/:

- Almost always: verbs with ח /ħ/, e.g., רַחֲמֵיךָ *I have compassion on you*, יִרְחֶם *he will have compassion*
- Mostly: verbs with ה /h/, e.g., נְהַגְתָּ *you led*, יִנְהֶג *he will lead*
- Frequently: verbs with ע /ʕ/, e.g., בָּעַרְתִּי *I have removed*, יִבְעֵר *he will remove*

The following verbs with gutturals or ר /r/ lengthen the vowels /i/ and /a/ to /ē/ and /ā/, respectively:

- Always: verbs with ר /r/, e.g., בֵּרַכְתִּי *I have blessed*, תִּבְרַךְ *you bless*
- Relatively frequently: verbs with א /ʔ/, e.g., מָאָן *he refused* (suffix conj.), בִּאֵר *he explained* (suffix conj.), but בִּאֵר (inf. abs.) and נִאָצַּר *they disregarded*

Where the strong verb without gutturals requires a vocal šwa with R₂ (forms with vocalic suffixes or participles with plural ending) verbs with a guttural as R₂ have *ḥaṭef pataḥ*, e.g., נִאָפְּרָה *she committed adultery* as opposed to דִּבְרָה *she spoke*.

When the vowel between R₁ and R₂ is lengthened, stress moves to the penultimate syllable in *wayyiqṭol* forms, e.g., וַיְבָרֶךְ *and he blessed*. This is limited to context forms; retraction of stress does not occur in pausal forms.

Verbs with Gutturals as R₁ or R₃

Verbs with gutturals as R₁ do not have different vowels than the regular strong verb.

When R₃ is a guttural (except with weak verbs III ʾ), the vowel /e/ is replaced with /a/ between R₂ and R₃ in forms of the suffix conjugation, the prefix conjugation and the imperative, e.g., שְׁלַח *he let go*, וַיִּשְׁלַח *and he sent out*. In

pausal forms, however, *šere* is used (with furtive *pataḥ*), e.g., יִשְׁלַח *he will set free*.

19.3 Left Dislocation of Clause Constituents

Left dislocation is the placement of a constituent outside and in front of the clause in which it is represented by a pronominal element, the so-called resumptive pronominal element. As a result, the dislocated constituent is separated from the clause. In the following example from Gen 3:12, the subject of the clause הָאִשָּׁה אֲשֶׁר נָתַתָּה עִמָּדִי is dislocated and taken up by the resumptive pronoun הִיא in the clause itself.

הָאִשָּׁה אֲשֶׁר נָתַתָּה עִמָּדִי *The woman that you put at my side – she gave*
הִיא נִתְּנָה-לִי מִן-הָעֵץ *me from the tree (Gen 3:12 Qere)*

The dislocated element can have any syntactic function. In Gen 3:12 it is the subject (see above). In the case of Gen 28:13 it is the direct object, whereas in 2 Kgs 1:6 it is a local complement.

הָאָרֶץ אֲשֶׁר אַתָּה שֹׁכֵב עָלֶיהָ *The land you lie on – I will give it to you and*
לְךָ אֶתְנַנָּה וּלְזֶרְעֶךָ *to your offspring (Gen 28:13)*
לְכֵן תִּמָּטָה אֲשֶׁר-עָלִיתָ שָׁם *Therefore, the bed you went up – you will not*
לֹא-תִרְדּוּ מִמֶּנָּה כִּי-מוֹת *go down from it for you will surely die (2 Kgs*
תָּמוּת *1:6)*

The dislocated element may be marked for its syntactic function in the clause itself even in its position before the clause. In Gen 13:15 the dislocated element is marked as direct object; in Gen 2:17 it is a prepositional phrase.

כִּי אֶת-כָּל-הָאָרֶץ אֲשֶׁר-אַתָּה *For the entire land that you see – I will give*
רָאָה לְךָ אֶתְנַנָּה וּלְזֶרְעֶךָ *it to you and to your offspring forever (Gen*
עַד-עוֹלָם *13:15)*
וּמֵעֵץ הַדַּעַת טוֹב וָרָע לֹא *But from the tree of the knowledge of good*
תֹּאכַל מִמֶּנּוּ *and evil – you shall not eat from it (Gen*
2:17)

The dislocated element may even be followed by a *wayyiqtol* form.

וּבְנֵי יִשְׂרָאֵל הַיֹּשְׁבִים בְּעָרֵי
יְהוּדָה וַיִּמְלֹךְ עֲלֵיהֶם
רְחַבְעָם And the Israelites that lived in the cities of
Juda – Rehabeam became king over them
(1 Kgs 12:17)

Left dislocation may occur in all sorts of clauses. In Ps 11:4 it is a nominal clause.

יְהוָה בַּשָּׁמַיִם כִּסְאוֹ The Lord – his throne is in heaven (Ps 11:4)

Left dislocation is used to mark the dislocated element as salient for the clause, usually as the topic about which the predication is made.

The traditional term for left dislocation is the Latin expression *casus pendens* because the dislocated element seems to be suspended in front of the clause. The English term *left dislocation* is based on the left-to-right writing direction of English or modern transliterations of languages; it does not agree with the writing direction of Hebrew.

20.2 The Pual and Hitpael Binyanim

20.2.1 The Forms of the Strong Verb in the Pual and Hitpael

The Pual and the Hitpael are the passive and the reflexive counterparts of the Piel. As the Piel, the Pual and the Hitpael are characterized by the gemination (doubling) of the second root consonant.

As a passive form, the Pual is marked by the vowel sequence *u-a*, e.g., נִתְּצָה *it was torn down* (Judg 6:26), וְכִבֹּשׁ *and it shall be washed* (Lev 15:17) (except in forms with vocal *šwa* with the second root consonant due to suffixation).

The Hitpael as a reflexive form is marked by a prefixed /t/ before the first root consonant.

Notes Pertaining to Pual Forms

In *wayyiqṭol* forms 3 m. sg./pl. the prefix consonant /y/ loses its gemination because of the *dageš forte*, e.g., וַיִּבְקֹשׁ and [the matter] was investigated (Esth 2:32).

Pual imperative forms are not attested in Biblical Hebrew. The only attestation of an infinitive is עֲנוּתוֹ (inf. cs. with enclitic pronoun) *his being afflicted* in Ps 132:1 (from the verb עָנָה Pu. *to be afflicted*; Pi. *to humble, mishandle, afflict*).

As in the Piel, gemination of the second root consonant may be lost in certain consonants with vocal *šwa*. In Biblical Hebrew only three forms can be found: תִּבְקֹשׁ (PC 2 fem. sg. Ezek 26:21), מִחְלִילִי (part. masc. pl. cs. st. Ezek 32:26), מִקְצָעַת (part. fem. pl. cs. st. Exod 26:23; 36:28).

In pausal forms, the *pataḥ* is lengthened to *qameṣ*, e.g., שָׁלַח *he was sent* (Obad 1:1). Forms with vocal *šwa* with the second root consonant in the context forms have the original vowel /a/ as a *qameṣ*, e.g., חִבְּשָׁה *it was bound up* (Isa 1:6).

Geminate verbs have strong Pual forms with consonants in all three slots, e.g., יִקָּלַל *he shall be considered cursed* (Isa 65:20; pausal form).

Notes pertaining to Hitpael Forms

As in the Piel, gemination of R₂ may be lost in forms with certain consonants as R₂ with vocal *šwa*, e.g., יִתְהַלְּלוּ *they shall boast*, הַלְּלוּ-יָהּ *Praise Yah!*.¹ Preservation of the gemination, however, appears to be frequent.

Seven verbs have the vowel /a/ as thematic vowel between R₂ and R₃, e.g., הִתְאַנָּף *he became angry* (so-called Hitpaal; cf. JM § 53 b).

Pausal forms have /a/ in intermediate pause and /ā/ in major pause instead of the /ē/ of the context forms, e.g., יִתְצַב and יִתְצָב.

¹ In the Piel, this occurs with sibilants (i.e., ס, צ, ש and שׁ) or the consonants מ, נ, ק, י, and ל as R₂.

20.2.2 Hitpael Forms with Sibilants and Dentals as R₁

When R₁ is a sibilant, i.e., ס, צ, ש or שׁ, the prefix /t/ and the sibilant change position (*metathesis*), e.g., *mitsattēr > mistattēr מִסְתַּתֵּר [he is] *hiding himself* (1 Sam 23:19), wāʾətsammārā > wāʾəštammārā וָאֶשְׁתַּמְרָה and I kept myself (2 Sam 22:24).

In the case of the emphatic sibilant ז as R₁, the /t/ of the prefix and R₁ do not only change position but the /t/ is assimilated to the emphatic sibilant ז becoming emphatic itself (/t/ > /ṭ/), e.g., *hiṣṣayyadnū > *hiṣṭayyadnū הִצִּטִּי יָדֵינוּ *we took [something] as provision with us* (Josh 9:12), הֵצִטְּנוּ how shall we justify ourselves? (Gen 44:16; pausal form).

In the case of the root זכה total assimilation of the prefix /t/ is attested: *hitzakkû > *hiztakkû > *hizdakkû > hizzakkû הִזְכּוּ *make yourselves clean* (Isa 1:16; the only example of this in the Hebrew Bible).

With dentals, the prefix /t/ of the Hitpael is usually assimilated to the dental R₁ of the root, e.g., *mitdabbēr > middabbēr מִדַּבֵּר *someone speaking* (Num 7:89), *hiṭṭaharnū > hiṭṭaharnū הִטְהַרְנוּ *we have cleansed ourselves* (Josh 22:17).

With /t/ as R₁, only one ת is written, e.g., הִתַּמַּמְתָּם tittammām *you deal with integrity with [the blameless]* (2 Sam 22:26 par. Ps 18:26).

Assimilation of the /t/ to a following /n/ or even /k/ is attested, as well.

20.2.3 Verbs with Gutturals or /r/ in the Pual and Hitpael Binyanim

Verbs with Gutturals or /r/ as R₂

In the same way as in the Piel, the short vowel before R₂ may either be preserved despite being in an open unstressed syllable or it is lengthened /a/ > /ā/. The same tendencies for the preservation of the short vowel or the lengthening of the vowel can be observed in the Pual and the Hitpael (cf. Chapter 19). The following examples illustrate this:

With preservation of /a/ as a short vowel:

- suffix conj.: רָחַצְתָּ
- prefix conj.: יִרְחֹם
- inf. cs.: לְהִתְנַחֵם, הִתְנַחֵל
- imperative: הִטְהַרְוּ (masc. pl., verb טהר)
- participle: מִתְנַחֵם (masc. sg.)

Note

In pausal forms, the vowel /a/ between R₁ and R₂ may change to /æ/ because

of the *qameṣ* with the guttural as R₂, e.g., יִתְּנָהּ לִי, יִתְּנָהּ לִי (compare the similar vowel change with the definite article and the interrogative He).

With lengthening of the short vowel to /ā/:

- suffix conj.: מַעֲכֹי (3 com. pl.), יִתְּבַרְכֵּי (3 masc. pl. with waw cons.)
- prefix conj.: יִנְעֲשׂוּ (3 masc. pl.), יִתְּפַאֵר (3 masc. sg.)
- wayyiqtol: וַיִּנְאֲלוּ, וַיִּתְּנֵעֲשׂוּ (3 masc. pl.)
- participle: מִתְּבַרְךְ, מִנְאֵל (masc. sg.)

Where the strong verb without gutturals requires a vocal *šwa* with R₂, verbs with a guttural as R₂ have *ḥatef pataḥ*, e.g., וַיִּתְּנֵעֲשׂוּ.

Verbs with a guttural as R₁ do not have forms that deviate from the strong verb without gutturals.

In verbs with the gutturals ה, ח and ע as R₃ the vowel /ē/ between R₂ and R₃ is usually replaced by /a/, e.g., יִתְּנֶנָּח *he will engage in thrusting with someone*. In the inf. cs. and the participle the /ē/ may be preserved and a furtive *pataḥ* is inserted, e.g., הַשְׁתַּנַּע, מִשְׁתַּנַּע *someone behaving like a mad man*.

20.3 Accents (Part II)

The accents of the Masoretic Text were already briefly introduced in chapter 15. Here all the accents of the two accentuation systems for the three poetic books Psalms, Job, Proverbs (mnemonic word אָמַת for אִיּוֹב מְשָׁלִים תְּהִלִּים *Job, Proverbs, Psalms*) and the other 21 books are presented. It is not necessary to memorize the names and functions – conjunctive or disjunctive – of all the accents. The following tables help to identify accents and their functions.

Disjunctive Accents in the 21 Books

יְכַרְכֵּי :	<i>silluq</i> (always with : <i>sof pasuq</i>)
יְכַרְכֵּי	<i>atnaḥ</i>
יְכַרְכֵּי	<i>segolta</i> (postpositive)
יְכַרְכֵּי	<i>šalšelet</i> (with the divider <i>paseq</i>)
יְכַרְכֵּי	<i>zaqef qaton</i>
יְכַרְכֵּי	<i>zaqef gadol</i>

תִּפְחָה	<i>tiḥa</i>
רַבִּיָּה	<i>rəḥia</i> ^c
זַרְקָה	<i>zarqa</i> (postpositive)
פַּשְׁטָה/פַּשְׁטָה	<i>pašta</i> (postpositive)
יָתִיב	<i>yətib</i> (prepositive)
תַּבִּיר	<i>təbir</i>
גֶּרֶשׁ	<i>gereš</i>
גֶּרְשָׁיִם	<i>geršayim</i>
פַּזֶּר	<i>pazer</i>
פַּזֶּר גָּדוֹל	<i>pazer gadol</i> or <i>qarne p̄ara</i>
תַּלִּישׁ גָּדוֹל	<i>təliša gədola</i> (prepositive)
לַגֶּרְמֶה	<i>lagarme</i> (with the divider <i>paseq</i>)

Conjunctive Accents in the 21 Books

מִנַּח	<i>munah</i>
מַחֲפָק	<i>məhuppak</i>
מֶרֶקָה	<i>merəka</i>
מֶרֶקָה קַפּוּלָה	<i>merəka kəpula</i>
דַּרְגָּה	<i>darga</i>
אַזְלָה	<i>azla</i>
תַּלִּישׁ קֶטַנָּה	<i>təliša qətanna</i> (postpositive)
גַּלְגַּל	<i>galgal</i> or <i>yeraḥ</i>
מַיְאֵלָה	<i>mayəla</i>

Note

The accent *mayəla* מַיְאֵלָה looks like *tiḥa* תִּפְחָה. It is used to mark secondary stress in words or groups with *silluq* or *atnaḥ*.

Disjunctive Accents in the Three Poetic Books

21.2 Verbs I *n* and Verbs I *ʾ*: Derived Binyanim

21.2.1 General Overview of the Forms of Verbs I *n*

When the first root consonant /n/ is immediately followed by the second root consonant, the /n/ is assimilated to the following consonant. The result are weak forms. In the Qal, this could be observed in the forms of the prefix conjugation. The assimilation of the first root consonant /n/ happens in the Niphal in the suffix conjugation and the participle. In the Hiphil and Hophal it happens in *all* forms. The Piel, Pual and Hitpael forms of I *n* verbs are always strong as the first root consonant /n/ is never immediately followed by a consonant.

Notes

The endings marking person, gender and number are the same as the endings of the corresponding forms of the strong verb.

In the suffix conjugation and participle forms of the Niphal, the first root consonant /n/ is assimilated to the second root consonant: *ningaṗ* > *niggaṗ* נִגַּף.

In the prefix conjugation, the /n/ infix of the Niphal merges with the first root consonant: *yin-nāgēṗ* יִנְגַּף.

As with the strong verb, a prosthetic /h/ is added to the form to preserve the structure of the imperative and infinitives in the Niphal.

For the Niphal infinitive absolute only forms that are attested in the Hebrew Bible are mentioned in the paradigm.

In all forms of the Hiphil, the first root consonant /n/ closes the prefix syllable and is assimilated to the second root consonant, e.g., **hingida* > **higgid* > *higgīd* הִגִּיד.

In the Hophal, the first root consonant /n/ is assimilated to the second root consonant, e.g., **hungad* > *huggad* הֻגַּד as in the Hiphil. The prefix vowel is always /u/.

21.2.2 Verbs I n and II Guttural: Derived Binyanim

In Niphal forms of the verb נחם Ni. *to regret*, the /n/ of the root is assimilated to the second root consonant. The result are weak forms, e.g., *ninḥam* > *niḥḥam* > *niḥam* (with loss of the gemination and preservation of the vowel /i/).¹

In the Hiphil, however, the /n/ is not assimilated to the second root consonant resulting in strong forms.

The forms of the verbs נחם and נחל in the following table illustrate this.

			Niphal	Hiphil	Hophal
SC	sg.	3 m.	נָחַם		
		1 c.	נָחַמְתִּי	הִנְחִלְתִּי	הֻנְחַלְתִּי
PC	sg.	3 m.	יִנְחָם	יִנְחִיל	
		<i>wayyiqṭol</i>	וַיִּנְחָם		
Inf. cs.			הִנְחָם	הִנְחִיל	
Part.		m. sg.	נָחֵם	מִנְחִיל	

¹ The only other verb I n II gutt. in the Hebrew Bible is the verb נער Ni. with the strong SC form נִעַרְתִּי *I am shaken off* in Ps 109:23.

21.2.3 Verb I³: Exceptional Forms in the Derived Binyanim

The forms of I³ verbs in the Piel, Pual and Hitpael are always strong. In the Niphal, Hiphil and Hophal binyanim the forms are almost always strong displaying only the regular vowel changes of guttural verbs, e.g. PC Ni. יֵאָכַל *it will be eaten* with loss of the gemination (cf. יִכְתֹּב). In rare cases, exceptions to this occur with forms with quiescent א. The following examples illustrate this:

- Niphal: נִאָּחֲזוּ *they have settled* (Josh 22:9) and וְנִאָּחֲזוּ *and they will settle* (Num 32:30); cp. the strong form נִאָּחֲזָה *it was caught* (Gen 22:13)
- Hiphil: אֲבִידָהּ *let me destroy* (verb אָבַד; Jer 46:8); cp. the strong form וְהָאָבַדְתָּ *and you shall destroy* (Deut 7:24)

21.3 Causal Constructions

Causal constructions indicate the cause of or the reason for a state of affairs. They can be expressed as subordinate clauses or as prepositional phrases.

Frequently used causal conjunctions in Biblical Hebrew are: כִּי *because, for*, יֵעַן אֲשֶׁר *because*, עַל אֲשֶׁר *because*. The causal subordinate clause may precede the main clause (Gen 3:14; 1 Kgs 20:28) or it may follow it (Gen 5:24; Exod 32:35).

כִּי עָשִׂיתָ זֹאת אָרוּר אַתָּה מִכָּל-הַבְּהֵמָה וּמִכָּל חַיַּת הַשָּׂדֶה	<i>Because you have done this, you are cursed among all the cattle and all the animals of the field</i> (Gen 3:14)
וַיִּתְהַלֵּךְ חֲנוּךְ אֶת-הָאֱלֹהִים וַאֲיָנֹנִי כִּי-לָקַח אֱלֹהִים	<i>Enoch walked with God and he was no more because God had taken him</i> (Gen 5:24)
כֹּה-אָמַר יְהוָה יֵעַן אֲשֶׁר אָמְרוּ אַרְם אֱלֹהֵי הָרִים יְהוָה וְלֹא-אֱלֹהֵי עֲמָקִים הוּא וְנָתַתִּי אֶת-כָּל-הַחֲמוֹן הַגָּדוֹל הַזֶּה בְּיָדְךָ וַיֵּדְעוּם כִּי-אֲנִי יְהוָה	<i>Thus says the Lord: Because the Arameans said that the Lord is a god of mountains and not a god of plains, I will give this entire great multitude in your hand so that you know that I am the Lord</i> (1 Kgs 20:28)
וַיִּגַּף יְהוָה אֶת-הָעָם עַל אֲשֶׁר עָשׂוּ אֶת-הָעֵגֶל אֲשֶׁר עָשָׂה אַהֲרֹן	<i>The Lord struck the people because they had made the calf that Aaron had made</i> (Exod 32:35)

Chapter 21

Infrequent causal prepositions are: **עַל־דָּבָר**, **יַעַן כִּי**, **מֵאֲשֶׁר**, **בְּאֲשֶׁר**, **אֲשֶׁר** and **תַּחַת אֲשֶׁר**. **עַל כִּי**, **עַקֵּב אֲשֶׁר**, **עַקֵּב כִּי** and **עַקֵּב אֲשֶׁר**.

The following prepositions are frequently used with causal meaning:

- בְּ** *because of*, e.g., **בְּצִדְקָתִי** *because of my righteousness* (Deut 9:4), **בְּחַטָּאָיו** *because of his [own] sin* (Deut 24:16)
- לְמַעַן** *because of, for the sake of, on account of*, e.g., **לְמַעַן דָּוִד עַבְדִּי** *because of David, my servant, and because of Jerusalem that I have chosen* (1 Kgs 11:13), **לְמַעַן** *for the sake of the house of the Lord our God* (Ps 122:9)
- מִן** *because of*, e.g., **מִן תִּרְאֶה עֵינֶיךָ אֲשֶׁר תִּרְאֶה** *lit. because of the sight of your eyes that you will see* (Deut 28:34), **מִרְעַת יֹשְׁבֵי-בָהּ** *because of the evil of those who dwell in it* (Jer 12:4)
- מִפְּנֵי** *because of*, e.g., **מִפְּנֵי הָרָעָב** *because of the famine* (Gen 47:13), **מִפְּנֵי רָעַת עַמִּי יִשְׂרָאֵל** *because the evil of my people Israel* (Jer 7:12)
- עַל** *because of*, e.g., **עַל כָּל־הָרָעָה אֲשֶׁר עָשָׂה** *because of all the evil that [the people] has done* (Deut 31:18), **עַל־הַשְּׁבוּעָה** *because of the oath that we swore to them* (Josh 9:20)

21.4 Impersonal Constructions (Vague Subject)

The vague subject (as *one* in the English clause *One never knows*) is used when the identification of the agent of the action is impossible or irrelevant. In Biblical Hebrew, the vague subject is expressed often by 3 c./m. pl. verbal forms (2 Sam 19:9), 3 m. sg. verbal forms (Num 35:30) or passive verbal forms (Gen 27:42). In English, passive verbal forms are often employed to translate these impersonal constructions.

וְלְכָל־הָעָם הִגִּידוּ לֵאמֹר *And all the people were told, “Behold, the*
הִנֵּה הַמֶּלֶךְ יוֹשֵׁב בַּשַּׁעַר *king is sitting in the gate”* (2 Sam 19:9)

כָּל־מַכֵּה־נֶפֶשׁ לְפִי עֵדִים יִרְצַח אֶת־הָרֹצֵחַ	Everyone who kills a person – one shall kill the murderer on the evidence of witnesses (Num 35:30)
וַיִּגֵּד לְמֶלֶךְ מִצְרַיִם כִּי בָרַח הָעָם	And it was reported to the king of Egypt that the people had fled (Exod 14:5)

22.2 Verbs III *y* and Verbs III *ʾ*: Derived Binyanim

22.2.1 Preliminary Remarks

Weak verbs of the type III *y* and III *ʾ* have a weak third root consonant, either in the form of a vocalic element in the case of III *y* verbs or in the form of a quiescent *ʾ* if it is at the end of the syllable. The main features of all the derived binyanim, however, are either located at the beginning of the verbal form in the Niphal, Hiphil, Hophal and Hitpael or in the second root consonant in the form of gemination in the Piel, Pual and Hitpael with the exception of the long vowel /ī/ in a number of Hiphil forms. As a consequence the main features of the derived binyanim do not interact with the weak element of III *y* and III *ʾ* verbs.

22.2.2 General Overview of the Forms of Verbs III y

Verbs of the III y type are characterized by the long final vowels /ā/ (*qameš*), /ā̃/ (*səgol*) /ē/ (*šere*) in many forms. These vowels remain the same in all binyanim. Before consonantal suffixes in the suffix conjugation the forms vary between the vowels /ī/ (*hireq*) and /ē/ (*šere*). These vowels are usually spelled with the vowel letter ם. Vocalic suffixes always follow the second root consonant directly.

Notes

Variation between the vowels /ī/ (*hireq*) and /ē/ (*şere*) after the second root consonant in suffix conjugation forms is attested even within one and the

same verse, e.g., וְהִכִּיתִי and וְהִכִּיתָ in 1 Sam 23:2 וַיִּשְׁאַל דָּוִד בַּיהוָה לֵאמֹר (הַאֵלֹהִים בְּפָלִשְׁתִּים וְהוֹשַׁעְתָּ הָאֶלֶף וְהִכִּיתִי בְּפָלִשְׁתִּים הָאֵלֶּה וַיֹּאמֶר יְהוָה אֶל־דָּוִד לֵךְ וְהִכִּיתָ בְּפָלִשְׁתִּים וְהוֹשַׁעְתָּ אֶת־קַיִלָּה David asked the Lord, “Shall I go and attack these Philistines?” And the Lord said to David, “Go and attack the Philistines and save Keilah”).

As in the Qal, IIIy verbs may lose the long final vowel in the jussive, in wayyiqtol forms and imperative forms without an ending, e.g., וַיִּצַּו and he commanded, וַיִּגְל and he uncovered (Pi.), וְהִגְל and she uncovered (Pi.), וַיִּתְּכֶס and he covered himself (Hitpa.), צִו command! (impv.).

Verbs that are both I gutt. and IIIy (e.g., עָשָׂה) have the same vowel changes before the first root consonant as the strong verb (→ 16.2.3), e.g., נַעֲשֶׂה Ni. it was done (with *pataḥ* in the prefix), נַעֲשֶׂתָה Ni. it was done (with *segol* in the prefix), יַעֲשֶׂה Ni. it is done etc. The same applies to the verb רָאָה in the Niphal, e.g., יֵרָאֶה he shall appear (Exod 23:17).

The verb עָלָה is used both in the Qal and in the Hiphil (558 and 250 times in the Hebrew Bible, respectively). Because of the guttural as first root consonant, prefix conjugation forms of the Qal and the Hiphil are identical, e.g., יַעֲלֶה Q. he will go up or Hi. he will bring up, וַיַּעַל Q. he went up or Hi. he brought up. As the verb עָלָה is intransitive in the Qal and transitive in the Hiphil, the presence or absence of a direct object makes it possible to distinguish between these forms. (Ellipsis of direct objects is frequent in Biblical Hebrew.)

The verb הִיָּה has suffix conjugation and participle forms in the Ni. with the prefix vowel /i/, e.g., נִהְיָתָה (SC 3 f. sg.) it happened, נִהְיָה (part. f. sg.)

The verbs נָטָה Hi. to turn, incline and נָכָה Hi. to smite, strike are doubly weak: In and IIIy. The rules regarding sound changes of both weak verb categories In and IIIy are applied (→ 11.3, → 12.2). As a result, Hiphil forms of these two verbs show only R₂ while R₁ /n/ is only present in the gemination of R₂ in non-apocopate forms. The following characteristic Hiphil forms are attested:

SC	הִטָּה	הִכָּה
PC	יִטָּה	יִכָּה
Juss.	תִּט	יִךְ
waw-PC	וַיִּט, וַיִּטָּט	וַיִּךְ, וַיִּכָּךְ
Impv.	הִטָּה, הִט	הִכָּה, הִךְ
Inf. cs.	הִטּוֹת	הִכּוֹת
Part.	מִטָּה	מִכָּה

The verbs נָכָה and נָטָה are also attested in the Pual, e.g., מִכָּה (SC), מִטָּה,

מְטִה (part.).

As in the strong verb, assimilation of R₁ to R₂ does not happen in the case of a guttural as R₂, e.g., יְנַחֵנִי *he leads me* (Ps 23:3; verb נָחָה Hi. with ePP).

The infinitive absolute הִרְבֵּה of the verb רָבָה Hi. is used as an adverb with the meaning *greatly, exceedingly*. The form הִרְבָּה is used as a substitute for the infinitive absolute, but the form הִרְבֵּה is used as infinitive absolute as well.

22.2.3 General Overview of the Forms of Verbs III ʿ

As in the Qal, the weak consonant ʾ becomes silent at the end of a syllable and, therefore, is not a consonant anymore. However, it is preserved in writing in most cases. When vocalic suffixes or enclitic pronouns are added, the ʾ is retained as a consonant.¹

Notes

In the suffix conjugation of the derived binyanim, the vowel between the second root consonant and a consonantal suffix is always *ṣere*, whereas the Qal has *qameṣ*.

The 3/2 f. pl. forms of the prefix conjugation with the vowel /*ā*/ are due to analogy with III^y verbs, e.g., *הִמָּצְאוּ* *they will be found*. Sometimes, forms of III^y verbs follow the pattern of III^y completely, e.g., *נִבִּיתָ* *you have prophesied* (verb *נָבֵא*; Jer 26:9) as opposed to the expected form *נִבֵּאתָ* (Jer 20:6; 28:6).

A frequent doubly weak verb is the verb *נִבֵּא* Ni. *to prophesy* with forms like *נִבֵּא* (3 masc. sg. SC); *נִבֵּא*; *נִבֵּא* (part. masc. sg.). In Hitpael forms of the verb *נִבֵּא* only the third root consonant *א* is weak, e.g., *נִתְנַבֵּא* (3 masc. sg. waw-PC).

Participle masc. pl. forms of III^y verbs usually have vocal *ṣwa* with the second root consonant instead of *qameṣ*, e.g., *נִבְּאִים* *prophesying* (cf. *נִלְחָמִים* *fighting*).

22.3 Temporal Subordinate Clauses

Temporal subordinate clauses locate in time a state of affair in relation to another state of affairs. The event can be either anterior, simultaneous or posterior to the other event. Frequently used temporal conjunctions are: *אַחֲרֵי אֲשֶׁר* *after*, *כַּאֲשֶׁר* *when*, *אַחֲרַיִם* *before*, *עַד* *until*, *כִּי* *when*.

The temporal subordinate clause either precedes the main clause (Josh 9:16) or it follows the main clause (2 Sam 19:31).

וַיְהִי מִקְצֵה שְׁלֹשֶׁת יָמִים אַחֲרֵי אֲשֶׁר-כָּרְתוּ לָהֶם בְּרִית וַיִּשְׁמְעוּ כִּי-קָרְבִּים הֵם אֵלָיו וּבִקְרָבוֹ הֵם יֹשְׁבִים	<i>At the end of three days after they had made a covenant with them, they heard that they were from close by and that they were living among them</i> (Josh 9:16)

--	---

וַיֵּלְכוּ וַיָּבֹאוּ הַהָרִים וַיֵּשְׁבוּ שָׁם שְׁלֹשֶׁת יָמִים עַד-שָׁבוּ הַרְדָּפִים	<i>They left and came to the hills and stayed there for three days, until the pursuers re- turned (Josh 2:22)</i>
וְלֹא-הֵאֱמַנְתִּי לְדְבָרִים עַד אֲשֶׁר-בָּאתִי וַתִּרְאֵנִה עֵינִי כִּי נַעַר יִשְׂרָאֵל וָאֲהַבְהוּ	<i>I did not believe the words, until I came and my eyes saw it (1 Kgs 10:7)</i> <i>When Israel was a child, I loved him (Hos 11:1)</i>

Similar to temporal subordinate clauses with a finite verb as predicate are constructions with a preposition and an infinitive construct.

אָמוּתָהּ הַפֶּעַם אַחֲרֵי רְאוּתִי אֶת-פָּנֶיהָ	<i>I can die now after I have seen your face (Gen 46:30)</i>
וְאֵלֶּה הַמְּלָכִים אֲשֶׁר מָלְכוּ בְּאֶרֶץ אֲדוֹם לִפְנֵי מֶלֶךְ-מִלְכֵי לְבָנֵי יִשְׂרָאֵל	<i>These are the kings that ruled in the land of Edom before a king of the Israelites ruled as king (Gen 36:31)</i>
כִּי לֹא-יֹאכַל הָעָם עַד-בֹּאוֹ [שְׁמוּעֵל]	<i>... for the people do not eat before he [Samuel] comes (1 Sam 9:13)</i>

For the use of the inf. cs. with the prepositions כִּי and בְּ as temporal adverbial expressions see section 9.3.3.

23.2 Verbs I y: Derived Binyanim

23.2.1 Verbs I y: Niphal, Hiphil and Hophal

Verbs of the type Iy are verbs with originally either /y/ or /w/ as first root consonant. In the Niphal, Hiphil and Hophal most Iy verbs behave like having /w/ as first root consonant. Only few exceptions to this are found in Biblical Hebrew. As the weakness of Iy verbs is in first position, the vowels of the prefix syllables in the Niphal, Hiphil and Hophal interact with the first root consonant in the following ways:

1. In the suffix conjugation and participle Niphal: **nawšab* > *nōšab* נוֹשֵׁב in the suffix conjugation (from a primitive form **naqtala*) and **nawšab* > *nōšāb* נוֹשֵׁב in the participle
2. In the Hiphil of most verbs: **hawšaba* > *hōšib* הוֹשִׁיב (SC) (from a primitive form **haqtala*), **yuhawšib* > *yōšib* יוֹשִׁיב (PC) (the same applies to the other Hi. forms)
3. In the Hiphil of a few verbs: **haytaba* > *hētib* הִיטִיב (SC) (from a primitive form **haqtala*), **yuhaytib* > *yētib* יִיטִיב (PC) (the same applies to the other Hi. forms)
4. In the Hophal: **huwrad* > *hūrad* הוּרַד (SC), **yuwrad* > *yūrad* יוּרַד (PC) (the same applies to the other Ho. forms)

Notes

The primitive forms for the suffix conjugation **naqṭal* (Ni.) and **haqṭal* (Hi.) are different from the primitive forms for the corresponding forms of the strong verbs **niqṭal* and **hiqṭil*, respectively (→ 16.2.1, → 17.2.1).

In the Niphal prefix conjugation, imperative and infinitives the first root consonant is /w/ in most cases. The /n/ of the Niphal is assimilated to the /w/, e.g., *yinwašī* > *yīwwāšēā* יִנְשָׁע he will be saved (pausal form; Prov 28:18). At times, the first root consonant /y/ is preserved, e.g., יִיָּרֶה he shall be shot (Exod 19:13).

Five Iy verbs have Hiphil forms that are based on an original /y/ as R₁: יַטֵּב Hi. to do good (74 ×), יִלֵּל Hi. to howl (30 ×), יִנָּק Hi. to nurse, suckle (9 ×), יִמָּן Hi. to go to the right (5 ×), יַשֵּׁר Hi. to make even (2 ×).

In *wayyiqṭol* forms of the Hiphil, the long vowel /ī/ as thematic vowel is replaced by /ē/ (except in pausal forms), e.g., יָיֻשָּׁב he settled (transitive; Gen 47:11).

In *wayyiqṭol* forms of the Hiphil without suffix, stress is frequently retracted to the penultimate syllable with shortening of the thematic vowel /ē/ > /æ/, e.g., וַיֵּשְׁבּ, וַיִּתְּכֵם. But forms without retraction of stress are attested, too, e.g., וַיִּשְׁבּ (Gen 47:11). With a guttural as third root consonant the vowel /ē/ is shortened to /a/, e.g., וַיִּשַׁע and he saved (Exod 14:30).

The verb הִלָּךְ follows the pattern of the verbs יָשַׁב, יָרַד, etc., in the Hiphil forms. Illustrative Forms are the following:

SC	sg.	3 m.	הוֹלִיךְ
	pl.	3 c.	הוֹלִיכּוּ
PC	sg.	3 m.	יוֹלִיךְ
	pl.	3 m.	יוֹלִיכוּ
waw-PC	sg.	3 m.	וַיּוֹלִךְ
Inf. cs.			הוֹלִיךְ

Frequent doubly weak verbs are יֵצֵא Hi. to bring out, lead out, יִרְהַ Hi. to praise and יִרָא Ni. to be feared, terrible, awesome. The verb יִרָא Ni. is almost exclusively attested in the participle נוֹרָאָה, נוֹרָא etc. The verbs יֵצֵא Hi. and יִרְהַ Hi. have the following characteristic forms:

SC	sg.	3 m.	הוֹצִיא	
	pl.	3 c.	הוֹצִיאוּ	הוֹדוּ
PC	sg.	3 m.	יוֹצִיא	יוֹדֶה
	pl.	3 m.	יוֹצִיאוּ	יוֹדוּ
Inf. cs.			הוֹצִיא	הוֹדוּת

The verb **יָסַף** *to add* is used in the Qal only in the suffix conjugation ($28 \times$), the inf. cs. (only $1 \times$) and the part. (only $1 \times$). In the Hiphil it is used in all forms (except the inf. abs.; 171 times in total), e.g., הוֹסִפֶּה (SC), יוֹסִיף (PC), וַיֹּסֶף (*wayyiqtol*).

Verbs of the type Iy with **צ** as second root consonant have forms with a geminated **צ** in the Hi. and Ho., e.g., וַיִּצְיִנוּ *and they placed* (1 Sam 5:2), וַיִּצְקוּ *and they poured them out* (with ePP; Josh 7:23), תִּצְיִתוּ *you shall set on fire* (Josh 8:8). Although forms like these look like forms of In verbs, they are derived from the verbs יָצַן Hi. *to set, place*, יָצַק *to empty, pour* and יָצַת *to set on fire*, respectively.

The verb יָלַד has inf. cs. forms in the Hophal with a geminated second root consonant instead of a long vowel /ū/ in the prefix syllable: הוֹלִלְדֶּת or הוֹלְלֶדֶת *hullædæt* in the constructions יוֹם הַלְּלֶדֶת *birthday* (Gen 40:20) or יוֹם הוֹלְלֶדֶת *day of birth* (Ezek 16:4).

23.2.2 Verbs I y: Piel, Pual and Hitpael

In the Piel, Pual and Hitpael Iy have strong forms in the entire paradigms. In the Piel and Pual the first root consonant /y/ is preserved. In the Hitpael of some verbs the first root consonant is changed to /w/ while in the majority of verbs the /y/ is preserved. Important forms are included in the following table (only attested forms are included).

			Piel	Pual	Hitpael	
SC	sg.	3 m.	יָסַר	יִסָּר	הִתְיַצַּב	הִתְנַדָּה
	pl.	3 m.	יָסְרוּ		הִתְיַצְּבוּ	הִתְנַדְּדוּ
PC	sg.	3 m.	יִיָּסַר		יִתְיַצַּב	
	pl.	3 m.			יִתְיַצְּבוּ	וַיִּתְנַדְּדוּ

			Piel	Pual	Hitpael
Inf. cs.			יָסַד		הִתְיַצַּב הִתְיַצַּב
Part.	sg.	m.	מִיָּסַד	מִיָּסַד	מִתְיַצֵּב

23.3 Modifying verbs

Some verbs may be used together with another verb as modifying verbs. When used in this way, they function as adverbial modifiers, i.e., the modifying verb expresses only an adverbial idea whereas the other verb expresses the main verbal idea. Verbs that are frequently used as modifying verbs are:

	Normal meaning	Meaning as modifying verb
יָסַד Q./Hi.	<i>to add</i>	<i>to do something again, continue doing something; with a negative: to stop doing something; to not do something anymore</i>
שׁוּב Q.	<i>to return</i>	<i>to do something again</i>
מָהֵר Pi.	<i>to hurry</i>	<i>to do something quickly</i>
רַבָּה Hi.	<i>to multiply, increase</i>	<i>to do something many times</i>
שָׁכַם Hi.	<i>to rise early</i>	<i>to do something early (in the morning)</i>

In many cases, the modifying verb precedes the modified verb which is in the infinitive construct, usually with the preposition לְ (1 Sam 7:13) but also without (Gen 8:12).

וַיִּכְנְעוּ הַפְּלִשְׁתִּים וְלֹא־יָסְפוּ עוֹד לָבוֹא בְּנִבְוֵל יִשְׂרָאֵל	<i>And the Philistines were subdued and did not come into the territory of Israel again (1 Sam 7:13)</i>
וְלֹא־יָסְפָה שׁוּב־אֵלָיו עוֹד	<i>[The dove] did not return to him anymore (Gen 8:12)</i>
לֹא־יֻכַּל בַּעֲלָהּ הָרִאשׁוֹן אֲשֶׁר־שָׁלְחָהּ לָשׁוּב לְקַחְתָּהּ לְהִיּוֹת לוֹ לְאִשָּׁה	<i>Her first husband, who sent her away, cannot take her back again to be his wife (Deut 24:4)</i>

וַיֹּאמֶר יִצְחָק אֶל-בְּנוֹ מִהֲזֹה מַהֲרָתָ לְמָצָא בְנִי	And Isaac said to his son, “How did you find [it] so quickly, my son?” (Gen 27:20)
וַיֵּשְׁבִים מִשְׁרַת אִישׁ הָאֱלֹהִים לְקוֹם	And the servant of the man of God got up early in the morning (2 Kgs 6:15)

Instead of a verbal form and an infinitive construct two finite verbal forms may be joined together, either in a syndetic construction with the conjunction ו (2 Sam 18:22; 1 Sam 25:23) or in an asyndetic construction without ו (Isa 52:1). The first verb is used as the modifying verb.

וַיִּסָּף עוֹד אַחִימַעַז בֶּן-צָדוֹק וַיֹּאמֶר אֶל-יֹאבָב ...	And Ahimaaz son of Zadok said again to Joab (2 Sam 18:22)
וַתֵּרָא אַבִּיגַיִל אֶת-דָּוִד וַתִּמְהַר וַתֵּרָד מֵעַל הַחֲמֹר	And Abigail saw David and quickly got off the donkey (1 Sam 25:23)
... כִּי לֹא יוֹסִיף יְבֹא-בָךְ עוֹד עָרְל וְטָמֵא	... for no uncircumcised or unclean will come into you anymore (Isa 52:1)

Notes

In the Niphal, the open prefix syllable in the suffix conjugation and the participle needs to be noted. In the prefix conjugation the /n/ of the Ni. is assimilated to the first root consonant, e.g., □ *yinkān > *yinkōn > yikkōn יִכּוּן.

Hiphil forms are characterized by an open prefix syllable. If the prefix syllable immediately precedes the stressed syllable, it has a full vowel. Otherwise the

vowel is reduced.

In the suffix conjugation Hiphil and the participle, the vowel of the prefix syllable is /ē/ (*šere*) (cf. the Hiphil form of the strong verb **הִקְטִיב**). In the other forms, i.e., the prefix conjugation, the imperative, and the infinitives, it is /ā/ (*qameš*) (cf. the Hiphil prefix conjugation form of the strong verb **יִקְטִיב** etc.)

Before consonantal suffixes a long, unchanging connecting vowel /ō/ is usually inserted between the second root consonant and the suffix which carries the stress, e.g., **הִקְיִמְתִּי** *I have carried out* (1 Sam 15:13). However, forms without connecting vowel are attested, too, e.g., **הִנָּפַתְּ** (root **נִפַּח**) *you have swung [your tool above it]* (Exod 20:25).

In the prefix conjugation, 3/2 f. pl. forms without connecting vowel are attested, too, e.g., **תִּשְׁבְּנָה** (verb **שָׁבַע**), **תִּקְיִמְנָה** (verb **קָם**).

The doubly weak verb **בִּוֵּא** is frequently used in the Hiphil. As can be expected, the /ʔ/ is silent at the end of a syllable, but it functions as a consonant when a vowel follows. In the suffix conjugation Hiphil, the verb **בִּוֵּא** has usually forms without connecting vowel, e.g., **הִבִּיאתְּ** *you have brought*. But with enclitic personal pronouns forms with connecting vowel are used, e.g., **הִבִּיאֲתָנִי** *you have brought me* (2 Sam 7:18).

In forms without suffix, II w/y verbs have distinct jussive and *wayyiqtol* forms in the Hiphil, e.g., **יָקֵם** *may he set up* as opposed to **יִקְיֵם** *he will set up*. *waw*-PC forms (*wayyiqtol*) show retraction of stress and shortening of the thematic vowel, e.g., **וַיָּקֵם** *wayyāqæm*; **וַיִּשָּׁב** *wayyāšæb*.

Long imperative forms of II w/y verbs have the long vowel /ī/ between the first and second root consonant in the Hiphil, e.g., **הִקְיִמְהָ** and **הִבִּיאֶהָ**.

In the Hiphil, all II w/y verbs have the same thematic vowel irrespective of their thematic vowel in the Qal.

Suffix Conjugation

	$\bar{a}$ (< *a)	$\bar{e}$ (< *i)	$\bar{o}$ (< *u)
Q.	קָם	יָמַת	בִּוֵּשׁ
Hi.	הִקְיֵם	הִקְיִמְתָּ	הִבִּישׁוֹתָ

Prefix Conjugation

	$\bar{u}$	$\bar{i}$	$\bar{o}$ (< *ā)
Q.	יָקֵם	יָבִין	יָבִישׁוּ
Hi.	יִקְיֵם	יִבְיִן	יִבְיִשׁוּ

The verb **נָוַח** Q. *to rest* has two distinct sets of Hiphil forms with different meanings. Hiphil A follows the pattern of the verb **קָם** in the Hiphil. In Hiphil

B the first root consonant is geminated. The meaning of נִוּחַ in Hiphil A is *to cause to rest, to give rest*. In Hiphil B the meaning is *to lay, set down; to leave, let remain*. The verb נִוּחַ occurs in Hiphil A about 34 times and in Hiphil B about 69 times.

			Hiphil A	Hiphil B
SC	sg.	3 m.	הִנִּיחַ	הִנִּיחַ
PC	sg.	3 m.	יָנִיחַ	יָנִיחַ
waw-PC	sg.	3 m.	וַיָּנִיחַ	וַיָּנִיחַ
Impv.	sg.	m.		הִנַּח
	pl.	m.	הִנְיָחוּ	הִנְיָחוּ
Inf. cs.			הִנִּיחַ	הִנִּיחַ
Part.	sg.	m.	מִנִּיחַ	מִנִּיחַ

In forms of the waw-PC and the imperative without suffixes the vowel between the two root consonants is /a/ (*pataḥ*) because of the guttural /ḥ/ ח. The Hiphil A waw-PC form וַיָּנִיחַ is identical to the corresponding Qal form; the context helps to distinguish the two forms.

The verb בּוֹשׁ Q. *to be ashamed* has two distinct Hiphil forms with different meanings. There are forms that follow the other II w/y verbs such as קוּם, e.g., הִתְבַּשְׁתָּ, הִתְבַּשְׁתָּ. These forms have the meaning *to put to shame*. The variant forms follow the Iy verbs, e.g., הִבְשִׁיתָ, הִבְשִׁיתָ. These forms have the meaning *to be put to shame, be ashamed*.

Hophal forms of II w/y verbs follow the pattern of Iy verbs. Originally the Hophal forms had a short vowel in the prefix syllable, e.g., **huqam*. As the short vowel /u/ in the open syllable had to be reduced, the characteristic vowel of the passive would have been lost. The short vowel was therefore lengthened **huqam* > *hūqam* by analogy with the Iy verbs.

Hophal forms with a vocalic suffix like הִמָּוֶתוּ *they were killed* (2 Sam 21:9) and הוּבְאוּ *they were brought in* (Gen 43:18) are the only forms of II w/y verbs in Masoretic Hebrew without a vowel between the first and the second root consonant.

24.2.2 Verbs II w/y: Polel, Polal and Hitpolel

With very few (and late) exceptions, II w/y verbs are not used in the Piel, Pual or Hitpael, e.g., לְקַיֵּם *to confirm* (Esth 9:29). Instead, they are used in the Polel, Polal and Hitpolel. These binyanim are characterized by a long unchangeable

vowel /ō/ after the first root consonant and reduplication of the second root consonant. As a result, forms of these binyanim are easy to identify. The vowel /ō/ after the first root consonant is often spelled plene but may be spelled defectively, too. The meaning of the Polel, Polal and Hitpolel corresponds with the Piel, Pual and Hitpael, respectively. In Biblical Hebrew, there are 172 instances of Polel forms, 13 Polal forms and 70 Hitpolel forms.

The following table contains characteristic forms. For Polal the verb כּוּן *Po. to set up, establish* is used and for the Hitpolel the verb בִּין *Hitpo. to behave intelligently*, because these verbs are relatively frequent. Forms of other verbs supplement the two verbs, when important forms are missing.

			Polel	Polal	Hitpolel
SC	sg.	3 m.	כּוּן		הִתְבּוֹנֵן
		2 m.	כּוֹנֵן	חֹלֵלֶת	הִתְבּוֹנֶת
	pl.	3 c.	כּוֹנְנוּ	כּוֹנְנוּ	הִתְבּוֹנְנוּ
PC	sg.	3 m.	יְכּוֹן		יְתְּבּוֹן
		pl.	יְכּוֹנְנוּ*	יְחֹלְלוּ	יְתְּבּוֹנְנוּ
Impv.	sg.	2 m.	כּוּן		הִתְבּוֹן
		pl.	כּוֹנְנוּ		הִתְבּוֹנְנוּ
Inf. cs.			כּוֹן		
Part.	sg.	m.	מְכּוֹן*	מְרוֹם	מְתְּבּוֹרֵר
		pl.	מְכּוֹנִים*		מְתְּקוֹמִים

Notes

The immediate context helps to distinguish between ambiguous forms of the Polel (active) and Polal (passive).

Participles have a /m/ with *šwa* ךְ as prefix consonant.

In the Polel and Hitpolel, the vowel /e/ after the second root consonant is changed to /a/ in suffix conjugation forms with consonantal suffix due to Philippi's Law.

In the Hitpolel, pausal forms have the vowel /ā/ between the reduplicated second root consonant.

25.2 Verbs II Geminate: Derived Binyanim

25.2.1 Verbs II Geminate: Niphal, Hiphil and Hophal

The Niphal forms are characterized by an open prefix syllable in the suffix conjugation and the participle. In the prefix conjugation, the imperative and infinitives the /n/ is assimilated to the first root consonant, e.g., *yinsab* > *yissab* יִסַּב.

In the Hiphil, many forms are characterized by open prefix syllables. In prefix conjugation forms, the prefix syllable may be open. In this case, the second root consonant is geminated when suffixes are attached. But the first root consonant may be doubled in prefix conjugation forms, as well (so-called aramaizing forms).

Hophal forms follow the pattern of Iy verbs in order to preserve the original short vowel /u/ in the prefix syllable: **husab* > *hūsab* הוּסַב.

As in the Qal, vocalic suffixes are not stressed. A connecting vowel is inserted between the geminated second root consonant and a consonantal suffix. The connecting vowel bears the stress.

When suffixes are added, the gemination of the second root consonant is preserved.

The following table only contains selected forms because of the relative infrequency of II gem. verbs in the derived binyanim.

Part.	sg.	m.	נָסַב	מִסָּב	
		f.	נָסְבָּה		
	pl.	m.	נָסְבִּים		
		f.	נָסְבוֹת		

Notes

In the suffix conjugation Niphal, the thematic vowel between the first and second root consonant may be /ō/ or /ē/ instead of /a/, e.g., וְנִבְּיוּ *and they will be plundered*, נִמְּסָה *it is melted* (but as a pausal form נִמְּסָה).

In the Hiphil the thematic vowel of the 3 f. sg. and 3 c. pl. forms may be either /a/ or /ē/, e.g., הִסְבִּינָה *they brought round* (1 Sam 5:9–10), הִסְבִּינָה *she/it began* (Judg 20:40), הִסְבִּינָה *they began* (1 Sam 3:2).

Verbs I gutt. and II gem. have Niphal suffix conjugation forms like the expected נִבְּרָה *it was burned* (3 masc. sg. SC, pausal form; from the verb בָּרַח; Ezek 15:5) or נִבְּרָה (3 masc. sg. SC; from the verb בָּרַח; with loss of the gemination of the first root consonant). In the prefix conjugation forms with a lengthened prefix vowel as result of the loss of the gemination are found, e.g., יִבְּרָה (**yinhāt* > **yihhāt* > *yēhāt*) or יִבְּרָה (cf. the inf. cs. הִבְּרָה).

With a guttural or /r/ as second root consonant the thematic vowel may be lengthened when suffixes are added, e.g., *וְהִצִּירֹתִי* and *I will cause distress* (verb *צָרַר* Hi.; Jer 10:18), *וְהִרְעֵתָם* you have done something bad (verb *רָעַע* Hi.; Gen 43:6).

Forms without a connecting vowel between the second root consonant and the consonantal suffix are also found, e.g., *וְהִפְרִתָּהּ* and *you shall make ineffectual* (verb *פָּרַר* Hi.; 2 Sam 15:34). In this form the gemination of the second root consonant is lost.

Aramaizing forms with a geminated first root occur a number of times, e.g., *וַיֵּצֵב* and *he caused to go around* (Josh 6:11), *וַיֵּבִי* and *they brought* (1 Sam 5:8), *וַיִּתֵּם* let him count out the entire amount (verb *תָּמַם* Hi.; 2 Kgs 22:4), *וַיַּחֵל* (with loss of the gemination of the /h/ and preservation of the short vowel) let him [not] make invalid (verb *חָלַל* Hi.; Num 30:3).

In rare cases, the gemination of the second root consonant is missing, e.g., *וַיְבַלְּהוּ* and *let us confuse* (1 com. pl. waw-SC Qal from the verb *בָּלַל*; Gen 11:7), *וַיְבַקְקֶהָ* and *it shall be disturbed* (3 fem. sg. waw-SC Ni. from the verb *בָּקַק*; Jes 19:3), *וַיַּעֲזֶהָ* she made [her face] bold (3 fem. sg. SC Hi. from the verb *עָזָז*; Prov 7:13).

Contamination with forms of II w/y verbs may happen occasionally, e.g., *וַיִּבְּזוּ* (verb *בָּזָז* Ni.) [the earth] will be plundered (Isa 24:3), *וַיַּשִּׁימֵם* (verb *שָׁמַם* Hi.) he will devastate (Jer 49:20). Other deviating forms are attested as well.

25.2.2 Verbs II Geminate: Polel, Polal and Hitpolel

Verbs II gem. are used in the Piel, Pual and Hitpael relatively frequently. Like II w/y verbs, they are used in the Polel, Polal and Hitpolel, binyanim, which are characterized by a long unchangeable vowel /ō/ after the first root consonant and reduplication of the second root consonant. These binyanim correspond with the Piel, Pual and Hitpael in terms of their meaning.

The following table contains characteristic forms. The verb *עָלָל* Polel *to act arbitrarily (toward)* is used, because it occurs in all three binyanim Polel, Polal and Hitpolel. Forms of other verbs supplement this verb, when important forms are missing.

			Polel	Polal	Hitpolel	
SC	sg.	3 m.	עוֹלֵל	עוֹלָל	הִתְהַלְּלוּ	
		3 f.				
		2 m.	עוֹלְלָתָהּ			
PC	pl.	3 c.	עָרְרוּ	יִתְגַּדֵּד	יִתְהַלְּלוּ	
		sg.	3 m.			יִשְׁרָד
		pl.	3 c.			יְעוֹלְלוּ
Impv.	sg.	2 m.	עוֹלֵל		הִתְקוּשְׁשׁוּ	
	pl.	2 m.				
Inf. cs.			קָשַׁשׁ		הִתְעוֹלֵל	
Inf. abs.			עוֹלֵל			
Part.	sg.	m.	מְקַשֵּׁשׁ	מְהוֹלֵל	מְתַגַּלֵּל	
	pl.	m.	מְחַקְקִים		מְתַגַּדְדִּים	

Notes

The immediate context helps to distinguish between ambiguous forms of the Polel (active) and Polal (passive).

Participles have a /m/ with *šwa* ךְּ as prefix consonant.

In pausal forms of the Hitpolel /ā/ is found instead of /ē/, e.g., הִתְגַּדְּדִי you cut yourself (Jer 47:5).

25.3 The Marker of Subordination · שְׁ

The marker of subordination · שְׁ is placed in front of the following word with a *dages forte* in the first consonant of this word. At times, one finds *pataḥ* instead of *segol*, i.e., שְׁ. Before /r/ and /ʕ/ the vowel is changed to /ā/ and the *dages forte* is lost leading to שְׁ

The particle שְׁ functions similarly to the much more frequent אֲשֶׁר. Important functions are:

- marking relative clauses, e.g., כְּחוֹל שְׁעַל-שְׂפַת הַיָּם as the sand which is upon the shore of the sea (Judg 7:12; cf. אֲשֶׁר עַל-שְׂפַת הַיָּם in Gen 22:17)

- as an alternative construction for a construct chain or an enclitic personal pronoun, e.g., כַּרְמִי שְׁלִי *my vineyard* (Song 1:6)
- introducing an object clause, e.g., וְעָשִׂיתָ לִּי אוֹת שֶׁאֲתָה מְדַבֵּר עִמִּי *and give me a sign that it is you who speak with me* (Judg 6:17); וַיֵּדַעְתִּי גַם־אֲנִי שֶׁמִּקְרָה יִקְרָה אֶת־כָּלָם *Yet I know that one fate will befall them all* (Qoh 2:14)
- introducing a causal subordinate clause, e.g., פָּתַח־לִּי אֲחֹתִי רַעֲיָתִי יוֹנָתִי, שֶׁרָאשִׁי נִמְלֵא־טָל *Open to me, my sister, my beloved, my dove, my perfect one, for my head is filled with dew* (Song 5:2)
- introducing a final subordinate clause, e.g., וְהָאֱלֹהִים עָשָׂה שֶׁיֵּרָאוּ מִלְּפָנָיו *and God has done this so that one would fear him* (Qoh 3:14)
- with prepositions in various functions

The subordination marker $\cdot \text{שְׁ}$ occurs 138 times in the Hebrew Bible and is mainly used in Late Biblical Hebrew or in a few earlier texts of northern origin. It is especially frequent in Song of Songs and Qohelet.

25.4 Asyndetic Relative Clauses

Relative clauses are usually introduced with the subordination marker אֲשֶׁר or much less frequently $\cdot \text{שְׁ}$. They are then called *syndetic* relative clauses. It is possible, however, to attach a relative clause directly to the antecedent without a subordination marker. Both verbal clauses (Jer 13:20; Deut 32:17; Exod 18:20; Jer 5:15) and verbless clauses (Isa 51:7) may function as *asyndetic* relative clauses.

אֵיזָה הָעֶדֶר נָתַן־לָךְ	<i>Where is the flock that was given to you?</i> (Jer 13:20)
וְהוֹדַעְתָּ לָהֶם אֶת־הַדֶּרֶךְ יֵלְכוּ בָּהּ וְאֶת־הַמַּעֲשֵׂה אֲשֶׁר יַעֲשׂוּן	<i>... and you shall make known to them the way in which they must walk and what they must do</i> (Exod 18:20; followed by a noun with a syndetic relative clause)
יִזְבְּחוּ לִשְׂדִים לֹא אֱלֹהִים אֱלֹהִים לֹא יָדְעוּם	<i>They sacrificed to demons that were no god, [to] gods they did not know</i> (Deut 32:17)
גֹּיִל־לֹא־תִדַּע לְשׁוֹנוֹ	<i>a people whose language you do not know</i> (Jer 5:15)
עַם תּוֹרָתִי בְּלִבָּם	<i>the people in whose heart is my instruction</i> (Isa 51:7)

Note

In Deut 32:17, the noun אֱלִי is spelled in the Leningrad Codex without *mappiq* whereas in the Aleppo Codex it is spelled with *mappiq*.

25.5 Exercises**25.5.1 Translation of Verbal Forms**

Translate the following verbal forms. Identify the gender (masc., fem., com.) and number (sg., pl.) of forms of which the English translation is ambiguous (i.e., *you, they*). Mark the stressed syllable if stress is not on the last syllable.

26.2 The Verb חוה Hištaphel

The III y verb חוה *to bow down, prostrate; to worship* occurs about 170 times in the Hebrew Bible. It is only used in the Hištaphel (or more precisely Hištap‘el), a binyan that is characterized by a causative prefix consonant /š/, the consonant /t/ which marks reflexivity and, in the suffix conjugation, the imperative and the infinitive construct, a prosthetic /h/. At the same time, חוה is the only verb used in the Hištaphel.

The following forms can be mentioned as examples:

SC	sg.	3 m.	הִשְׁתַּחֲוָה
		2 m.	הִשְׁתַּחֲוִיתָ
		1 c.	הִשְׁתַּחֲוִיתִי
	pl.	3 c.	הִשְׁתַּחֲווּ
		2 m.	וְהִשְׁתַּחֲוִיתֶם
PC	sg.	3 m.	יִשְׁתַּחֲוָה
		2 m.	תִּשְׁתַּחֲוָה
		1 c.	אֲשַׁחֲוֶה
	pl.	2 m.	תִּשְׁתַּחֲווּ
		1 c.	נִשְׁתַּחֲוָה
waw-PC	sg.	3 m.	וַיִּשְׁתַּחֲוּ
	pl.	3 m.	וַיִּשְׁתַּחֲווּ
Impv.	pl.	m.	הִשְׁתַּחֲווּ
Inf. cs.			הִשְׁתַּחֲוֹת
Part.	sg.	m.	מִשְׁתַּחֲוָה
	pl.	m.	מִשְׁתַּחֲוִים

Notes

The verb shows the morphological features of III y verbs.

In the *wayyiqtol*-form without suffixes (3 m./f. sg.) the apocopate forms have a long vowel /ū/ at the end: *wayyištaḥw > wayyištaḥuw > wayyištāhū וַיִּשְׁתַּחֲוּ. In pausal forms the *pataḥ* is lengthened to *qameṣ*, e.g., וַיִּשְׁתַּחֲוּ.

Traditionally, these forms were considered Hitpa‘lel forms of a verb שחה with metathesis of the /t/ and the /š/ and reduplication of the third element of the root, first as a semivowel /w/ and then as a vocalic element as usual with III y

verbs.¹

Since the Ugaritic language, a Central Semitic language from the period of 1400–1200 BCE that is similar to Hebrew, was deciphered in 1930, most scholars analyze these forms as Hištap‘el of a root חוה, because in Ugaritic a Hištap‘el binyan including forms of a verb ḥwy with similar forms and identical meaning as the Hebrew verb חוה is clearly attested, e.g., *tšḥwy she prostrates herself*.

26.3 The Qal Passive

Some verbal forms appear to be Pual or Hophal forms. It can be shown, however, that these forms are remnants of a Qal passive binyan which is the passive counterpart to the Qal in the same way as the Hophal and the Pual are the passive counterparts to the Hiphil and the Piel. The Qal passive was being phased out during the period of Biblical Hebrew but the existing forms in the biblical texts were preserved. The following arguments for the existence of the Qal passive can be mentioned:

1. These alleged Pual or Hophal forms do not have active counterparts in the Piel or Hiphil, respectively.
2. These forms have a meaning that serves as the passive to the meaning of the verbs in question in the Qal.
3. The verb לקח has suffix conjugation forms that are vocalized as Pual and prefix conjugation forms that look like Hophal forms, e.g., לָקַחְתָּ (3 m. sg. SC), יִקָּח (3 m. sg. PC; with assimilation of the /l/). Yet, the meaning of the verb is identical, namely passive to Qal forms: *to be taken*. This situation would be unusual for how the binyanim function in Biblical Hebrew without the assumption of a Qal passive.
4. Classical Arabic has passive forms in Stem I, the equivalent of the Qal binyan in Hebrew, e.g., *fu‘ila it was done* as opposed to the active form *fa‘ala he did*. Internal passive forms are also attested in Old Aramaic and Biblical Aramaic.

Qal passive forms are characterized by the vowel sequence *u–a* which is characteristic of passive forms. The following examples are illustrative:

- suffix conjugation: לָקַחְתָּ (3 m. sg.), לָקַחְתָּהּ (3 f. sg.), יִלְדוּ (3 c. pl.)
- prefix conjugation: יִקָּח (verb לקח), יִתֵּן (verb נתן), יוֹשֵׁת (verb ישית), וְתִקָּח (verb לקח; 3 f. sg. waw-PC)

¹ Cf. GKC § 75 *kk*; BDB 1005a.

- participle: אֶכֶּל (m. sg.; Exod 3:2); לִקַּח (2 Kgs 2:10)

These forms show the characteristics of weak verbs like the assimilation of /n/ or /l/ as in the case of the verb לִקַּח. The following illustrate the use of the Qal passive:

וַיִּשְׁלַחְהוּ יְהוָה אֱלֹהִים מִן־עֵדֶן לַעֲבֹד אֶת־הָאֲדָמָה אֲשֶׁר לָקַח מִשָּׁם	<i>And the Lord God sent him away from the garden of Eden to work the ground from which he had been taken (Gen 3:23)</i>
לִזְאוֹת יִקְרָא אִשָּׁה כִּי מֵאִישׁ לִקְחָהּ־זֹאת	<i>This one shall be called woman because from man she has been taken (Gen 2:23b)</i>
וַתִּקַּח הָאִשָּׁה בֵּית פַּרְעֹה	<i>And the woman was taken into Pharaoh's house (Gen 12:15)</i>

Qal passive forms were already recognized as such by Jewish grammarians during the Middle Ages. In the middle of the 19th century they were rediscovered as Qal passive forms by western scholars and not considered Pual or Hophal forms anymore. Modern lexica recognize Qal passive forms to different degrees. For the identification of Qal passive forms it is recommended to consult *HALOT* or Wilhelm Gesenius, *Hebräisches und aramäisches Handwörterbuch über das Alte Testament*, ed. H. Donner, 18th ed. (Berlin: Springer, 2013). BDB does *not* recognize the Qal passive and therefore should not be consulted for this matter. Electronic versions of the Hebrew Bible with morphological tags recognize only a part of all (possible) Qal passive forms. According to the Westminster Hebrew Morphology tagging, the Qal passive is attested 87 times in the Hebrew Bible. The most frequent verbs in the Qal passive are יָלַד (27 times), לָקַח (15 times) and נָתַן (8 times).²

26.4 Rare Binyanim

The following rare binyanim in Biblical Hebrew need to be mentioned:

- Po‘el (with the passive Po‘al and the reflexive Hitpo‘el), e.g., שָׁרַשׁ *it took root* (Isa 40:24)
- Pa‘lel (with the passive Pu‘lal), e.g., שָׁאֵן *he was at ease* (root שָׁאן; Jer 48:11), passive אָמַל *it became feeble* (root אָמַל; Joel 1:10)

² Hebrew Masoretic Text with Westminster Hebrew Morphology (HMT-W4), Groves-Wheeler Westminster Hebrew Morphology, v. 4.22, version 3.1 in Accordance 14.0.11.

- Pilpel (with the passive Polpal and the reflexive Hitpalpel), e.g., כָּלַל *he sustained* (with /a/ in the second syllable; 2 Sam 19:33); וְכָלְלוּ *and they were supplied with food* (1 Kgs 20:27)

The forms of these binyanim are not easily recognizable as verbal forms, unless they have the familiar verbal suffixes or prefixes. The lexicon will help to identify these forms as verbal forms.

Pilpel forms occur 50 times in the Hebrew Bible. No less than 24 of these occurrences are from the verb כוּל *Pilpel to sustain* (with food). Pilpel forms are easy to identify because of the reduplication of the two root consonants. The vowel structure of Pilpel forms is identical to Piel forms. The difference with Piel forms is that Pilpel forms have two different consonants where Piel forms have the geminated second root consonant. In the same way, the vowel structure of Polpal and Hitpalpel forms is identical to Hitpaal and Pual forms, respectively. Pilpel forms are mainly derived from II gem. verbs and less frequently from II w/y verbs, if roots are counted and not occurrences of Pilpel forms.³

Characteristic Pilpel forms of the verb כוּל are כָּלַל (SC), יָכַל (PC), וְיָכַל (waw-PC), וְכָלַל (waw-SC), כָּלַל (inf. cs.), מְכַלֵּל.

In terms of vowel structure, Pilpel forms are identical to the forms of quadriliteral verbs with four root consonants. In the Hebrew Bible only very few forms of quadriliteral verbs attested. One verb that is worth mentioning is the verb תָּרַגַּם. In the Hebrew Bible, it is attested only once as a participle Polpal מְתָרְגָּם *translated* (Ezra 4:7). It is the normal word for *to translate* from the time of post-biblical Hebrew up to Modern Hebrew (cf. the noun תְּרַגּוּם *translation; Targum*).

26.5 Final and Consecutive Constructions

Final and consecutive constructions indicate the purpose or the consequence or result of a state of affairs, respectively. They can be expressed by subordinate clauses, the use of indirect volitive forms and prepositions.

Frequently used conjunctions introducing final subordinate clauses are לְמַעַן and לְמַעַן אֲשֶׁר (Exod 9:29; Josh 3:4). Less frequent are the conjunctions בְּעִבּוּר (Exod 19:9) and אֲשֶׁר (Deut 4:40). For negative final subordinate clauses the conjunction כִּי is used (Exod 20:19).

³ Alternatively, Pilpel forms can be derived from biconsonantal roots with reduplication of both root consonants. BDB and HALOT do this only for the verb טָאָט.

הַקִּלּוֹת יִחְדָּלוּן וְהַבָּרָד לֹא יִהְיֶה-עוֹד לְמַעַן תֵּדַע כִּי לַיהוָה הָאָרֶץ	<i>The thunder will cease and there will be no more hail so that you may know that the earth belongs to the Lord (Exod 9:29)</i>
אַל-תִּקְרְבוּ אֵלָיו לְמַעַן אֲשֶׁר-תֵּדָעוּ אֶת-הַדֶּרֶךְ אֲשֶׁר תֵּלְכוּ-בָהּ	<i>Do not come close to [the ark], in order that you know the way which you shall go (Josh 3:4)</i>
וַיֹּאמֶר יְהוָה אֶל-מֹשֶׁה הִנֵּה אֲנֹכִי בָּא אֵלֶיךָ בְּעַב הָעָנָן בְּעִבּוֹר וְשָׁמַע הָעָם בְּדִבְרֵי עַמִּי	<i>The Lord said to Moses, "Behold, I am coming to you in the thick cloud, in order that the people may hear when I speak with you" (Exod 19:9)</i>
וְשָׁמַרְתָּ אֶת-חֻקָּיו וְאֶת-מִצְוֹתָיו אֲשֶׁר אֲנֹכִי מִצְוֶיךָ הַיּוֹם אֲשֶׁר יִיטֵב לָךְ וּלְבְנֶיךָ אַחֲרֶיךָ	<i>... and you shall keep his statutes and his commandments that I command you today, in order that it may be well with you and your children after you (Deut 4:40)</i>
וְאַל-יִדְבֹּר עִמָּנוּ אֱלֹהִים פֶּן-נָמוּת	<i>... but do not let God speak with us, lest we die (Exod 20:19)</i>

Consecutive subordinate clauses are mostly introduced with **כִּי** (Exod 3:11) and only rarely with the conjunctions **לְמַעַן** (Jer 27:15) and **אֲשֶׁר** (Gen 13:16).

מִי אֲנֹכִי כִּי אֵלֶךְ אֶל-פַּרְעֹה וְכִי אוֹצִיא אֶת-בְּנֵי יִשְׂרָאֵל מִמִּצְרַיִם	<i>Who am I that I should go to Pharaoh and that I should lead the Israelites out of Egypt (Exod 3:11)</i>
כִּי לֹא שְׁלַחְתִּים נָא-יְהוָה וְהֵם נִבְּאִים בְּשְׁמִי לְשָׁקֶר לְמַעַן הִדִּיחִי אֶתְכֶם	<i>For I have not sent them, and yet they proph- esy in my name falsely, with the result that I will drive you out (Jer 27:15)</i>
וְשָׁמַתִּי אֶת-זֶרְעֶךָ כְּעֹפֶר הָאָרֶץ אֲשֶׁר אִם-יִכְּלֵ אִישׁ לְמִנּוֹת אֶת-עֹפֶר הָאָרֶץ גַּם-זֶרְעֶךָ יִמְנָה	<i>And I will make your descendants as the dust of the earth, so that if someone can count the dust of the earth, your descendants too can be counted (Gen 13:16)</i>

Two clauses that are coordinated with **וְ** with an indirect volitive mood in the second the clause are also frequently used to express a final or consecutive relation. In the second clause, a cohortative (Gen 27:4), an imperative (2 Sam 21:3) or a third person jussive form (Judg 6:30) may be used.

וַעֲשֵׂה־לִּי מִטַּעַמִּים כַּאֲשֶׁר אֶהְיֶה וְהֵבִיֵּאתָ לִּי וְאָכַלְתָּ	... and make for me tasty food as I like [it] and bring it to me so that I may eat [it] (Gen 27:4)
מָה אֶעֱשֶׂה לָּכֶם וּבְמָה אֲכַפֵּר וּבְרַכּוּ אֶת־נַחֲלַת יְהוָה	What shall I do for you and with what shall I make atonement so that you may bless the heritage of the Lord (2 Sam 21:3)
הוֹצֵא אֶת־בְּנוֹךְ יִזְמֹת	Bring out your son that he may die (Judg 6:30)

As prepositions with final meaning can be mentioned לְ (Exod 16:15) and – followed by the inf. cs. – לְמַעַן (1 Sam 17:28), בַּעֲבוּר (Exod 20:20) and with negative meaning לְבִלְתִּי (1 Kgs 15:17).

הוּא הַלֶּחֶם אֲשֶׁר נָתַן יְהוָה לָכֶם לֶאֱכֹלָה	That is the bread that the Lord has given you to eat (i.e., with the intention that you may eat it; Exod 16:15)
כִּי לְמַעַן רָאוֹת תִּמְלָחְמָה יִרְדָּתָ	... for you came down to see the battle (1 Sam 17:28)
וַיֹּאמֶר מֹשֶׁה אֶל־הָעָם אַל־תִּירָאוּ כִּי לְבַעֲבוּר נִסּוֹת אֶתְכֶם בָּא הָאֱלֹהִים	And Moses said to the people, “Do not be afraid, for God has come to test you” (Exod 20:20)
וַיְבִן אֶת־הָרָמָה לְבִלְתִּי תֵּת יֵצֵא וּבָא לְאַסָּא מֶלֶךְ יְהוּדָה	And he fortified Ramah in order to not allow anyone belonging to Asa king of Judah to go out [for battle] or go in (1 Kgs 15:17)

The preposition לְ is also used with consecutive meaning (Ps 78:25).

צִיָּדָה שָׁלַח לָהֶם לְשָׂבַע	... he sent them provisions with satiety as result (Ps 78:25)
--------------------------------	--

26.6 Concessive Subordinate Clauses

A concessive subordinate clause expresses a condition that even if it is fulfilled, does not lead to the result that is expressed in the main clause. In English, the conjunction *although* among others introduces concessive subordinate clauses. In Biblical Hebrew, the most frequent concessive conjunctions are כִּי (Exod 13:17), גַּם כִּי (Ps 23:4a) and גַּם (Jer 36:25).

וַיְהִי בְשַׁלַּח פָּרְעֹה אֶת־הָעַם וְלֹא־נָחֵם אֱלֹהִים דֶּרֶךְ אֶרֶץ פְּלִשְׁתִּים כִּי קָרֹב הוּא	<i>When Pharaoh let the people go, God did not lead them by way of the land of the Philistines, although it was near (Exod 13:17)</i>
גַּם כִּי־אֵלֶךְ בְּגִיא צְלֻמוֹת לֹא־אִירָא רָע	<i>Even though I walk in the valley of deep dark- ness, I do not fear evil (Ps 23:4)</i>
וְגַם אֶלְנָתָן וְדִלְיָהוּ וְגִמְרְיָהוּ הִפְּנֵעוּ בַּמֶּלֶךְ לְבַלְתִּי שָׂרֵף אֶת־הַמִּגִּלָּה וְלֹא שָׁמַע אֱלֹהִים	<i>Even though Elnathan and Delaiah and Gemariah urged the king not to burn the scroll, he did not listen to them (Jer 36:25)</i>

Ketiv and Qere in the Hebrew Bible

The text of the Hebrew Bible was finalized at the end of the 1st century and the early 2nd century CE. Since the 2nd century CE, the then still unpointed text was transmitted with great conservatism, such that changes to the text were avoided. As a consequence, a system was developed by the Masoretes that allowed for alternative readings.

For this purpose, the alternative reading was put in the margin of the biblical text in the manuscript. This is called *Qere* קִרְיָ, Aramaic for (*what is to be*) read. A small ק with a dot on top (an abbreviation for קִרְיָ) under the alternative reading indicates it as a Qere.

The reading for which there is an alternative reading is indicated by a small circle (in Latin *circellus*) that is placed on top of the Hebrew word or words in the main text. This word or these words are called *Ketiv* כְּתִיב (*what is*) written.

The vowel signs of the Qere and the accents are placed with the Ketiv in the main text and not with the Qere in the margin. When the vowels are incompatible with the word they are placed with (as in 2 Kgs 18:27 for example), it is an indication that there is a Qere in the margin. Otherwise, one always needs to look for a Qere in the margin, when there is a small circle on a word or words in the main text, in order to not miss a Qere.

In reading tradition, the Qere replaces the Ketiv; however, for textual criticism and historical linguistics, the Ketiv often preserves older or otherwise significant forms.

Qere may be found in the following circumstances in the Hebrew Bible:

- Adjustment to spelling conventions, e.g., Ketiv וּתְלוּשׁ and *she kneaded* with an exceptional vowel letter ו for a short vowel with the Qere וַתְּלֹשׁ *wattālś* and *she kneaded* (2 Sam 13:8)
- Adjustments to grammatical norms, e.g., Ketiv בַּהֲשֵׁרָה with unusual preservation of the article after the proclitic preposition בִּ with the Qere בַּשֶּׂדֶה *in the field* (2 Kgs 7:12)
- Correction of mistakes, e.g., Ketiv אֵל תַּחַס עֵינֵיכֶם with the Qere אַל תַּחַס עֵינֵיכֶם that corrects the preposition אֵל to the negative אַל and the subject עֵינֵי to the required singular form (Ezek 9:5); Ketiv עֲבַרְנוּ *our crossing* with the Qere עֲבָרָם *their crossing* (Josh 5:1)

- Preferred readings, e.g., Ketiv הִבָּאִישׁ (vocalized הִבָּאִישׁ) *he became hated* with the Qere הִבְשִׁישׁ *he became ashamed* (Isa 30:5)

A Qere may be even found where there is no word in the main text that it is meant to replace. This is a case of קרי ולא כתיב¹ *read but not written*, e.g., Ketiv הִנֵּה יָמִים *and see, days* with the Qere הִנֵּה יָמִים בָּאִים *and see, days are coming* including the required predicate בָּאִים (Jer 31:38). The opposite, an element in the main text that is not to be read, thus dropped, is called כתיב ולא קרי² *written but not read*, e.g., Ketiv יסלח נא *may he forgive* with the particle נא with the Qere יסלח without the particle (2 Kgs 5:18).

With some frequent or recurring instances of Ketiv and Qere, the Masoretes did not put the Qere in the margin. They only put the vowels of the Qere with the Ketiv in the main text. This phenomenon is called perpetual Qere (in Latin *Qere perpetuum*). The following cases of perpetual Qere can be mentioned:

1. The name of God is יהוה in the Ketiv. According to Jewish tradition, the name of God is not to be pronounced. Instead, one reads אֲדֹנָי *ʾādōnāy Lord* (in English Bibles). However, the Masoretes did not put the complete vowels of אֲדֹנָי with the Ketiv but adjusted them. In some manuscripts like the Leningrad Codex one only finds *šwa* and *qāmæṣ*, while in others one finds *šwa*, *holem* and *qāmæṣ*. If יהוה is immediately preceded or followed by אֲדֹנָי, one reads the Qere אֱלֹהִים *God* instead. In most cases one finds only *šwa* (or *hatef segol*) and *hireq* with the Ketiv *šwa*, but *šwa* (or *hatef segol*), *holem* and *hireq* are attested, as well (e.g., Deut 3:24; Gen 15:2; 1 Kgs 2:26; Judg 16:28).
2. Jerusalem is ירושלם in the Ketiv with the Qere יְרוּשָׁלַיִם *yərūšālāyīm* (cf. ירושלים in IQIsa^a 30:15 [Isa 37:10]). The Ketiv should probably be vocalized as יְרוּשָׁלַם.
3. In the Torah, the 3rd person fem. sg. independent personal pronoun הִיא is הוּא in the Ketiv (like the masc. form). More information about this can be found in JM § 39c.
4. The noun נַעֲרָה *girl, young woman* in the absolute state has the Ketiv נער without the feminine ending ה-.
5. Issachar, the name of the ninth son of Jacob, is יששכר in the Ketiv and יִשָּׁכָר in the Qere.

¹ Vocalized קרי ולא כתיב.

² Vocalized כתיב ולא קרי.
